Kennedy Space Center) Bridge across the AICW (Indian River), mile 885.0, at Titusville, FL is being replaced. The bascule spans have been removed; the drawbridge operating regulation is no longer effective. The new high-level bridge is in place and provides a fixed vertical clearance of 66 feet at MHW and 125 feet between the new fender system. Orion Marine Construction, Inc. will be continuing the removal of the legacy NASA Causeway Bridge through November 12, 2025. Construction activities will be performed from several crane barges and deck barges within the vicinity of the bridge. Normal Operations are anticipated 10 hours per day, 6 days per week. Night work may be required. UPDATE 11/12/2024: Orion will continue to conduct girder erection until an expected completion date of November 15, 2024. Afterwards, Orion will commence installation of the fender system on the bridge. The Fender System installation will require a partial blockage of the channel resulting in approximately 70 available feet of horizontal clearance from 7 a.m. until 5 p.m. Monday through Saturday until an expected completion date of December 16, 2024. A 2-hour advance notice will be needed to clear channel. Orion has advised that it is preferred that any vessels requesting full navigation channel access during normal operation hours do so between the hours of 7 a.m. and 8 a.m. if practical. The construction vessels on the project will monitor channels 13, 16 and Working Channel 1. Mariners are urged to use extreme caution in the area, transit at their slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made. The replacement project is expected to be completed April 30, 2026. For further information contact: Frank Vallejo at (813) 894-8510, or Matt Bell at (251)-490-5158. DREDGE COMMODORE, DREDGE COMMANDER, TUG LIEUTENANT, TUG KYLE C, SURVEY/CREW VESSEL BAYOU BUFF, SURVEY/CREW VESSEL LIL JOHN, SURVEY/CREW VESSEL MR. SHOAL and various barges will begin dredging on or about March 25, 2025, after four weeks of waterside mobilization that will commence on March 1, 2025. Full waterside demobilization is scheduled to complete by May 15, 2025. AGD will establish a waterside staging area to secure the submerged pipeline barge within the permitted Sand Trap limits, on the southern edge of the dig template. Rafted pipeline and equipment will be staged in this location during the mobilization and demobilization phases of the work. AGD will also secure a heavy lift barge into the waters adjacent to the Ocean Inlet Park western shore for mobilization/demobilization of equipment and pipeline onto shore. The Cutter Suction Dredge Commodore is scheduled to commence dredging/beach fill operations on. Dredging operations will commence on or about March 25, 2025 in the ICW P-50 Cut borrow area located west of South Lake Worth Inlet to remove material and hydraulically place the material via submerged/floating/shoreline along Ocean Ridge Hammock Park, south of the inlet between Florida Department of Environmental Protection (FDEP) reference monuments R-154 and R-158. Operations in the ICW P-50 Cut will complete on or around April 5. The Dredge Commodore will then move to the eastern portion of the Oyer Park Boat Channel and work for approximately 3 days to complete on April 9, 2025. The Dredge Commodore will then move to dredge the Sand Trap for approximately 6 days. The Dredge Commander will commence dredging the western portion of the Oyer Park Boat Channel on April 10 and complete on or around April 25. All dredging/beach fill operations are scheduled to complete no later than April 31, 2025 All pipeline will be lit per USCG regulations. Periodic hydrographic surveys will be conducted within the dredge area and along the beach fill area. Dredging operations will occur 24hrs a day at 7 days a week. Survey operations will occur during daylight hours at 7 days a week. AGD requests vessels avoid the active dredge area during construction and proceed at slow speed in the area surrounding the dredge, pipeline and other support equipment and proceed with utmost caution in the dredging area. Please contact DREDGE COMMODORE and the DREDGE COMMANDER on VHF-FM channel 01 for passing arrangements, they will also be monitoring VHF-FM channels 13 and 16.

The waterside staging area is located on the eastern edge of Longboat Pass channel, east of Longboat Pass Bridge. Rafted pipeline and equipment will be staged in this location during the mobilization and demobilization phases of the work. The Cutter Suction Dredge COMMODORE is scheduled to commence dredging/beach fill operations on November 05, 2024. Dredging operations will remove material from Longboat Pass Channel borrow area located within the ebb shoal. Dredged material will be hydraulically placed via submerged/floating/shoreline along a 2,000 ft segment of the Longboat Key, FL, Gulf of Mexico shoreline at Gulfside Road. Dredging/beach fill operations are scheduled to complete on or around January 30, 2025. Full waterside demobilization is scheduled to complete by February 9, 2025. All pipeline will be lit per USCG regulations. Periodic hydrographic surveys will be conducted within the dredge area and along the beach fill area. Vessels should avoid the active dredge area during construction and proceed at slow speed in the area surrounding the Dredge, pipeline and other support equipment. Proceed with utmost caution in the dredging area. Vessels will be monitoring VHF-FM channels 13 and 16. Matanzas River Light 1 (LLNR 39035) will permanently be changed to Matanzas River Lighted Buoy 1 (LLNR 39035). Matanzas River Light 1 has been destroyed on a few occasions over the last 10 years and it is currently being advertised as destroyed since 2020. In addition, the water depth at its assigned position is 21 feet making it more difficult for a CG asset to spud and maintain position to rebuild the aid safely. Converting the light to a floating aid will allow for a timelier response and consistent maintenance in the event the aid becomes discrepant. Therefore, this change will provide mariners a more reliable signal while approaching the Matanzas River Channel entrance from the St. Augustine Inlet and while exiting the channel. In addition, shifting shoals and sand bars make the fixed aids unreliable and unable to be relocated to mark best water. These conditions make rebuilding the aids extremely challenging. All three of these aids are currently destroyed and have a temporary floating buoy on their assigned position. By permanently changing these aids to floating, it will allow CG assets to move the aids much easier to mark safe water. In addition, the floating aids can withstand the environmental conditions presented in this location better than the fixed aids. The new bridge will be built upstream of the existing swing bridge. The high-level fixed bridge now spans the navigational channel and provides a fixed vertical clearance 55 feet at Mean Low Water (MLW), 46 feet at Mean High Water (MHW). There will be in-water construction equipment in the vicinity of the bridges 24 hours a day. All in-water equipment is required to be lighted at night. The east channel will be available for navigation unless a channel closure is authorized by the Coast Guard. Mariners will be notified of any future changes to navigation. The project will commence November 1, 2022, and is estimated to be completed February 2025. For waterways questions, please contact the United States Coast Guard at (912) 247-0073. VHF-FM channel 16 will also be monitored for any concerned traffic. UPDATE 11/5/2024 - The demolition of existing bridge substructure and center pier of the remaining Houlihan Bridge is scheduled to commence from November 16, 2024, through January 31, 2024. During this period, the river will be closed for four hours for approximately seven non-consecutive days. A safety zone will be established, covering all navigable waters within a 1,000-yard radius of the Houlihan Bridge. If you plan to navigate through this area during the demolition, please contact the Scott Bridge company and attending safety patrol official Richard Greer at (334) 740- 0569 for coordination. Please exercise extreme caution while transiting through the demolition area as there will be construction equipment in the vicinity of the Houlihan Bridge 24 hours a day. All equipment will be properly marked for visibility and lights will be placed on the equipment at night. It is recommended that mariners monitor channels 13, 16, 21 and 22a on their VHF radios. The existing bascule bridge will be replaced with a higher-level fixed bridge. In-water work is expected to begin October 2023 and will continue through December 2026. A temporary work trestle will be installed oceanward of the bridge and will span the waterway except across the main navigational channel. The work trestle will provide only 5 feet of vertical clearance throughout the structure. The drawbridge will remain fully operational at this time. All mariners are requested to use extreme caution and proceed at slow speed when transiting Big Carlos Pass and remain in the main channel when proceeding through the bridge. All in-water equipment is required to be lighted at night. For further information please contact U.S. Coast Guard Sector St. Petersburg at 727-824-7506 or via email at D07-SMB-Tampa-WWM@uscg.mil. The operations are scheduled within a period beginning 3 p.m. February 26, 2025, to 8 a.m. March 8, 2025. A naval vessel will be conducting maneuvers between ¾ NM to 5 NM offshore, and from ½ NM south of the Port Everglades inlet to 2 NM south of the Dania Beach Pier. The vessel will be restricted in maneuverability and these operations are considered a hazard to navigation. All traffic must remain clear of the area bounded by the coordinates below for the duration of the operations. Local law enforcement, U.S. Navy security boats, and Tow Boat US small craft will provide security and range clearance for the naval vessel during these operations. Ships entering/departing Port Everglades are requested to do so from the northeast thereby avoiding the waters south of the channel. To allow for the safe operation of the naval vessel, all maritime traffic transiting the area is requested to stay 5 NM east of Port Everglades or inshore of the Barracuda Reef mooring buoys. Any concerned vessels may contact U.S. Navy Fort Lauderdale on VHF-FM channel 16.

This change calls to relocate (6) lighted buoys in the White Shells, St. Johns Bluff, Fulton Cutoff, and Blount Island Turning Basin channels of the St. Johns River. These relocations are needed as a result of channel deepening and widening, as part of the JaxPort expansion project. The position changes will allow safe navigation for vessels transiting the St. Johns River. The following aids to navigation are being proposed to be relocated to facilitate this change. All positions listed are approximate. Permanent positions will be advertised when the work is completed.	Lat: 30° 23' 32" Lon: -081° 29' 30"

Corporation, on behalf of the bridge owner, Florida Department of Transportation, will be replacing the Shands Bridge (SR 23) across the St. Johns River, mile 50.2, at Green Cove Springs. The project is scheduled to begin on October 2, 2023, and continue until an estimated completion date of September 1, 2030. The new bridge will consist of a vertical clearance of 65 feet and a 150-Ft. horizontal clearance at the navigation channel. Construction will require the use of material storage barges and barge-mounted cranes; all in-water equipment is required to be lighted at night. Work activities on the new bridge will include pier construction, girder erection, fender system installation, and overhead deck operations that could present a hazard to marine traffic. This phase will require periodic channel restrictions or short-term closures and is tentatively scheduled to take place in 2027. Short-term channel closures will also be required during the demolition of the existing structure tentatively scheduled to take place in 2029. The existing bridge will be removed except for approximately 800 LF on each end, which will remain and be converted to recreational fishing piers. Doboy Sound To Fernandina - St Simons Sound/ATON/Advanced Notice of Change	Advanced Notice of Change	Cedar Hammock RRL (LLNR 6200) will be permanently relocated to approximate position 31-05-58.956N/081-28-13.677W. The RRL will be changed to a day/night optic and continuing to display an Iso G 6s flash characteristic for a 24hr continuous cycle. The daymarks will be permanently discontinued. Cedar Hammock RRL Passing Light (LLNR 6200.1) will be permanently established by mounting (2) optics located on the NW and SE corners of the platform for Cedar Hammock RRL (LLNR 6200). The (2) optics will be synchronized and display a Fl W 2.5s flash characteristic during nighttime hours only, with a nominal range of 4NM. Due to the current location of Cedar Hammock RRL (LLNR 6200) being inaccessible for a CG asset to effectively repair the structure, it was determined by relocating both range structures it will not only offer an excellent range quality index for all mariners but be accessible to all CG assets to provide consistent maintenance to both structures. The work will be ongoing from August 23, 2024, with an estimated completion date of December 31, 2024, from approximately 2,000 feet north of the Colonels Island Range Front Light (LLNR (6330) to St Simons Sound Lighted Buoy 19 (LLNR 6140). The dredge will also continue into the East River on the east side of Andrews Island. The pipeline will extend from the dredge to the Andrews Island Disposal Area. All mariners are requested to stay clear of the dredge, pipelines, barge, derricks, and operating wires about the dredge. All operators should be aware that the dredge and pontoon lines are held in place by cables, which are attached to anchors some distance from the dredge and pontoons. Buoys are attached to the anchors so that they may be moved as the dredge moves. Submerged lines should be avoided. Mariners are requested to exercise extreme caution when approaching, passing, and leaving the dredging plant. The dredge NEWMARKET monitors VHF-FM channels 13 and 16. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Owners and lessees of fishnets, crabpots and other structures that may be in the vicinity and that may hinder the free navigation of attending vessels and equipment must remove these from the area where tugs, tender boats and other attendant equipment will be navigating. Dredging operations will be conducted twenty-four hours a day seven, days a week, all fishnets, crab pots and structures in the general area must be removed prior to commencement of any work, a slow NO WAKE speed is requested of transiting vessels. All vessels are requested to contact the dredge prior to passing.

The nominal range permanently reduced from 5NM to 4NM. The current nominal range of 5NM is not necessary. Based on the design of the Short-Range Aids System (SRA), mariners should be able to see two lighted aids to navigation forward of the aid from which they are alongside. Based on this data, a nominal range of 4NM is more than adequate.	Lat: 31° 52' 19" Lon: -081° 04' 34"

Wadmalaw River DBN 87 (LLNR 34890) and Wadmalaw River DBN 96 (LLNR 34920) will be changed to Wadmalaw River Buoy 87 (Same LLNR) and Wadmalaw River Buoy 96 (Same LLNR). Both aids to navigation are currently destroyed and have a Temporary Unlighted Buoy on station. Both assigned positions are presenting depths of over 28 feet. This depth makes it impossible for a CG asset to rebuild the structures. Changing the aids to navigation from fixed to floating allows the CG primary servicing unit the flexibility to relocate the aid to mark safe water.
