SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtfts, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: 02-19

GPS TESTING

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

LNM: 07-19

USACE - NEW REGULATORY REQUEST SYSTEM (RRS) ONLINE PERMIT APPLICATION PORTAL

The U.S. Army Corps of Engineers announced that the new national online application portal and management platform, known as the Regulatory Request System (RRS), now includes an electronic submission option for permit applications. This platform has been introduced to modernize the USACE permit application process and to address users' expectations by providing a straightforward and transparent process for the submittal of permit requests. For additional information or to provide feedback on RRS, please contact the USACE using the following email: <mailto:rrs@usace.army.mil>

LNM: 21-24

HIGH/LOW WATER FLOW CONDITIONS

During periods of high/low water flow conditions on the Mississippi River System, Captains of the Port, will issue Safety Advisories for their specific areas of responsibility via Broadcast Notice to Mariners. Mariners are encouraged to monitor the Sector Broadcast Notice to Mariners to ensure they are receiving the most up-to-date information.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". Canceled charts do not meet U.S. Coast Guard carriage requirements. A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: <https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>.

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LOWER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY

The U.S. Coast Guard COTP Ohio Valley has issued a low water Safety Advisory between approximate Miles 953.8 and 869.0. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation. The U.S. Coast Guard COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, recommend the following limits for tows:

Transiting southbound between Miles 953.8 and 869.0

Drafts no greater than 11.6 feet.

Barges to be configured no more than 6 wide total.

Transiting northbound between Miles 953.8 and 869.0

Drafts no greater than 10.0 feet.

Barges to be configured no more than 6 wide total, and loaded barges no more than 4 wide.

Barges currently in the system, with drafts greater than the advised depths, should be placed as near to the center of the tow as possible. Mariners are requested to contact U.S. Coast Guard Sector Ohio Valley via VHF-FM Channel 16 or at (502) 779-5425, to report areas of shoaling, hazardous conditions or missing aids to navigation.

LNM: 42-24

MONONGAHELA RIVER - CHANNEL CONDITION/SAFETY ADVISORY

The U.S. Coast Guard COTP Pittsburgh has issued a low water Safety Advisory between approximate Miles 41.5 and 23.8. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation. The U.S. Coast Guard COTP Pittsburgh recommends the following limits for tows:

Transiting between Miles 41.5 and 23.8

Drafts no greater than 9.0 feet with barges configured in a single string.

Drafts no greater than 8.0 feet with any other barge configuration.

Mariners are requested to contact the U.S. Coast Guard via VHF-FM Channel 16, or at (412) 670-4288, to report areas of shoaling, hazardous conditions or missing aids to navigation.

U.S. COAST GUARD NAVIGATION CENTER (NAVCEN) LOCAL NOTICE TO MARINERS/LIGHT LIST CHANGES - UPDATE

The U.S. Coast Guard Navigation Center announces upcoming changes to the Local Notice to Mariners (LNM) and the Light List, as part of our efforts to modernize and improve the accessibility, accuracy, and overall user experience for mariners and other stakeholders.

What Is Changing?

1. Transition From Paper Charts: In January 2025, NOAA will discontinue the production of all paper charts. In alignment with this change, the Coast Guard will transition from using NOAA Paper Chart Numbers and Editions/Dates for disseminating Marine Safety Information (MSI) to using Official Waterway Names.

2. How You Will Access LNM and Light Lists: The LNM and Light List data will now be available in a geospatial format, which will allow you to visualize information interactively on a map/chart. You can use your mouse wheel or the +/- buttons in the upper left portion of the screen to zoom in or out and navigate to your desired area on the map/chart. Once the area is displayed, you can generate a PDF of the LNM or Light List for that specific area, which you can then save and/or print. Alternatively, you can use a fillable form on our website to select your waterway by name from the Light List and generate the LNM or Light List.

3. LNM and Light List Data Refresh Rate: LNM data will be refreshed every fifteen minutes. Light List data will be refreshed every 24 hours. This will give you a much more up-to-date operating picture, designed to enhance your efficiency and improve safety in your area of transit or planned routes.

4. Elimination of Weekly Files: Weekly LNM, Weekly Light List Correction Files, Daily Discrepancy Files, and the Summary of Light List Changes will no longer be published to focus on providing the most up-to-date and accessible format. In the near future, we will also publish an Application Programming Interface (API) for interested parties to access the data externally.

Why Are These Changes Being Made?

The modernization of MSI delivery is designed to improve the U.S. Coast Guard's aid-to-navigation data management and dissemination capabilities. By providing frequent updates, geospatial visualization, and digital access, we hope to achieve our goals of:

- Enhancing Maritime Safety: By delivering the most current and precise information, mariners can make better-informed decisions, reducing the risk of accidents and ensuring safer navigation.

- Improving Accessibility: The shift to geospatial visualization makes it easier for all users, from commercial mariners to recreational boaters, to stay informed.

- Increasing Efficiency: The integration of LNM and Light List data into a geospatial format to simplify the gathering of safety information and facilitate easy route planning.

When Will These Changes Take Effect?

The transition to the modernized LNM and Light List platform (the Navigation Center website) will be completed by Monday, October 21st.

How to Access the New Features?

Starting October 21st, 2024, you will be able to access the updated Local Notice to Mariners (LNM) and Light List through the NAVCEN website, with a User Guide available to assist you. While legacy versions of these products will no longer be produced or posted after October 31st, previously available versions will remain accessible for download indefinitely. Additionally, users can now generate updated LNMs in real time, with data refreshed every 15 minutes.

For any questions or assistance, please visit our Contact Us page, select 'LNMs or Light Lists' from the Subject dropdown, and submit your inquiry. Thank you for your continued support as we work to enhance the safety and efficiency of maritime navigation.
