Local Notice to Mariners for Northwest District 11/04/2026

Admiralty Inlet

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Strait of Juan De Fuca - Admiralty Inlet/General/Miscellaneous	Miscellaneous	MSIB 004-26 Quiet Sound Voluntary Slowdown https://www.pacificarea.uscg.mil/Our-Organization/Northwest-District/District-Staff/dp/dpw/notices/ The Quiet Sound voluntary commercial vessel slowdown in Admiralty Inlet aims to reduce underwater noise in Southern Resident killer whale critical habitat. The 2025-26 slowdown will be in effect starting at 0001 PST on 3 September 2026 and will remain in effect 24 hours per day until 2359 PST on 31 January 2027, at the latest, depending on orca presence. More information can be found at: https://quietsound.org/admiralty-inlet-slowdown. When in effect, the slowdown requests all inbound and outbound commercial vessels transiting through the slowdown zone not exceed the following speeds through water when safe and operationally feasible: 11 knots – General cargo, bulkers and tankers 14.5 knots – Vehicle carriers, cruise ships, and container vessels The voluntary vessel slowdown takes place in the inbound and outbound lanes of the shipping lanes within these boundaries: Northwest: a line drawn from Pt Hudson (48-07-02.150N, 122-44-56.065W) to Admiralty Head (48-09-15.181N, 122-40-46.211W) Northeast: a line drawn from Randall Pt (47-58-59.653N, 122-21-10.336W) to Mukilteo Light (47-56-53.452N, 122-18-28.955W) South: a line drawn from Apple Cove Pt (47-48-55.926N, 122-28.51.186W) to Edwards Pt (47-48-12.024N, 122-23-41.726W) Speed transition zones are in place about 5 nautical miles prior to entering the slowdown area. Any directions from Puget Sound Vessel Traffic Service take precedence and supersede these measures. The voluntary slowdown is led by the Quiet Sound program at Maritime Blue, in cooperation with government agencies, tribal governments, industry partners and conservation groups. For more detailed information related to this slowdown and the Quiet Sound program, including a graphic of the voluntary slowdown area, refer to the following web address: https://quietsound.org/admiralty-inlet-slowdown.

Columbia River - Baker Bay West Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	HME Construction Inc will be performing clamshell dredging and dump scow disposal operations near Baker Day Channel from 18 Oct – 10 Nov 2026, working 7 days a week 24 hours a day. Dredge Site extends from USCG Station Cape Disappointment to 1 NM down the channel. Dredge spoils will be transported to Columbia River Miles 6 - 7.5, 2000 ft north of the shipping lane. Vessels include Dredge Boat Seahorse, one split-hull dump scow, Tug Terilyn and support tug Douglas, monitoring VHF Channels 13, 16, 67, 68, or 69. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information, please contact HME Project Manager at 503-250-1827 or 360-904-2978. USACE Contracting Officers Representative is Nathan Miller, 360-899-8223.	

Bellingham Bay

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Hale Passage - Bellingham Bay/General/Miscellaneous	Miscellaneous	The Washington Department of Fish and Wildlife will be conducting sea duck captures in Bellingham Bay from November 2 through November 10, 2026. Captures are expected to occur near Portage Island and near the Nooksack River delta. Four vessels will be used during the capture operations: one 28-foot aluminum enclosed center console (R/V Puffin), one 16-foot Boston Whaler, and two 13-foot rigid hull inflatable boats (RHIBs). All vessels will be equipped with required safety equipment, including navigation lights, signaling and communication devices. Capture vessels will be communicating on VHF channel 72; VHF channel 16 will also be monitored. Daily operations will begin at approximately 0400 hours, with vessels departing from Squalicum Harbor Marina in Bellingham. Capture activities are expected to conclude between midday and early afternoon, at which time all vessels will return to Squalicum Harbor. Sea ducks will be captured using 36-meter-long floating mist nets and decoys. This equipment will be deployed before dawn and removed at the conclusion of each day's operations. Flashing strobe lights will be attached to the nets during predawn deployment to improve their visibility. Nets will be continuously monitored by capture vessels. Matthew Hamer will be the primary (on water) point of contact and may be reached at 360-522-6361. Matthew Wilson will be land-based and may be contacted in case of emergency at 509-654-2909.

General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Advanced American Construction will be constructing a new railroad bridge on the Washington side of the Columbia River near RM 168.2. at the confluence of the White Salmon River & Columbia River. Work includes heavy marine assets, critical lifts, and pile driving operations. The Derrick Barge AAC Millennium will be on station from 10 Nov 25 through 31 Dec 26. Working days are planned for Monday through Friday, 0700 to 1700. Onsite equipment will monitor VHF-FM channels 13 & 16 during working hours. Mariners are requested to reduce speed and avoid the work area. During non-working hours, the derrick barge will remain on station with steady white lights on all four corners. Please call Kristian Hellberg at (703) 409-1614 or email at kristianh@callaac.com for more information.	Lat: 45° 43' 42" Lon: -121° 31' 21"

Boundary Pass

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Boundary Pass/General/Threatened And Endangered Species Advisory (TESS Advisory)/Marine Wildlife Migration	Threatened And Endangered Species Advisory (TESS Advisory)	Effective 01 Jun (exact date TBC by ECHO team based on SRKW presence) to 30 Nov 2026, the Enhancing Cetacean Habitat and Observation (ECHO) Program voluntary ship slowdown through Haro Strait and Boundary Pass is in effect for all inbound and outbound commercial and government vessels to reduce underwater noise for at-risk whales. If it is safe and operationally feasible to do so, commercial and government vessels are requested to not exceed the following speeds through the water: 11 knots – Bulkers, tankers, general cargo vessels, and government vessels; and, 14.5 knots – Vehicle carriers, cruise ships, and container vessels. This voluntary slowdown takes place between 48°24'22.78"N, 123°12'15.26"W, and 48°46'39.28"N 123°1'36.84"W. Speed transition zones are in place within the established traffic system at both approaches to the slowdown area. The north transition zone are those waters between north of Boat Pass, Saturna Island and Rosenfeld Rock and the south transition zone are those waters between buoy VH at the Victoria pilot station, and Sea Bird Point at the southeast corner of Discovery Island. There are also two optional slow down areas, one rounding turn point and the other between Turn point, Saturna Island and Alden Point, Patos Island. This initiative will remain in effect 24 hours per day until 23:59 PDT on 30 Nov 2026, depending on southern resident killer whale presence in the fall. The ECHO Program is led by the Vancouver Fraser Port Authority in collaboration with government agencies, Indigenous communities, industry partners and environmental groups. For more detailed information, refer to the following internet web address: https://www.portvancouver.com/echo/

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Columbia River, Submerged Land Act (SLA) - Depoe Bay/General/Bridges/Rehabilitation	Bridges	Oregon Department of Transportation (ODOT) and Carter Construction will be completing a cathodic protection project on the US-101 Bridge (BRDG UID 29514) (LLNR 9627) across the entrance to Depoe Bay, OR. The planned start time/date is 0600 on 5 Jan 2026 through 1800 on 18 Dec 2026. The start and end dates may change due to weather conditions. The work requires the use of containment via scaffolding, that will reduce the vertical navigation clearance of the subject bridge from 46 feet to 41 feet at high tide for the center horizontal 38ft above the main navigation channel. There will also be scaffolding that will hang about 19' below the bottom of the bridge on the north and south side of the bridge arch of the main navigation channel and will remain in place until maintenance is completed until November / December. The containment will be marked with amber caution lighting and will not obstruct any navigational aids. For more information contact Markus Schaaf at Markus.Schaaf@odot.oregon.gov. Lake Union/General/Bridges	Bridges	WASHINGTON – LAKE WASHINGTON SHIP CANAL – UNION BAY REACH – Bridge deviation The Coast Guard has approved a temporary deviation for the operating schedule that governs the Fremont Bridge (BRIG UID 31179), mile 2.6, and the University Bridge (BRIG UID 31182), mile 4.3, both crossing the Lake Washington Ship Canal in Seattle, WA. The deviation will accommodate the Seattle Marathon running event. To facilitate this event, the draws of the subject bridges will be authorized to not open to marine vessels. The closure will be; Fremont Bridge from 0800 to 1300 on November 29, 2026, and the University Bridge from 0800 – 1100 on November 29, 2026. Vessels that do not require bridge openings may continue to transit beneath these bridges during the closure period. The draws will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. For more information contact Kit Loo at (206) 684-3669 or kit.loo@seattle.gov.	Lat: 47° 38' 52" Lon: -122° 20' 59"

Lake Washington

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Union Bay Reach - Lake Washington/General/Bridges/Temp Deviation	Bridges	WASHINGTON – LAKE WASHINGTON SHIP CANAL – Montlake Bridge deviation notice The Coast Guard intends to approve a temporary deviation from the normal operating schedule that governs the Montlake Street Bridge (BRDG UID 31183) across the Lake Washington Ship Canal, mile 5.2. The Montlake Street Bridge need not open the draw for marine vessels during heavy road traffic for the 2026 University of Washington football games on the following dates and times: - 06 Sep 1000 to 1330 and 1600 to 1830; - 12 Sep, 0930 to 1300 and 1530 to 1800; - 19 Sep, 1300 to 1700 and 1900 to 2200; - 26 Sep, 1700 to 2030 and 2300 to 0130; - 09 Oct, 1500 to 1830 and 2100 to 2330; - 07 Nov, 0930 to 1300 and 1530 to 1800; - 21 Nov, TBD. The deviation is necessary to accommodate vehicular traffic attending football games at Husky Stadium at the University of Washington, in Seattle, Washington. This deviation will allow Montlake Bridge to remain in the closed-to-navigation position before and after each game. Due to television scheduling, game times will be published at later dates when determined, and the MSI will be updated with the bridge closure times. Vessels which do not require a bridge opening may continue to transit beneath this bridge during the closure. The bridge will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. The Coast Guard will publish any updates or changes to this operating schedule in future MSI announcements. The bridge shall operate in accordance with 33 CFR § 117.897 at all other times. If any mariner cannot support the dates listed for a bridge closure, please submit a comment by 04 Jul 2026 at SMB-CGD-NW-BRIDGES@USCG.MIL. For more information, contact Colleen Kelly at (425) 739-3700.	Lat: 47° 38' 51" Lon: -122° 18' 17"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
SalmonBay/General/Bridges	Bridges	WASHINGTON – LAKE WASHINGTON SHIP CANAL – SHILSHOLE BAY – Bridge notice (Revised) Burlington Northern Santa Fe Railway Company (BNSF) will be performing heavy rail maintenance/construction on the Salmon Bay Railroad Bridge (BRDG UID 31177) (AKA BNSF Bridge 6.3), mile 0.1, across the Lake Washington Ship Canal in Seattle, Washington. The construction work requires the draw of the subject bridge to be closed from 02 November 2026 to 25 November 2026. This draw closure corresponds with the USACE's large Hiram M. Chittenden Lock closure. The Coast Guard has approved a temporary deviation to the operating schedule that governs the Salmon Bay Railroad Bridge from 0600 on 02 November 2026 to 1600 on 25 November 2026. The draw will be able to open from 8 A.M. to 8 P.M on 14 - 18 November 2026, if a 24-hour notice is given to the bridge operator. The subject bridge provides 43 feet of vertical clearance in the closed-to-navigation position at mean higher high water. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. This construction requires barges in the navigation channel during the same time as USACE's annual lock closure and maintenance to minimize impacts. A crane and material barge will be positioned in the water to service the work of erecting temporary trusses that are required to execute the counterweight change out. During this timeframe, access on the southern channel to the small locks will be in operation during the large lock closure. A construction zone will be established for mariners to navigate around at minimum safe speed. The subject bridge will not be able to open for emergencies, and there is no immediate alternate route for vessels to pass. For more information on this draw bridge closure contact Travis Woodley at travis.woodley@bnsf.com or (682) 978-3311.	Lat: 47° 40' 01" Lon: -122° 24' 08"
Shilshole Bay - SalmonBay/General/Miscellaneous	Miscellaneous	The Hiram M. Chittenden Locks will close the large lock chamber to conduct annual maintenance from 0600 on 02 Nov – 1700 on 20 Nov 2026. Marine traffic will continue to use the Auxiliary (small) lock chamber. Further information is posted on USACE website: https://www.nws.usace.army.mil/Missions/Civil-Works/Locks-and-Dams/Chittenden-Locks/Closures/. Mariners can also call the Lockmaster at (206) 297-9745. Saratoga Passage

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Possession Sound - Saratoga Passage/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	The Naval Research Lab will be conducting a Sofar Wave buoy installation in Saratoga Pass from 22 Jul through 03 Aug 2016. These buoys will be in place until November 2026. There will be two sets of two buoys each, comprising of one anchored red polyball buoy, and one yellow spotter buoy tethered to the red polyball buoy. The hazard is a 5m tether line horizontally near surface from the Spotter to the red polyball buoy, and vertical mooring line from the red polyball to a clump weight anchor on the seafloor at the below locations. See attached diagram. Each set of buoys are in approximate positions 48°13'10.21"N, 122°34'2.09"W and 48°15'9.99"N, 122°34'1.05"W. The R/V Michael Uhl and R/V Surveyor will be on station during the deployment and will be monitoring VHF-FM Channel 16. For additional information, contact NRL Stennis at 228-688-5825. Vancouver To Bonneville

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION

Columbia River - Vancouver To Bonneville/General/Marine Construction (Excluding Bridges)/Boring and Core Samples	Marine Construction (Excluding Bridges)	The Interstate Bridge Replacement Program will be conducting geotechnical investigations west of the existing Interstate 5 Bridge across the Columbia River between Vancouver, WA and Portland, OR at Columbia (RM 106.5) from 02 Nov 2026 – 31 Jan 2027. The work will infringe on the Alternate Barge Channel South, Alternative Barge Channel North, and the Vancouver to The Dalles Channel (lift span). The Tug South Creek and Barge Mark 12 will be on station and will reduce available horizontal clearances. The normal amount of horizontal clearance available at these channels will be reduced, and vessels are advised to use alternate channels if horizontal clearance is not sufficient in the channels. Only one channel will be reduced at any one time. Mariners are requested to maintain an appropriate distance and create no wake within 200 feet. Tug operator will be monitoring VHF Channels 13 and 16. During non-working hours the barge will remain on station with al-round white lights on all 4 corners, pursuant to CFR 83.30. Additional work will take place at other locations in the main stem Columbia River but will not infringe on the designated navigation channels on the main Columbia River. There will be no infringement on the available vertical clearances and no changes to the operation of the lift span. For more information, contact Mark Marine Services at 360-772-0916. Willamette River/General/Bridges	Bridges	OREGON - WILLAMETTE RIVER – PORT OF PORTLAND – Bridge notice The Coast Guard has approved a temporary deviation to the operating schedule that governs the Hawthorne Highway Bridge (BRDG UID 38555), mile 13.1, crossing the Willamette River at Portland, Oregon. This deviation accommodates the Tofurky Trot running event on 26 November 2026. This deviation will allow the subject bridge draw to remain in the closed-to-navigation position from 0900 to 1100 on 26 November 2026. The vertical clearance for the Hawthorne Bridge is 49 feet, referenced to the vertical clearance above Columbia River Datum 0.0. Vessels that do not require a bridge opening may continue to transit beneath the bridge during this closure period. The bridge will be able to open for emergencies, and there is no immediate alternate route for vessels to pass. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation.
