LOCAL NOTICE TO MARINERS

District: 1

Week: 42/24

COASTAL WATERS FROM EASTPORT, MAINE TO SHREWSBURY, NEW JERSEY

* Unless otherwise indicated, missing and destroyed structures are presumed to be in the immediate vicinity of assigned position. Mariners should proceed with caution.

* The Local Notice to Mariners is a weekly edition.

* Inquiries, published articles or Information: mail to: D01-SMB-LNM@uscg.mil.

* The U.S. Coast Pilot supplements the navigational information shown on nautical charts.

* The Coast Pilot, along with its corrections, are available online at <https://nauticalcharts.noaa.gov/publications/coast-pilot/index.html>.

* The Local Notice to Mariners is available online at <https://navcen.uscg.gov/local-notice-to-mariners-by-cg-district>

* Updated Light List is available online: <https://navcen.uscg.gov/light-lists>.

* Weekly updates to all Light Lists: <https://navcen.uscg.gov/weekly-light-lists>

* Information on Private Aids to Navigation is available at: <http://www.usharbormaster.com/>

* Reports of Channel conditions can be found at the Army Corps of Engineers website at: <http://www.nan.usace.army.mil/Missions/Navigation/ControllingDepthReports.aspx>.

* NOAA Chart Corrections and Chart Viewer: <https://www.nauticalcharts.noaa.gov>

* NOAA Tides and Currents can be found at: <http://www.tidesandcurrents.noaa.gov/>.

* Weather: <https://www.weather.gov/>

* The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <https://navcen.uscg.gov/nanu-information>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or AIS service. Users are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, mail to: tis-sg-nisws@uscg.mil, or on the internet at: <https://navcen.uscg.gov/>.

PLEASE IMMEDIATELY REPORT DISCREPANCIES IN AIDS TO NAVIGATION TO THE NEAREST COAST GUARD UNIT

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

CHANGES TO THE USCG LOCAL NOTICE TO MARINERS (LNM) AND LIGHT LISTS

The U.S. Coast Guard Navigation Center announces upcoming changes to the Local Notice to Mariners (LNM) and the Light List, as part of our efforts to modernize and improve the accessibility, accuracy, and overall user experience for mariners and other stakeholders. Information about these changes can be found here (https://navcen.uscg.gov/sites/default/files/pdf/LNM_LL_WebsiteNotice.pdf).

NY-LONG ISLAND-FIRE ISLAND-SMITH POINT

Mariners are advised of an update to the fiber optic telecom cable (Grace Hopper) installed off Smith Point, NY in May 2022. [NOAA RNC Charts: #12300, #13003, #13006 and ENC Chart: US3NY01M]. The cable route in NY State Waters runs from shore to a point 3 nautical miles from shore 40-43.7732N, 072-51.6484W to 40-42.0286N, 072-47.2872W. During the installation the cable was buried by mechanical trencher below the seabed. Subsequent post-installation monitoring in NY State waters indicates that, while the cable remains buried, its burial depth appears reduced in some locations, possibly due to natural sediment movement.

This fiber optic telecom cable measures 2 inches in diameter and carries high voltage. If a vessel's anchor or fishing gear is suspected to have engaged the Grace Hopper subsea cable, do not attempt to bring it to the surface. Please contact the SubCom Emergency Hotline at +1 (732) 578-7474 (ask for snag hotline). For additional information please contact (marineliaison@subcom.com).

Right Whale Protections

Right whales are active in coastal and offshore waters. It is illegal to approach or stay within 500 yards of right whales. Mandatory and voluntary speed restrictions of 10 knots apply to vessels 65 feet or longer in specific areas of the U.S. East Coast, but all vessels are urged to slow in these areas. Refer to Section VII of this LNM for active Slow Zones and Dynamic Management Areas. Or visit NOAA's website to learn more and sign up for notifications about seasonal management areas and right whale slow zones. Or follow on X @NOAAFish_GARFO. See the latest sightings on whalemap.org. Please report sightings of dead, injured, or entangled whales to 877-942-5343 or to the U.S. Coast Guard on channel 16.

New Merchant Mariner Credential

The U.S. Coast Guard announced a new merchant mariner credential (MMC) set to launch on March 1, 2024. This milestone marks the first comprehensive revision of the mariner credential in nearly a decade and is strategically designed to enhance both quality of service and security within the Marine Transportation System (MTS). U.S. Coast Guard Marine Safety Information Bulletin (MSIB) 01-24, New Merchant Mariner Credential Passport Booklet Replacement, has been posted on the DCO's MSIB Site and announced at the National Maritime Center (CG-NMC) Home Page (uscg.mil). Please visit these resources for more information on the credential.

LNM: 09/24

Publication of NVIC 03-23 Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations (OREI).

The Coast Guard has published Navigation and Vessel Inspection Circular (NVIC) 03-23: Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations (OREI) to highlight considerations when planning and undertaking voyages in the vicinity of offshore renewable energy installations (OREI) in U.S. waters. The prudent mariner should review and utilize this NVIC to make an informed risk assessment prior to navigating within or in the vicinity of an OREI. Important Maritime Safety Information (MSI) relating to OREIs is distributed by Local or Broadcast Notices to Mariners (LNM or BNM) promulgated by Coast Guard Districts. Marine Safety Information Bulletins (MSIB) released by the local Captain of the Port (COTP) may be issued to provide supplemental information. Interested parties should contact the Office of Navigation Systems at CGNAV@uscg.mil with any questions or feedback.

LNM: 47/23

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

INTERFERENCE WITH AIDS TO NAVIGATION

14 USC 543. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 541 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 542 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense.

U.S. COAST GUARD AUXILIARY – PUBLIC EDUCATION CLASSES – FIND BY ZIPCODE

The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.

CANCELLATION OF NOAA PAPER AND RASTER NAUTICAL CHARTS

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction." A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: <https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

NOTICE TO ALL PRIVATE BOATS AT SEA

United States laws and regulations require that ALL private boats arriving from a foreign port or place MUST report to the Bureau of Customs and Border Protection IMMEDIATELY upon their arrival into the United States. Every person entering the United States must be seen in person for immigration purposes by a Customs and Border Protection officer, except those participating in the I-68 -Canadian Border Boat Landing Program. However, holders of form I-68 are still required to report their arrival into the United States to the Bureau of Customs and Border Protection. Masters and passengers must provide proof of citizenship or legal immigration status, and be in possession of a valid passport and visa, if required. Citizens of countries that are participants in the Visa Waiver Program are not eligible to seek admission to the United States under that program via private vessel. Once your boat is anchored or tied, you are considered to have entered the United States. No one may leave the vessel until Customs and Border Protection grants permission. The only exception to this requirement is to report arrival. In order to fulfill the requirement to immediately report a private boat arrival, the master of the vessel must contact the nearest Customs and Border Protection Office, or if the arrival occurs after business hours, the nearest 24 hour port of entry. Upon reporting, you may be required to proceed to a staffed port for inspection by Customs and Border Protection. Failure to comply with these requirements could result in serious criminal and civil penalties, including seizure of the boat. International mariners are urged to report any suspicious or illegal activity to the Bureau of Customs and Border Protection at 1-800-BE-ALERT.

US NOTICE TO MARINERS (NTM)

The US Notice to Mariners provides timely marine safety information for the correction of all US Government navigation charts and publications from a wide variety of sources both foreign and domestic. To ensure the safety of life at sea, the information published in the Notice to Mariners is designed to provide for the correction of unclassified nautical charts, the Unclassified NGA/DLIS Catalog of Hydrographic Products, United States Coast Pilots, NGA List of Lights, USCG Light Lists, and other related nautical publications produced by NGA, NOS and the U.S. Coast Guard. The US Notice to Mariners will contain only those chart corrections of interest to ocean going vessels. It is available online at http://msi.nga.mil/NGAPortal/MSI.portal?_nfpb=true&_pageLabel=msi_portal_page_61. NTM 01 – Special Paragraphs includes information on: America's Waterway Watch program asking those who work, live, or recreate on or near the water to be aware of suspicious activity, The Prudent Mariner and the use of floating Aids to Navigation, and Northern Right Whales.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR						
(Temp) ADD	NATIONAL DOCK CHANNEL BUOY 3				CGD01	074-02-48.001W
	Corrective Action	Green can	Object of Corrective Action		Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

MAINE GENERAL NOTICES

Information for Mariners using the Waterways of the State of Maine.

ME-SCARBOROUGH RIVER

Scarborough River Buoy 4, LLNR 7895, in position 43-32.01N 070-19.23W currently has 4 mooring balls from a local marina surrounding the buoy. When entering the Scarborough River Channel utilizing the aids to navigation available, the boats attached to the mooring balls obscure the sight of mariners attempting to use Scarborough River Buoy 4. If vessels take the turn around Scarborough River Buoy 3 to wide, they will potentially hit the unlit anchored vessels, which are inside the marked navigable channel. Mariners are urged to use extreme caution and maintain a sharp lookout and transit the area at their slowest safe speed.

LNM: 32/24

ME-NH- PISCATAQUA RIVER-PORTSMOUTH NAVAL SHIPYARD

Recon Offshore, will be conducting hydrographic surveys at the Portsmouth Naval Shipyard, Piscataqua River, Maine and New Hampshire, from October 22, 2024, October 31, 2024, Monday through 7:00am to 5:00pm. Equipment on scene will be a side scan sonar, marine magnetometer and sub bottom profiler, monitoring VHF FM 16 for any concerned traffic. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

MA-CAPE COD-HYANNIS

The Cape Cod Artisanal Fisheries, LLC will be installing a poler net fish weir, in Hyannis, MA, in position 41-37-07N, 070-18-47W, from September 3, 2024, to November 30, 2024. The fish weir will be lit, with a flashing yellow light at both ends and in the middle. The ends will flash every 5 seconds and the middle will flash every 9 seconds. Mariners are advised to keep a sharp lookout while transiting the area.

LNM: 36/24

MA-CAPE COD-WIANNO

The Cape Cod Artisanal Fisheries, LLC will be installing a poler net fish weir, in Wianno, MA, in position 41-36-33N, 070-22-00W, from September 3, 2024, to November 30, 2024. The fish weir will be lit, with a flashing yellow light at both ends and in the middle. The ends will flash every 5 seconds and the middle will flash every 9 seconds. Mariners are advised to keep a sharp lookout while transiting the area.

LNM: 36/24

MA-NANTUCKET SOUND-YARMOUTH

Barnstable County Dredge will be conducting dredging operations in Parker's River Approach & Entrance Channel, Yarmouth located in Nantucket Sound, in position 41-38.116N, 070-13.214W, from October 21, 2024 to November 16, 2024, Monday through Saturday, between 7:00am to 4:30pm. Equipment on scene will be the dredge boat Cod Fish II and various support vessels and approximately 3,500 feet of pipeline, monitoring VHF-FM CH 16. The dredge is stationary and has limited maneuverability. The discharge pipe will be floating at times during dredging operations and may be blocking the channel. Cables extending on both the port and starboard side of the forward part of the dredge leading to anchors with floats marking their locations. Mariners are requested to give adequate clearance to the equipment at all times.

LNM: 42/24

MA-BOSTON-CHARLES RIVER

TM Diligence will conduct survey of foundations in early October 2024. Monopiles at AF08 and AL11 will be installed by BOKALIFT 2 and associated vessel spread. Following Monopile installation, the foundations will be topped with a frame that will eventually accept the Offshore Sub Stations. Significant large vessel activity, including heavy lift vessel WHITE MARLIN, and BOKALIFT 1 and BOKALIFT 2 will be operating Restricted in ability to maneuver in the REV Wind Lease areas and near these foundation locations in Mid-late October.

The Cable Laying Vessel (CLV) SEAWAY AIMERY has commenced cable installation activities. She is supported by ROSS CANDIES and J.D. ASSISTER. Seaway Aimery will lay cables, J.D. Assister will bury cable, both vessels will be Restricted in Ability to Maneuver. One or more safety vessels will monitor unburied or potentially unburied cable; mariners should avoid bottom contacting activity in these locations.

This week, the Seaway Aimery will be likely be installing the following cables: AJ13-AJ14, AG09-AH09, AK10-AL10, AK12-AL12, AL18-AL19, AL20-AL21, AM20-AM21, AM19-AM20, AM19-AM19, AN16-AL18, AP15-AP16, AG07-AG06, AJ03-AJ02. The JD Assister is trenching and burying cables behind the Seaway Aimery. This week, the vessel will likely be at the following locations: AE06-AE07, AE08-AE07, AE08-AE09, AE09-AE10, AJ11-AJ10, AP13-AP14, AJ13-AJ14, AG09-AH09, AK10-AL10, AK12-AL12, AL18-AL19, AL20-AL21, AM20-AM21. As of October 15, 2024, the following cables have been buried: AH09-AJ09, AJ11-AJ12, AJ12-AJ18.

The Wind Turbine Installation Vessel (WTIV) SCYLLA is installing turbine towers, nacelles, and blades via a feeder barge system from New London. Barge 455-8 and Tugs SAM and OCEAN WIND will support. PAUL CANDIES will support commissioning works. USCG SAFETY ZONES may be enforced around the turbine location undergoing installation, continuing into Spring 2025
Nearshore cable route preparation the two (02) REVOLUTION WIND export cables.

The vessel SHELIA BORDELON will be conducting boulder relocation with a grab, debris removal with a grab, pre-lay grapnel runs (PLGR), and multibeam survey operations along the Empire Wind submarine export cable corridor between the state water boundary (3 nautical mile limit) and the lease area in the New York/New Jersey Bight. The work is performed adjacent to the Ambrose channel, within the precautionary area for traffic, within a traffic separation zone, and crossing the Ambrose to Nantucket Traffic Lane. Operations will commence on or about October 25, 2024, until approximately November 30, 2024, and will be conducted 7 days per week, 24 hours per day. The vessel will be restricted/limited in her ability to maneuver. Boulder positions after relocation will be available shortly after relocation. During PLGR operations, SHELIA BORDELON will be towing a grapnel within the Ocean New York Bight at a minimum of 150m (500 feet) behind the vessel. The speed of the vessel will not exceed 1 knot during the PLGR operation. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

The dredge VIRGINIAN will be working between Red N "2" and Red/Green "R" throughout Raritan River Cut-Off, and the project is expected to continue until approximately **October 15, 2024**. There will be two equipment moorings temporarily established inside Anchorage 44 near Ward Point Bend (West). One mooring will be used for the mud scows, and another will be for a Fuel Barge. These moorings will be outside of the navigation channel near Green "55." Coordinates for the scow mooring; 40 29 20.3305 N, 074 15 19.8685 W. Coordinates for the Fuel barge mooring; Latitude 40 29 17.113 N, 074 15 19.874 W. The Dredge Operators will standby on channels #13 and #16 VHF-FM. Traffic should call 60 minutes prior to the expected time of passage. All mariners are requested to stay clear of the dredge, barges, cranes, and tugs. Operators of vessels of all types should be aware that the barges are held in place by cables, attached to anchors some distance away from the equipment. Aids to Navigation (AtoN) in the cutoff may be temporarily relocated or discontinued for the duration of the project. Mariners are cautioned to strictly comply with the Rules of the Road when approaching, passing, and leaving the area of operations, and remain a safe distance away from the dredge, buoys, cables, barges, cranes, wires, and related equipment.

NJ-RARITAN BAY-CARTERET

George Harms Construction Co. will be conducting pier construction at the Carteret Ferry Terminal in position 40-34-21.88N, 074-12-45.48W, on or around **July 1, 2024**, between 6:00am to 5:00pm. Equipment will not impede the federal channel, but any vessel movement requests can be conducted on VHF-FM CH 16 with the on-scene equipment. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution.

LNM 18/24

NJ-ARTHUR KILL-CARTERET

George Harms Construction Co., Inc will be drilling shafts for marine structures, in Authur Kill, in position 40-34-21.88N, 074-12-45.48W, from **July 8, 2024, to April 1, 2025**, between 6:30am to 4:00pm. Equipment on scene will be a 60'x140' barge, 30'x40' barge, a steal push boat, and an aluminum work boat, monitoring VHF-FM CH 16 for any concerned traffic. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

LNM 27/24

NJ-JERSEY CITY

Trevcon Construction Company Inc. will be installing precast concrete elements, placement of stone and structural concrete work at the Global Container Terminal, Jersey City, in position 40-40-8.900N 074-4-30.312W, from **October 24, 2022, to December 31, 2024**, between 5:00am to 7:00pm. Equipment on scene will be multiple barges and work vessels, monitoring VHF-FM CH 13 and 16 for any vessel passing or movement request. Mariners are urged to transit at their slowest safe speed to produce no wake and proceed with caution.

ATLANTIC OCEAN

ATLANTIC OCEAN

AMITIE submarine cable system will be conducted by C/S Sophie GERMAIN from **October 9, 2024, to October 19, 2024**, 24 hours a day, seven days a week, centred in position 42-28.919'N, 067-38.34254' W. During this operation the cable ship will be engaged in submarine cable operation, and therefore a wide berth of 1 nautical mile is requested.

NY-NJ-RARITAN BAY-GRAVESEND BAY-ATLANTIC OCEAN-Update 10/7/2024

Alpine Ocean will be conducting vibracore samplings offshore New York and New Jersey near Raritan Bay, Gravesend Bay, and the approach to the New York Lower Bay. General work area will be within the red area shown in the figure below, from **September 15, 2024, to October 30, 2024**, between 6:00am to 6:00pm. Equipment on scene will be the R/V SHEARWATER, monitoring VHF-FM CH 13 and 16 for any concerned traffic. The vessel will be performing geotechnical operations with equipment extending through the water and into the underlying seabed. The vessel will have limited maneuverability during operations. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

ATLANTIC OCEAN-SOUTH OF NOMANS LAND MARTHA'S VINEYARD

41 North Offshore LLC will be conducting offshore scientific monitoring 24 miles south of Noman's Land in position 40-53'60"N, 070-46' 9.88"W, from **May 8, 2024, to October 31, 2024**, 24 hours a day, seven days a week. Equipment on scene will be the Barge "ATLANTIC" – 150' x 54' x 10' barge with science equipment & 75' tall tower onboard, marked with (3) steady white all-around lights. Barge is unmanned and anchored with (4) anchors, each approximately 1,500' off the corners of the barge, 45* to the centerline of the barge. Anchor locations are marked with a spherical buoy. Anchor to barge connections are marked with can buoys. Each buoy is lit with flashing amber lights, 24 flashes per minute. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made and are requested to maintain a minimum ½ NM clearance from the barge to avoid anchor wires located below and will not be visible from the water's surface.

OFFSHORE WIND ENERGY/ONGOING WORK

Updated 10/15/2024

New information highlighted in Yellow.

This guidance is for Private Aids to Navigation (AtoN) applicants requesting Coast Guard approval to provide navigational markings on offshore wind energy area structures in First District-area waters. The following structure label identification, lighting, sound, and Automatic Identification System (AIS) signals are strongly recommended, to be included in the USCG/BOEM/BSEE-accepted Marking Labeling and Signaling Plan (ML&SP). Applicants should plan to apply for one Private Aid Permit per structure (to include all labels, light(s), sound and AIS signals per the accepted ML&SP). Private AtoN Permit applications should be submitted using the “as designed” position, between 60 and 30 days prior to the start of construction, when they will be processed. Additional specific recommendations, **to allow sufficient time for vessel operators to detect and make any necessary course or speed alterations, include:**

Tower/Electrical Service Platform (ESP) Identification:

- The foundation base of all towers should be painted yellow, RAL 1023, all around from the level of Mean Higher High Water (MHHW) to 50 ft above MHHW.
- Uniquely lettered and numbered in an organized pattern as near to rows and columns as possible to enable quick recognition and reference by mariners and agencies for search and rescue, law enforcement, and other purposes.
- (Tower) Letters and numbers, visible at night, labelled uniformly to at **least 2.5 m (8.2 ft) and as close to 3 m (9.8 ft) in height as possible**, rendered through use of retro-reflective or high contrast black, comparable to MilSpec #17038 or RAL 9005, to maximize visual range for nearby mariners.
- (ESP) Letters and numbers labelled to 1 meter high to maximize visual range for nearby mariners.
- The bottom of the 2.5m to 3m alphanumeric characters should be located at least 30 ft above MHHW and should be visible above any service platforms throughout a 360-degree arc from the water’s surface. If feasible, each unique alphanumeric designation should be duplicated below any servicing platform.
- It is strongly recommended to use retro-reflective paint and lettering/numbering materials to enhance visibility at night, and that an all-around band, retro-reflective material (white, yellow, or silver), visible through a 360-degree arc, at least 2 feet high, be applied to structures no less than 30 ft above MHHW.

Lighting:

- Located on all structures, preferably on the servicing platform, visible throughout a 360-degree arc from the water’s surface.
- Corner Towers/Significant Peripheral Structures (SPSs): Quick flashing yellow (QY), visible at a 5 nautical mile range.
- Intermediate Perimeter Structures (IPS) are those located along a wind energy facility’s outside boundary between SPSs: 2.5 sec flashing yellow (Fl Y 2.5s), visible at a 3 nautical mile range.
- Interior Towers, those inside the line of IPS and SPS towers: 6 second or 10 second flashing yellow (Fl Y 6/Fl Y 10), visible at a 2 nautical mile range.
- All lights serving the same function (SPS, IPS, inner boundary, etc.) should be synchronized within the field of structures.

Encl 3

Note: All base, tower and construction components preceding the final structure completion must be marked with Quick Flashing Yellow (QY) obstruction lights visible throughout 360 degrees at a 5 nautical mile range. **These interim lights do not require additional PATON applications and will be accounted for by the First District Waterways staff through BOEM/USCG/BSEE acceptance of the Marking, Labeling and Signaling Plan.** Coast Guard notification is *required* when a structure is first lighted, with a QY after it breaks the water's surface, and again when the final ML&SP is operational.

Sound Signals:

- All SPS should be fitted with a Mariner Radio Activated Sound Signal (MRASS) which when activated--by multiple (5x) keying on VHF channel 83A within 10 seconds--should sound every 30 seconds (4s Blast, 26s off) and audible for at least 2 NM, for 45 minutes from its last VHF activation.

Automated Information System (AIS) Transponder Signals:

- At a minimum, FCC-certified AIS Aids to Navigation signals should mark all SPS or other significant locations within the wind energy facility. **The structures may be marked with either physical or synthetic AIS message 21 as circumstances warrant.**
- **AIS broadcasts should be made at sufficient antenna height and power to provide a relatively uniform coverage strongly recommended to extend at least 8 nautical miles beyond the periphery of the wind farm.**

Note: AIS stations must be FCC type-certified and granted appropriate FCC licensing prior to broadcasting. See our USCG AIS Frequently Asked Questions #21 for more information and additional instructions on submitting an AIS PATON application.

ATLANTIC OCEAN-OFFSHORE MASSACHUSETTS-VINEYARD WIND 1 WIND FARM PROJECT AREA – SAFETY ZONE(S) ENFORCEMENT NOTIFICATION UPDATE-Update 10/16/2024

A 500-meter Safety Zone will be enforced around Vineyard Wind, LLC., operations from 8:00am, **October 16, 2024, to 8:00am, October 23, 2024**, Mariners are to avoid transiting within 500-meters of the following positions:

- AM37: 41-07-12.22N, 070-29-06.60W; AW38: 40-58-12.86N, 070-27-36.71W; AM39: 41-07-14.22N, 070-26-29.27W;
- AN39: 41-06-14.17N, 070-26-27.96W; AP41: 41-05-16.09N, 070-23-47.93W; AS40: 41-02-15.00N, 070-25-03.42W;
- AT39: 41-01-13.98N, 070-26-21.41W; AQ38: 41-04-13.10N, 070-27-44.67W

Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance from construction vessels and associated equipment when not located within one of the above-mentioned safety zone locations. Construction vessels include SEA INSTALLER, C PIONEER, & C FIGHTER. Construction will be supported by accommodation vessels – CADE CANDIES, GO LIBERTY, WINDEA ENTERPRISE, WINDEA COURAGEOUS, WINDEA INTREPID, GATEWAY ENDEAVOR, PATRIOT LEADER, tugs NICOLE FOSS & EARL REDD, and the barges PREVAILING WIND and MARMAC 400.

There will be several safety and scout vessels from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel and their equipment as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels.

ATLANTIC OCEAN-REVOLUTION WIND PROJECT AREA – SAFETY ZONE(S) ENFORCEMENT NOTIFICATION-Update 10/15/2024

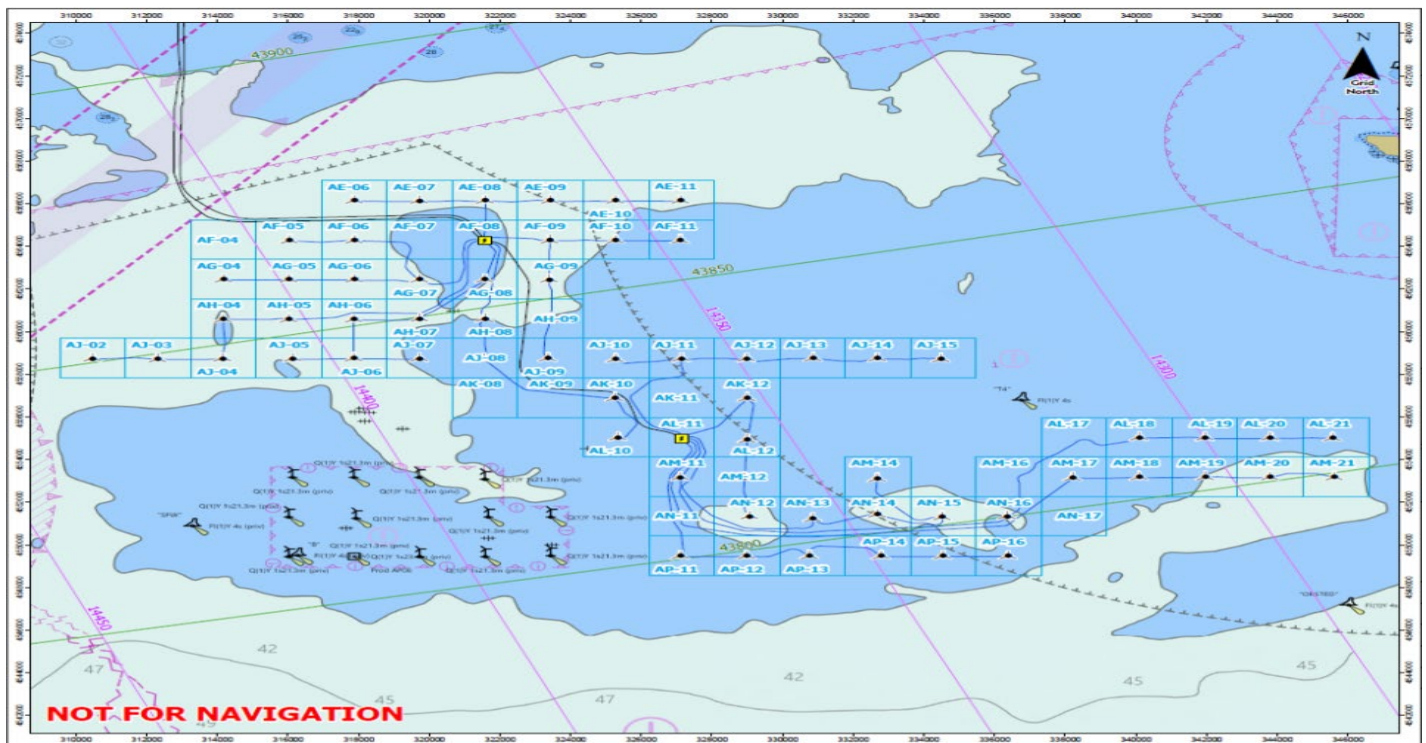

A 500-meter Safety Zone will be enforced around Orsted construction operations from **8:00am, October 16, 2024, to 8:00am, October 23, 2024**, Mariners are to avoid transiting within 500-meters of the following positions:

AJ12: 41-09-41.720N, 071-02-17.720W; AJ11: 41-09-40.485N, 071-03-37.008W; AM19: 41-06-51.704N, 070-52-56.190W; AM20: 41-06-52.601N, 070-51-37.572W; AG07: 41-11-33.246N, 0771-10-18.141W; AJ02: 41-09-27.123N, 071-15-31.816W; AH05: 41-10-31.745N, 071-11-35.639W, AG07: 41-11-34.931N, 071-08-59.208W; AJ11: 41-09-40.485N, 071-03-37.008W; AF08: 41-12-36.216N, 071-7-41.536W, AL11: 41-7-40.476N, 071-3-33.696W.

TM Diligence will conduct survey of foundations in early **October 2024**. Monopiles at AF08 and AL11 will be installed by BOKALIFT 2 and associated vessel spread. Following Monopile installation, the foundations will be topped with a frame that will eventually accept the Offshore Sub Stations. Significant large vessel activity, including heavy lift vessel WHITE MARLIN, and BOKALIFT 1 and BOKALIFT 2 will be operating Restricted in ability to maneuver in the REV Wind Lease areas and near these foundation locations in Mid-late October.

The Cable Laying Vessel (CLV) SEAWAY AIMERY has commenced cable installation activities. She is supported by ROSS CANDIES and J.D. ASSISTER. Seaway Aimery will lay cables, J.D. Assister will bury cable, both vessels will be Restricted in Ability to Maneuver. One or more safety vessels will monitor unburied or potentially unburied cable; mariners should avoid bottom contacting activity in these locations.

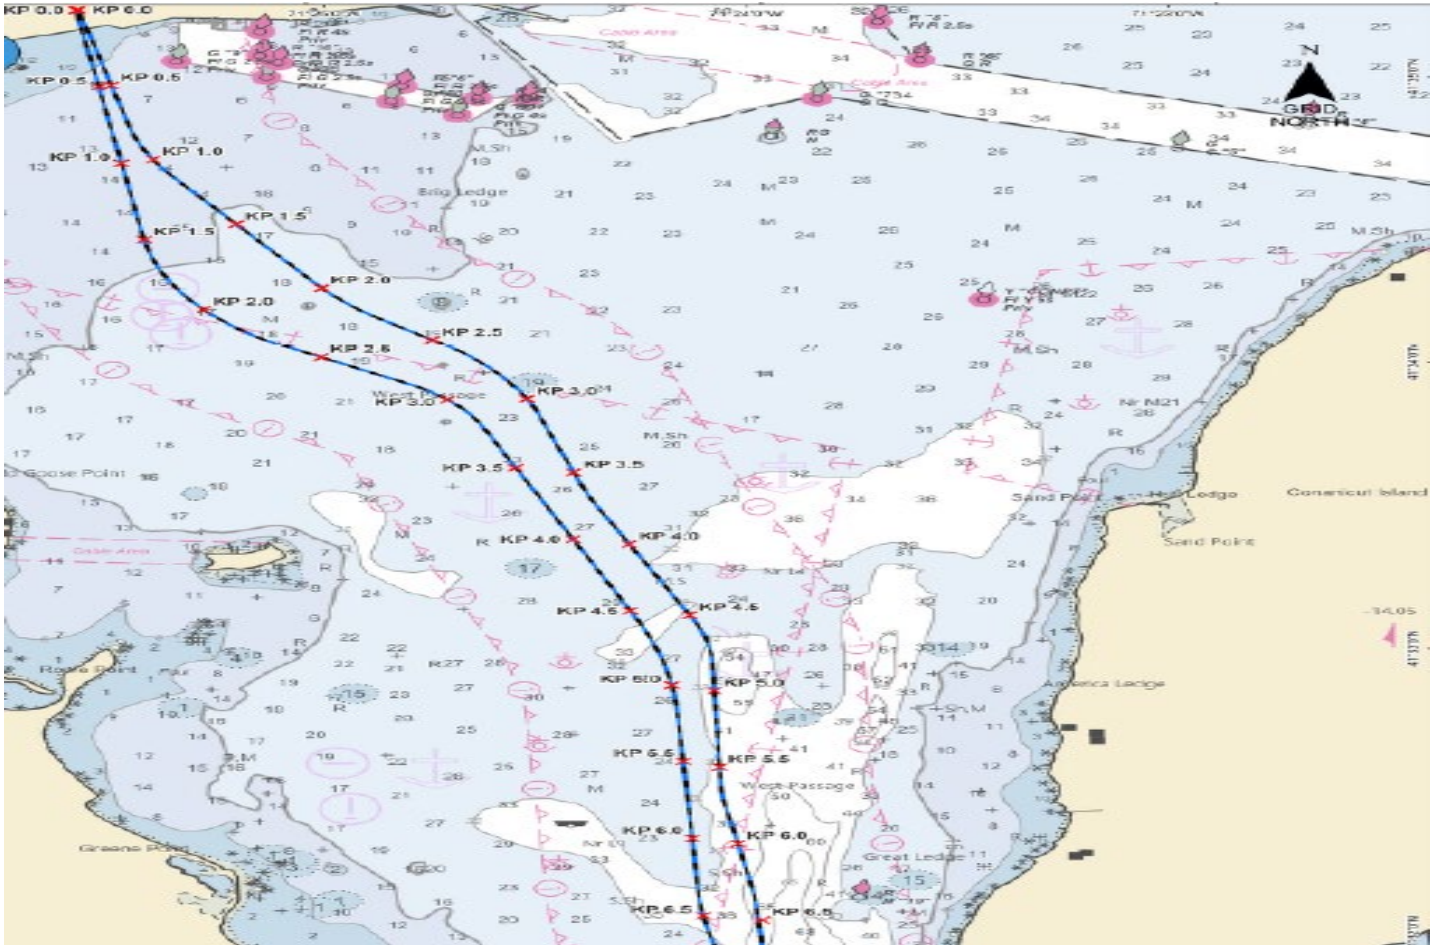

This week, the Seaway Aimery will be likely be installing the following cables: **AJ13-AJ14, AG09-AH09, AK10-AL10, AK12-AL12, AL18-AL19, AL20-AL21, AM20-AM21, AM19-AM20, AM19-AM19, AN16-AL18, AP15-AP16, AG07-AG06, AJ03-AJ02**. The JD Assister is trenching and burying cables behind the Seaway Aimery. This week, the vessel will likely be at the following locations: **AE06-AE07, AE08-AE07, AE08-AE09, AE09-AE10, AJ11-AJ10, AP13-AP14, AJ13-AJ14, AG09-AH09, AK10-AL10, AK12-AL12, AL18-AL19, AL20-AL21, AM20-AM21**. As of **October 15, 2024, the following cables have been buried: AH09-AJ09, AJ11-AJ12, AJ12-AJ18**

Encl 3

The Wind Turbine Installation Vessel (WTIV) SCYLLA is installing turbine towers, nacelles, and blades via a feeder barge system from New London. Barge 455-8 and Tugs SAM and OCEAN WIND will support. PAUL CANDIES will support commissioning works. USCG SAFETY ZONES may be enforced around the turbine location undergoing installation, continuing into **Spring 2025**

Nearshore cable route preparation the two (02) REVOLUTION WIND export cables.

Starting **September 16th**–**October 30th**, JFB 4123 BARGE and TUGS KODIAK and BUCKY will commence boulder clearing north of the Jamestown bridge towards Quonset, passing east of Fox Island, under the Jamestown Bridge, and ending near Dutch Island. The Barge may be “walked” into position with four anchors, marked by buoys, extending up to 1000ft from the barge. The Barge will conduct PLGR runs north of the bridge, with the tugs for propulsion. Lastly, in October, the barge will place tapered concrete mattresses over existing cables in Narragansett Bay, mostly south of the Jamestown bridge, to protect them from subsequent cable installation. During Mattress installation, the barge will be on its anchor spread. Mariners should transit with extreme caution in this area and avoid towing gear over the anchor cables. Work will continue overnight, including anchor deployment. M/V SORENSON MILLER and R/V MARC ROBERT may also be on scene; a USCG Safety Zone may be enforced.

R/V MARC ROBERT will survey the PLGR and Boulder relocation in Narragansett Bay work through **October**.

From early to mid-October, the SHEILA BORDELON is relocating boulders and conducting pre lay grapnel runs from the Jamestown Bridge to an area on the cable routes near the Brenton Reef Anchorage. The vessel may also conduct boulder clearance and pre-lay grapnel run north of the bridge and enter the Revolution Wind Lease Area. The Vessel is restricted in her ability to maneuver while conducting these operations.

The Trenching Vessel Deep Cygnus is conducting trenching trials along the Interlink Cable (between the two offshore substations). After trenching trials, the vessel will follow the Cable Laying Vessel Aurora for export cable trenching and burial. The Cable Laying Vessel Aurora is installing a test cable along the Interlink Cable Route and will install the Interlink Cable later this week. The vessel will then begin Revolution Wind Export Cable installation moving north from AF11 towards Brenton Reef Anchorage. Cables laid behind the CLV Aurora will be unburied. **Mariners should not conduct trawling/anchoring in the vicinity of unburied cables**, cables are not energized. Mariners should consult with Ørsted Marine Affairs and the vessel Fishing Liaison officers about how to site fixed fishing gear in the vicinity of the cables until buried and surveyed.

The Deep Cygnus will follow behind and conduct trenching – multiple passes of trenching may be required. Following trenching, a series of post-lay surveys will be undertaken. Mariners may consult Orsted Mariners' brief for up to date areas where cables are buried, and where bottom contacting activities are not at risk from/risk to potentially exposed cable.

Jack-Up Vessel Leviathan has arrived at anchorage near Newport, RI. On or around October 19, this vessel will travel to site and mobilize for installation of OSS2 (AF08).

ATLANTIC OCEAN-OFFSHORE RHODE ISLAND-SOUTH FORK WIND FARM PROJECT-Update 8/19/2024

South Fork Wind has concluded major construction. Minor vessel traffic is anticipated and will continue throughout project operations. The project's 13 towers include their permanent navigation lights and sound signals; AIS is not yet commissioned. Various scientific monitoring and fisheries research is ongoing in and near the wind farm, with a variety of fixed and mobile gear or equipment. TM Diligence will conduct survey of foundations in early **October 2024**. Researchers are encouraged to contact Ørsted Marine Affairs prior to: MANEP@Orsted.com. Charted features: South Fork Wind is on the NOAA chart. Mariners are encouraged to update their charting software. Plotter files are available free at us.orsted.com/mariners/. Available chart types include Loran-C coordinates, Garmin, TimeZero, P-SEA.

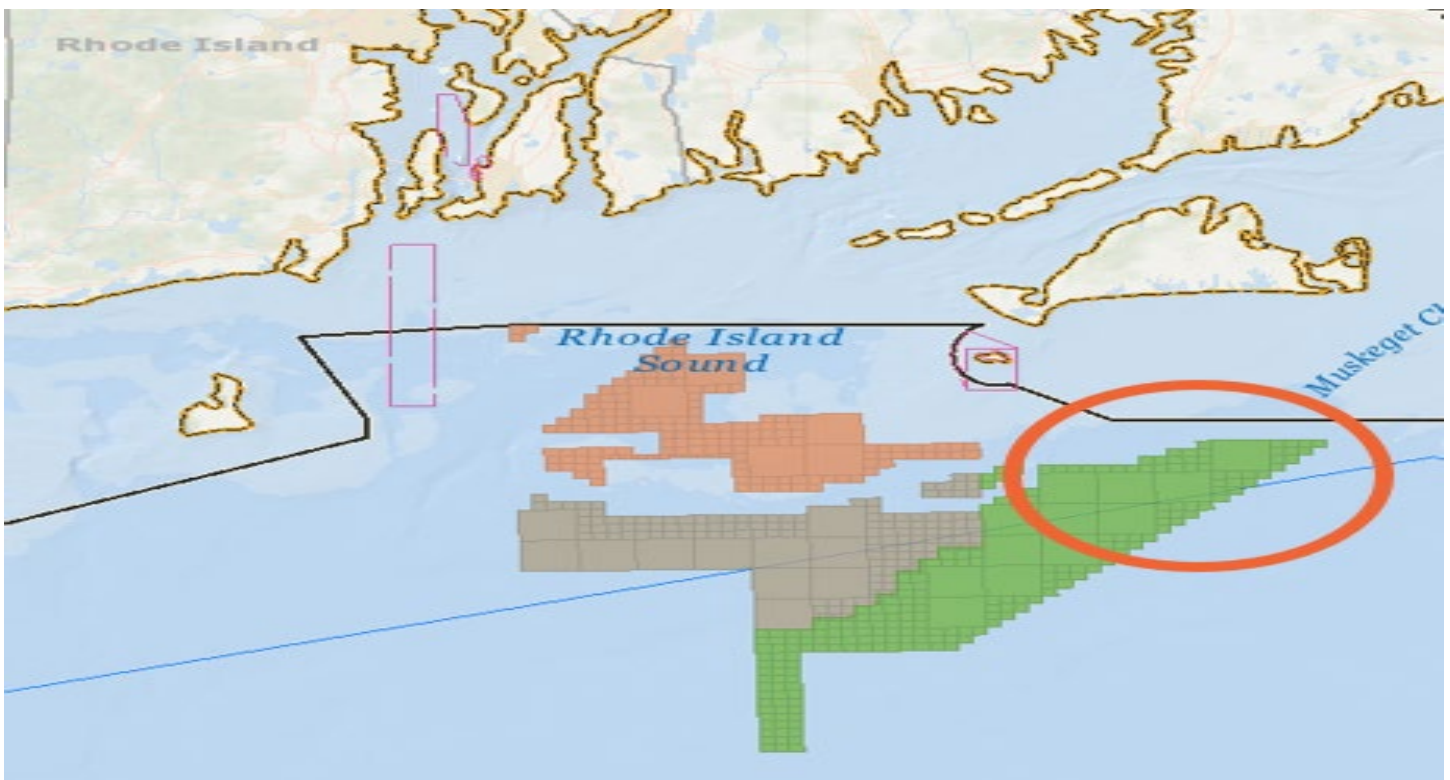

LNM 34/24

STARBOARD WIND-Update 9/17/2024

Orsted is commencing site investigation activities as part of its OCS Lease 500 (Bay State Wind) development. More information in the Orsted Mariners Brief, us.orsted.com/mariners. OCEAN MARLIN will commence geophysical survey work for STARBOARD WIND from **August 2, 2024, through end of December 2024 in Lease 500**. While towing survey arrays and conducting survey work the vessel will be Restricted in ability to Maneuver. Windserve Odyssey is conducting occasional survey in Narragansett Bay West Pass.

Beginning in **Aug 2024**, the Survey Vessel Bella Marine will operate in Narragansett Bay, especially in the West Pass, the waters near Prudence Island, and along a route to Brayton Point, MA, including offshore in Rhode Island Sound. Vessel will be Restricted in Ability to Maneuver and is available on VHF-FM CH 13 and 16.

A Geotechnical Survey Vessel, ALPINE SHEARWATER will commence work in early/mid-**October 2024** within Narragansett Bay. Survey work per the below chart, locations subject to change. ATLANTIC OCEAN-NEW YORK BIGHT

The vessel SHELIA BORDELON will be conducting boulder relocation with a grab, debris removal with a grab, pre-lay grapnel runs (PLGR), and multibeam survey operations along the Empire Wind submarine export cable corridor between the state water boundary (3 nautical mile limit) and the lease area in the New York/New Jersey Bight. The work is performed adjacent to the Ambrose channel, within the precautionary area for traffic, within a traffic separation zone, and crossing the Ambrose to Nantuxet Traffic Lane. Operations will commence on or about **October 25, 2024, until approximately November 30, 2024**, and will be conducted 7 days per week, 24 hours per day. The vessel will be restricted/limited in her ability to maneuver. Boulder positions after relocation will be available shortly after relocation. During PLGR operations, SHELIA BORDELON will be towing a grapnel train over the seabed extending a maximum of 150m (500 feet) behind the vessel. The speed of the vessel will not exceed 1 knot during the PLGR operation. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

SUNRISE WIND-Update 8/19/2024

Notice - Sunrise Wind Commencing Activities in New York State Waters. As part of the sea-to-shore transition of the export cable, Sunrise Wind will install a temporary pier at Smith Point Park Intercoastal Waterway. Pier construction will take about a month to complete. Sunrise Wind will use several transport barges to move equipment to and from Smith Point Marina to the temporary pier. Work in Sunrise Wind's nearshore cable landfall area will be located approximately 1,320 feet off the shoreline. A liftboat and a support vessel will work in the nearshore area from as early as **November 15th thru January 2025**. Crews will use a common technique known as horizontal directional drilling (HDD) that allows us to drill deep under the beach without disturbing its surface. It also allows us to maintain public access to the beach throughout the construction process. The temporary pier will be removed on or about **May 1, 2025**.

LNM 35/24

BLOCK ISLAND WINDFARM-Update 10/1/2024

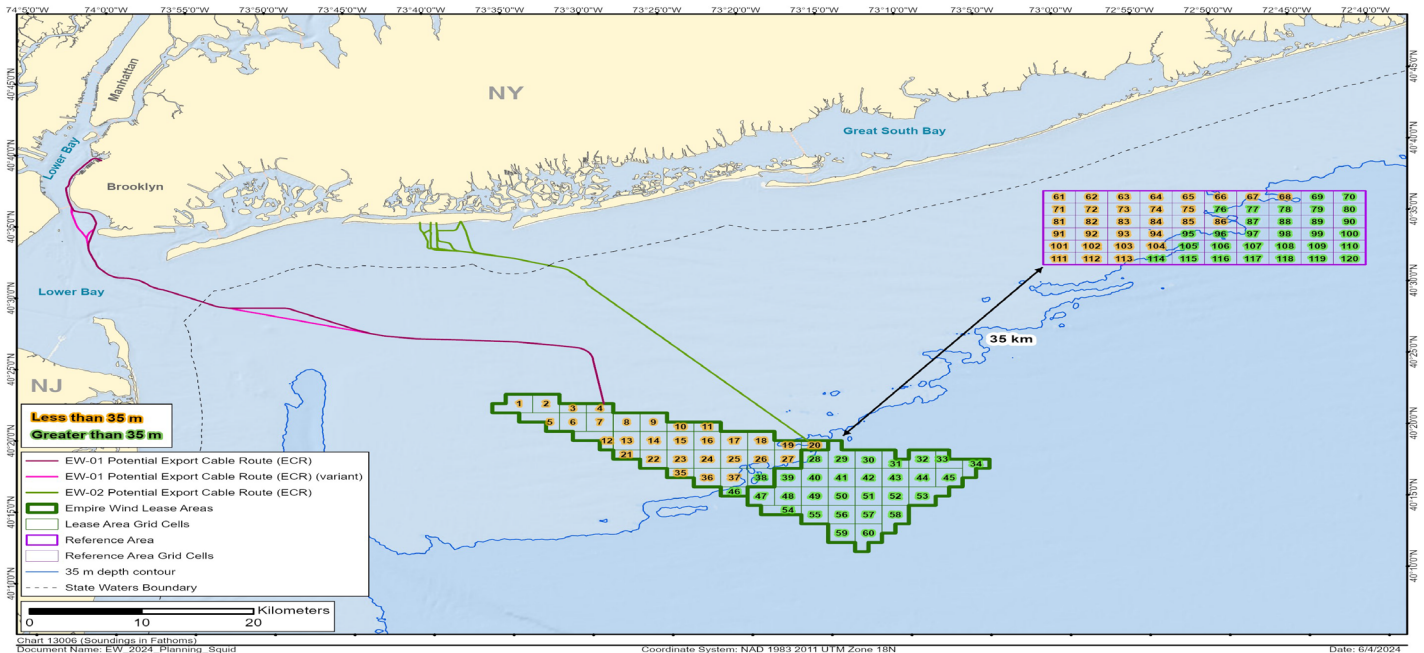

TM Diligence will conduct survey of foundations in mid-**October 2024**. Commencing mid-**October 2024 through January 2025** planned maintenance will be undertaken at Block Island Windfarm Tower 5, 41-06-23.000N 71-32-15.540W. The Jack Up vessel ARIES MARINE RAM XII will be lifted with its legs on the seabed. For both the ARIES MARINE RAM XII's safety and that of the public, it is imperative that vessels not pass under the jacked-up vessel, and vessels should not allide with the legs of RAM XII. RAM XII will be serving as an accommodation vessel for work on B5, with a risk of dropped objects as tools and large equipment are moved. The vessel will monitor VHF 16/13.

LNM 35/23

ATLANTIC OCEAN-NY BIGHT-Update 9/30/2024

INSPIRE Environmental will be conducting bottom trawl fisheries surveys in the Empire Wind Lease Area, between 40° 20' 50.7834N, 073° 32' 0.3618W & 40° 19' 38.7798N, 073° 20' 1.053W) and Reference Area (40° 33' 32.4282N, 072° 51' 45.2736W) from **August 19, 2024, to October 9, 2024**. Equipment on scene will be the F/V Susan L, monitoring VHF-FM CH 13 and 16 for any concerned traffic. The vessel will be towing bottom trawl gear at 4 stations within the Lease Area, as well as 4 times at the adjacent reference site (see Figure 1); these stations are not yet determined. Each tow will last 20 minutes in duration. During these times, the vessel will be moving at 4kts or less and have decreased maneuverability.

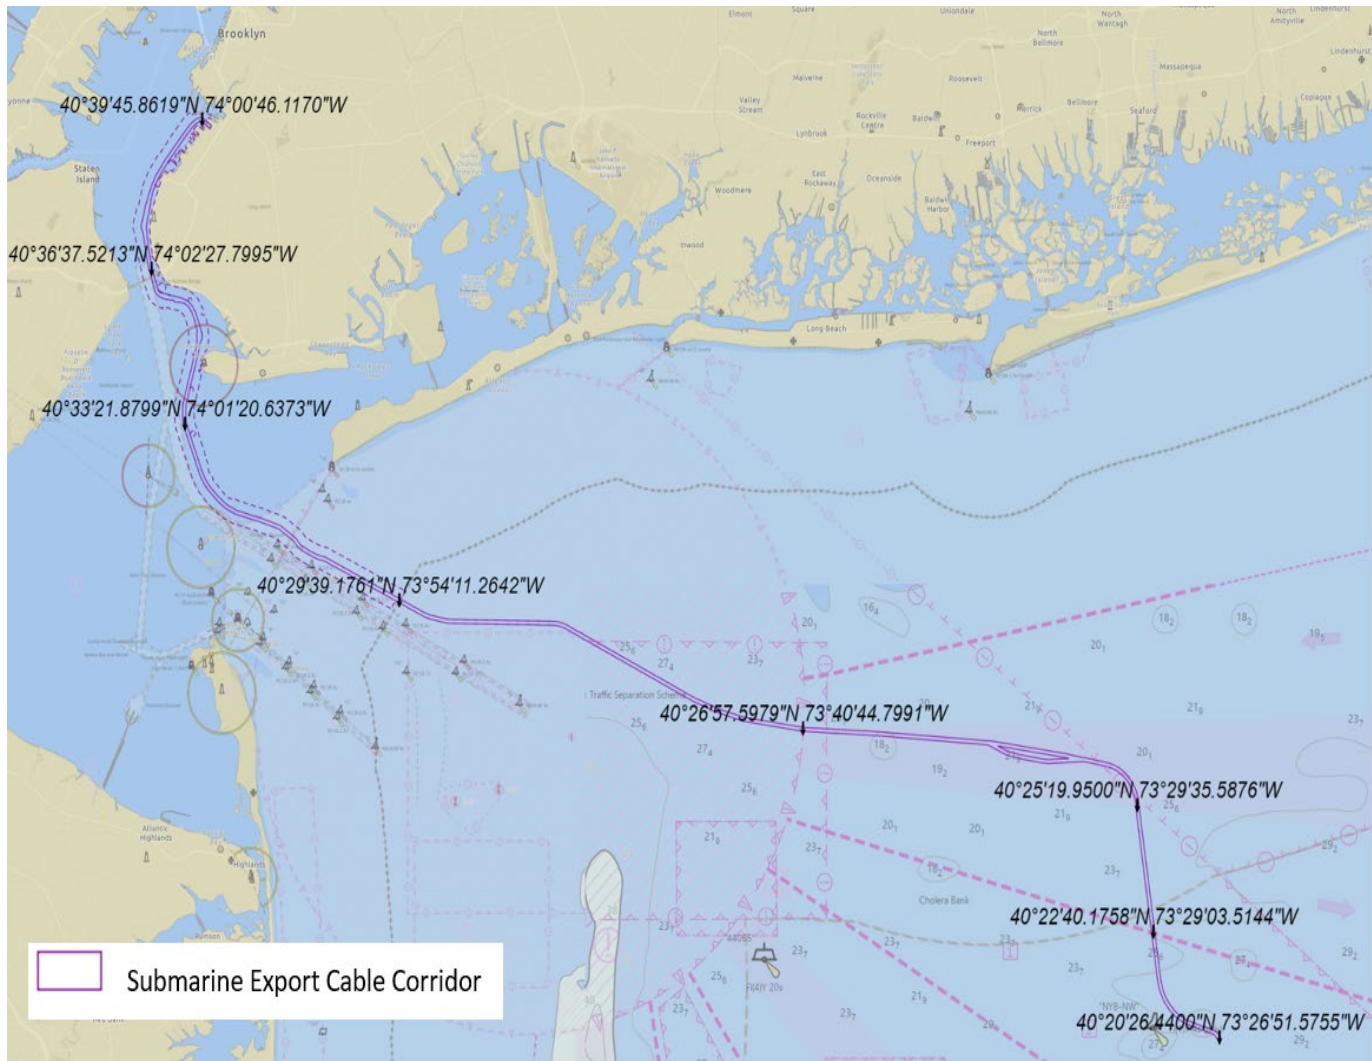

LNM 33/24

NY-NEW YORK HARBOR- THE NARROWS-GRAVESEND BAY-NEW YORK BAY, NEW YORK/NEW JERSEY BIGHT

The vessel SHELIA BORDELON will be conducting boulder relocation with a grab, debris removal with a grab, pre-lay grapnel runs (PLGR), and multibeam survey operations along the entire Empire Wind submarine export cable corridor between Gowanus Bay in New York Harbor and the lease area in the New York/New Jersey Bight. A large portion of the work will be performed in Bay Ridge Channel, and the Narrows east of the Ambrose/Anchorage channel in proximity to the Verrazano-Narrows bridge tower. Outside of New York Harbor, the work is performed adjacent to the Ambrose channel, within the precautionary area for traffic, within a traffic separation zone, and crossing the Ambrose to Nantucket Traffic Lane.

Operations will commence on or about **July 28, 2024, until approximately October 30, 2024**, and will be conducted 7 days per week, 24 hours per day. The vessel will be restricted/limited in her ability to maneuver. Boulder positions after relocation will be available shortly after relocation. During PLGR operations, SHELIA BORDELON will be towing a grapnel train over the seabed extending a maximum of 150m (500 feet) behind the vessel. The speed of the vessel will not exceed 1 knot during the PLGR operation. Equipment on scene will be monitoring VHF-FM CH 16 for any concerned traffic and is requesting a 30-minute notice for any vessel movement requests. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

ATLANTIC OCEAN-SOUTH OF LONG ISLAND-BOEM LEASE AREA OCS-A 0544

Geoquip Marine USA, Inc. will be conducting offshore windfarm, soil boring surveys in the BOEM Lease area OCS-A 0544 from **May 16, 2024, to December 30, 2024**, 24 hours a day. Equipment on scene will be the vessel GEOQUIP SPEER, standing by on VHF-FM CH 16 for any concerned traffic and is requesting a 1 nautical mile separation wherever possible during survey operations. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

LNM 19/24

ATLANTIC OCEAN-NJ COAST-BOEM LEASE AREA OCS-A-0544

Geoquip Marine will be conducting geotechnical and soil boring site surveys in the BOEM Lease No. OCS-A 0544, from **February 15, 2024, to October 30, 2024**, 24 hours a day, seven days a week. Equipment on scene will be the GEOQUIP SAENTIS and DINA POLARIS with associated subsea drilling and testing equipment, monitoring VHF-FM CH 16 for any concerned traffic and request a 1NM separation wherever possible from other vessels and vessel will require 24-hour notice to relocate as drilling equipment will need to be recovered. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

Monmouth University will be deploying, fish monitoring, oceanographic instruments in New York Harbor and New York Bay, (see chart below). The instruments will be weighted to the ocean floor. Mariners are advised to use caution when transiting the area.

ATLANTIC OCEAN-COMMONWEALTH WIND-OSC-A 0534

Avangrid Renewables was informed by its contractor that an 11 m length of coiled rod, seismic cone, and 2 sections of casing were lost in the seafloor, in position 40-52-59.905N 070-43-19.333W. The loss occurred on **August 23, 2022**, while performing routine geotechnical surveys (cone penetration testing) in Lease OCS-A 0534. The available evidence suggests that the marine debris is 0.78 m below the seabed. There are no hazardous materials or oil within the debris. Therefore, the lost gear is not reasonably recoverable and should not interfere with other OCS uses or the environment.

NOTICE OF PROPOSED RULEMAKING – Portal North Bridge, Hackensack River - The Coast Guard proposes to modify the operating conditions of the Amtrak Portal Bridge across the Hackensack River, mile 5.0, at Little Snake Hill, New Jersey. This action is necessary to facilitate the construction of the new replacement Portal Bridge North, adjacent to the current Amtrak Portal Bridge. This proposed rulemaking would limit the extent of the opening of the Amtrak Portal Bridge in the horizontal position to prevent the swing span from striking the new Portal Bridge North during construction. Comments and related material must reach the Coast Guard on or before **November 4, 2024**. You may submit comments identified by docket number USCG-2024-0412 using the Federal Decision Making Portal at <http://www.regulations.gov>. Information is available in the Federal Register Notice at [Federal Register :: Drawbridge Operation Regulation; Hackensack River, Little Snake Hill, NJ](#).

TEMPORARY INTERIM RULE – Meadowbrook State Parkway Bridge, Sloop Channel. The Coast Guard is temporarily modifying the operating schedule that governs the Meadowbrook State Parkway Bridge across Sloop Channel, mile 12.8, at Nassau County, NY. The bridge is currently operating under single leaf openings to complete a bridge rehabilitation; however, during repairs, the Meadowbrook State Parkway Bridge experienced electrical failure in the submarine cables. Until the bridge repairs are complete the bridge openings must be minimized. Full text of the Rule can be found at [Federal Register :: Drawbridge Operation Regulation; Sloop Channel, Nassau County, NY](#)

TEMPORARY DEVIATION – Marine Parkway Bridge, Jamaica Bay - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the Marine Parkway Bridge across Jamaica Bay at mile 3.0 to accommodate bridge rehabilitation. Under this temporary deviation beginning August 26, 2024 until **October 31, 2024**, the Marine Parkway Bridge, will require a 2-hour advance notice Monday through Friday from 8am to 4 pm. Questions may be directed to Aiman Youseff at (718) 692-5524. Mariners that can pass without a bridge opening may do so and are advised to exercise caution when transiting the area.

TEMPORARY DEVIATION – Loop Parkway Bridge, Long Creek - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the Loop Parkway Bridge across Long Creek at mile point 0.7. The deviation is needed to perform bridge deck repairs. Under this temporary deviation, the Loop Parkway Bridge may operate under single leaf operations from September 23, 2024 through **November 1, 2024**. For any questions or concerns mariner may contact Stephen Missing at (631) 813-2266. Mariners are advised to exercise caution when transiting the area.

TEMPORARY DEVIATION – Meadowbrook State Parkway Bridge, Sloop Channel - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the Meadowbrook Parkway Bridge across Sloop Channel at mile point 12.8. The deviation is needed to perform bridge repairs. Under this temporary deviation, the Parkway Bridge may operate under single leaf operations from September 23, 2024 through **November 1, 2024**. For any questions or concerns mariner may contact Stephen Missing at (631) 813-2266. Mariners are advised to exercise caution when transiting the area.

TEMPORARY DEVIATION- Route 82 (East Haddam) Bridge, Connecticut River - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the Route 82 Bridge across the Connecticut River at mile 16.8. The deviation is needed to accommodate bridge rehabilitation operations. Under this temporary deviation, the Route 82, East Haddam Swing Bridge from September 24, 2024 until **October 31, 2024** bridge openings will be limited to the following schedule:

- No openings between 8 p.m. and 6 a.m.
- From 6 a.m. to 8 p.m. the bridge will open on its normal schedule:
 - o On signal for commercial vessels.
 - o On the hour for recreational vessels.

Vessels able to pass under the bridge in the closed position will be allowed to do so. Mariners are advised to exercise caution when transiting the area.

TEMPORARY DEVIATION – Grand Street Bridge, Newtown Creek - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the Grand Street Bridge across Newtown Creek at mile point 3.1. The deviation is needed to perform bridge maintenance. Under this temporary deviation, the Grand Street Bridge may be maintained in the closed to navigation position commence on Friday (09.20.2024) 8:00PM to Monday (01.13.2025) 5:00AM on the following days:

- September 20th 8:00 PM to September 23rd 5:00 AM

The USCG has approved the revised waterway restriction schedule during the erection of the bascule span girders, counterweight boxes, and four floor beams. A barge will be placed in the channel blocking the full channel width during these dates/times. Vessels and individuals are not authorized within the federal navigation channel during the full waterway closures during these dates/times.

The full waterway closure schedule is as follows:

September 16th at 6 a.m. to September 20th, 2024 at 6 p.m. – West Span

October 21, 2024 at 6 a.m. to October 25, 2024 at 7 p.m. – East Span (weather permitting).

November 4th at 6 a.m. to November 8th, 2024 at 6 p.m. – East Span (contingency plan for weather delays, etc.).

For the remaining bascule span work, the Shrewsbury River navigational channel will be partially/half closed.

The partial/half channel closure schedule is as follows:

Full width (75ft) with no restrictions from 4 p.m. on October 11, 2024 to 6 a.m. on October 21, 2024 (open to Marine Traffic).

October 25, 2024 at 7 p.m. to December 13th, 2024 at 6 p.m. – (East Half Closed, West Half Open to Marine Traffic).

December 16th, 2024 at 6 a.m., to February 20th, 2025 at 6 p.m. – (West Half Closed, East Half Open to Marine Traffic).

February 24th, 2025 at 6 a.m., to May 2nd, 2025 at 6 p.m. – (East Half Closed, West Half Open to Marine Traffic).

During the partial/half channel closure, a barge will be within the federal navigation channel under the span being erected, the width of the channel will be reduced to 37'-6", which is half the channel width. At that time, an advanced warning sign with a directional arrow stating "CAUTION CHANNEL WIDTH REDUCED TO 37.5 FT" will be posted.

The dates/times for this work may change due to weather delays and other unforeseen circumstances.

Updates will be provided, as they are available, in the D1 LNM and on the project website at

<https://www.rumsonseabrightbridge.com> and click on the Travel Advisory or Channel Info links at the top of the page.

To receive e-mail updates for this project select the "Contact Us" tab, then "E-mail List Sign Up" from the drop-down menu. Mariners are advised to exercise caution when transiting the area. The project will be completed by **March 17, 2025**.

New information highlighted in Yellow.

The Coast Guard advertises this information through local, Sector Broadcast Notice to Mariners (BNMs) and through the weekly, First Coast Guard District LNM. BNMs are additionally available directly to mariners by email sign-up at the CG Navigation Center Web Site ([Subscribe to Our RSS Feeds | Navigation Center \(uscg.gov\)](https://www.uscg.gov)). Once identified NOAA will then chart the UXO location so they are available on electronic navigation chart updates. Information on proper reporting and safety procedures for UXOs can be found [here](#).

Safety Zone: West Passage Narragansett Bay, Jamestown, RI

The Coast Guard is establishing a temporary safety zone for navigable waters within a 250-yard radius of the MARMAC 306 cable laying barge and the J.F. Brennan construction barge #4132. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards created by cable laying operations in the vicinity of the West Passage, Narragansett Bay, Jamestown, RI, from the Jamestown Verrazzano Bridge south to Dutch Island.

This temporary interim rule is effective from 12:01 a.m. on September 1, 2024, through 11:59 p.m. on December 31, 2024. The rule will only be subject to enforcement while the MARMAC 306 cable laying barge or the J.F. Brennan construction barge #4132 are engaged in cable laying operations.

The Coast Guard would make notice of each enforcement period via the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via VHF-FM channel 16 as soon as practicable in response to an emergency or hazardous condition.

Persons or vessels seeking to enter the safety zone must request authorization from Coast Guard Sector Southeastern New England Command Center by VHF-FM channel 16 or phone at 866-819-9128.

If you have any questions, concerns, or comments related to this bulletin, please email Sector Southeastern New England's Waterways Management Division at SENEWWM@uscg.mil or call (401) 435-2355.
