SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

ILLINOIS WATERWAY/UPPER MISSISSIPPI RIVER - ICE CONDITIONS/COTP ADVISORY - UPDATE

Due to current and forecasted conditions, COTP Upper Mississippi has issued the following Safety Advisories;

Upper Mississippi River

Zones 1-3 (Mile 857.6 – Mile 796.9) Remain in the action phase for ice conditions in accordance with the Upper Mississippi River WAP Annex.

Zone 6 (Mile 145.5 – Mile 129.0) Is in the action phase for high water conditions in accordance with the Illinois Waterway WAP Annex.

Recreational vessels are prohibited from transiting in this area. Mariners are urged to transit this area with caution and at their slowest safe speed to minimize wake.

Illinois Waterway

Zones 3-5 (Mile 128.9 – Mile 50.0) and Zone 7 (Mile 180.9-Mile 145.6) Are in the watch phase for high water conditions in accordance with the Illinois Waterway WAP Annex.

Mariners are urged to transit these areas with caution and at their slowest safe speed to minimize wake.

Mariners are requested to ensure that fleets are closely monitored and that mooring lines are adequately secured and to exercise due caution to avoid sinking barges and high localized flow or out-draft conditions due to water bypassing a temporary dam that may be caused by an ice gorge. Mariners should be aware that buoys may be unreliable due to ice conditions. Ice flows render reflective material ineffective and may drag buoys from their assigned positions and sever buoys from their moorings.
