Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Hazards To Navigation/Wrecks	Hazards To Navigation	General/Hazards To Navigation/Wrecks NEW YORK - LOWER BAY - AMBROSE CHANNEL BUOY #8 - MARINERS ARE ADVISED THAT A VESSEL IS SUBMERGED IN THE VICINITY OF AMBROSE CHANNEL BUOY #8. THE VESSEL IS REPORTED TO BE 185 FEET OUTSIDE OF THE CHANNEL IN APPROXIMATE POSITION 40 30' 20.78" N, 73 57' 02.35" W AND IS MARKED WITH A FLASHING STROBE AND TWO WHITE FENDERS. ALL MARINERS ARE ADVISED TO TRANSIT THE AREA WITH CAUTION.	Lat: 40° 30' 21" Lon: -073° 57' 02"
General/Hazards To Navigation/Obstructions	Hazards To Navigation	General/Hazards To Navigation/Obstructions From: 2025-11-04 To: 2026-01-27 Location: 40-34-13.908N/074-01-01.992W Nexans will have a temporary weather buoy in the water to help facilitate cable lay operations. Buoy Details: Color: Yellow Height above waterline; approx. 20" Diameter: 30" Lighting: Fl 4s 1.0 (yellow 1s light every 4 seconds) Location: 74°1.03333'W 40°34.23333'N	Lat: 40° 34' 14" Lon: -074° 01' 02"
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-10-23 To: 2026-01-01 The cable lay vessel CALYPSO will be conducting cable installation and survey operations with a remotely operated vehicle. The work will be performed along the OCS-A 0512 submarine export cable corridor between the State water boundary (3 nautical mile limit) north of the Ambrose channel to the lease area in the New York/New Jersey Bight. The work is performed adjacent to the Ambrose channel, within the precautionary area for traffic, within a traffic separation zone, and crossing the Ambrose to Nantucket Traffic Lane. CALYPSO will also perform cable jointing operations at approximately the State water boundary (3 nautical mile limit) north of the Ambrose channel where it will remain stationary for approximately 1 week. Operations will commence on or about October 23, 2025 until approximately December 31, 2025 and will be conducted 7 days per week, 24 hours per day. The vessel will be restricted/limited in its ability to maneuver. During operations, the remotely operated vehicle may operate as far as 150m (500 feet) away from the host vessel with a power and communications umbilical running between the vessel and the remote vehicle. CALYPSO (cable lay vessel) will be restricted in its ability to maneuver during cable installation operations. Operations will be conducted along the submarine export cable corridor, Waypoints along the submarine export cable corridor: 40°29'39.17"N, 73°54'11.26"W (State water boundary / 3 nautical mile limit) 40°26'57.60"N, 73°40'44.80"W, 40°25'19.95"N, 73°29'35.59"W, 0°22'40.18"N, 73°29'03.51"W, 40°20'26.44"N, 73°26'51.58"W (Lease areas in New York/New Jersey Bight)The vessel's speed during cable installation will be approximately 0.5 knots or less, and will also be stationary for significant periods. Mariners are advised to use caution when transiting near CALYPSO and to make all inquiries on VHF-FM CH 13 and 14.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Blue Hill Bay Approach - Bass Harbor/General/MSIB	MSIB	General/MSIB From: 2025-09-30 To: 2025-12-06 Bass Harbor Head Light is Acadia National Park’s most visited site on the west side of MDI, with 180,000 annual visitors. Acadia NP acquired this property in 2020 from the US Coast Guard (USCG) and has worked to preserve this historical and natural landscape while improving visitor experience. The lighthouse serves as a functioning nautical beacon for Bass Harbor, and the former light keeper’s home serves as seasonal housing for Acadia’s Artist in Residence program. Despite the site’s high visitation rates, it does not currently meet NPS’ Accessibility Compliance priorities and prevents visitors with limited mobility to view the lighthouse. It is a park priority to allow for visitors of all abilities to view the lighthouse and learn about the history of the site. The Project Management Division (PMD) at ACAD has developed a three (3) phase plan to remove overhead electric from the site, demolish obsolete infrastructure, and improve the accessibility of the site for visitors by building a new lighthouse viewing terrace. Phase one (1) proposes to replace and relocate the existing electrical transformer (inside Radio Transmission building) and convert existing overhead electrical utilities to underground. A new ground-mounted transformer will be installed on the west shoulder of the parking lot. A new power meter and distribution panel will be installed within the garage. The total work area for the utility relocation phase is approximately 3100 sq.ft. (0.07 acres), all at grade or underground. All electrical infrastructure inside the light keeper’s home will remain as is, and all modifications will occur upstream of the current service entry point. This work is proposed to occur between October 6th, 2025 – November 1st, 2025. This phase is proposed to be completed by ACAD maintenance staff, a local electrician, and Versant Power. Phase two (2) proposes the demolition of the superstructure and foundation of the former USCG Radio Transmitting Building. This effort also includes the demolition/removal of non-historic appurtenances associated with the building, including underground utility pull-boxes, antenna foundations, screening fences, and abandoned debris (ladders, cabling, satellite dishes, and conduit). Completion of Phase 1 allows for the ability to completely remove all utility poles and overhead electric lines onsite, as well as the roof mast currently atop the Keeper’s House. Following demolition, the affected area will be backfilled with earthen to grade, and preliminary groundwork will be completed to prepare the path and footprint of the accessible viewing terrace. Light vista clearing (tree removal) will be included in this phase in preparation for the construction of the terrace. The total work area for this phase is approximately 800 sq.ft. (0.02 acres). The building demolition is proposed to occur between Oct 15th and Nov 21st . This phase is proposed to be completed by ACAD maintenance staff and trail crew. Upon completion of Phase 1 and 2, power will be reenergized by Versant. ACAD’s request for a 2-month beacon shutoff is aimed to accommodate for the physical completion of Phases 1 and 2, and account for the anticipated delay of Versant’s availability to come onsite to shutoff/reenergize power. ACAD PMD team will communicate regularly with USCG with updates on construction completion, extension needs, or early completion.

North Channel Saybrook To New Haven - Connecticut River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2025-05-08 To: 2029-12-31 Location: 41.31087778° N / 72.34920833° W Bridge Name: Amtrak Railroad Bridge CONNECTICUT – CONNECTICUT RIVER – From July 7, 2025, through December 30, 2029, AMTRAK will have moored barges in place during the construction and demolition of the Amtrak Connecticut River Bridge. Due to the placement of a temporary fendering system, the horizontal clearance of the bridge in the navigation channel will be reduced to 115 feet. Similarly, the placement of temporary signal cables overhead of the navigation channel will reduce vertical clearance to 100 feet above MHW when the bridge is in the open position. From October 1, 2025 to November 15, 2025, contractors will be performing dive operations to remove submarine cables from 0630-1830 Monday through Friday. From October 30, 2025 through October 31, 2025, dive operations are scheduled to take place in the navigational channel. Barges will be placed along the bridge fenders blocking the channel. Mariners are encouraged to avoid the channel while dive operations are taking place. However, mariners requiring passage must contact Michael King at (617) 653-7987 with a 2 hour advance notice to arrange transit through the work area. Mariners are advised to exercise caution and reduce wake when transiting the area. Mariners with questions or concerns can contact the contractor via marine radio VHF-FM Ch 13/16 or call Patrick Finley at (860) 806-2365 or Bob Nardi at (203) 496-7353. Hours of operation are from 6 a.m. to 4 p.m. weekdays. There will be a safety boat operating IVO the bridge. A 84ft navigation channel free of obstruction will be maintained at all times. For construction details please contact Jed Fitz, superintendent at 267-907-5932 or via marine radio VHF-FM 13/16. This project is to be completed by February 8, 2027. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 47' 60" Lon: -074° 04' 33"
Newark Bay - Hackensack River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2024-05-24 To: 2027-10-22 Location: 40.75346° N / 74.095153° W Bridge Name: Portal (N) Bridge Portal (N) Bridge Bridge replacement to the Portal Bridge North, across Hackensack River at mile 5.04 is in progress. Hours of operations are from Monday to Friday between 6:30 a.m. to midnight. There will be waterborne equipment blocking one draw of a swing bridge at a time and the other draw will be free and clear of any equipment for the passage of vessels. Mariners can contact one of the three (3) provided telephone numbers/emails or via marine radio VHF-FM CH 13/16 advising of travel through the channel (including possible return trips): 1. Martir Ortey – Main Span Project Manager – (562) 307- 4916, mortez@traylor.com 2. Jack Phillips – Main Span Superintendent – (347) 924- 5635, john.h.phillips@skanska.com 3. Jim Hummel – Main Span Area Lead - (917) 417- 4885, Jim.Hummel@skanska.com Skanska Traylor PNB JV has been awarded the construction of the New Portal North Bridge Project (NJT Contract No. 20-083X, WBS No. GC.02) with a Notice to Proceed of April 7, 2022. Specific to the Hackensack River work, mile 5.0, the project consists of constructing two bridge piers, demolition of the existing center pier north fender, erecting three tied-arch spans of approximately 400 LF (1,200 LF overall), and demolition of the existing bridge once railroad traffic is switched to the new bridge. The current status of the channels: East Channel – Open West Channel – Close The Coast Guard is modifying the operating schedule that governs the Amtrak Portal Bridge between the Hackensack River, mile 5.0, at Little Snake Hill, New Jersey. This action is necessary to facilitate the construction of the new replacement Portal Bridge North, as designed by Amtrak as the owner of the bridge, adjacent to the current Amtrak Portal Bridge. This final rulemaking limits the extent of the opening of the Amtrak Portal Bridge in the horizontal position to prevent the swing span from striking the new Portal Bridge North during construction as follows: The draw shall only open to 55 feet horizontal clearance in the east channel and the west channel will be closed to all navigation while the draw is open. Whenever any bridge opening is needed, contact one of the three (3) provided telephone numbers/emails above with 24-hour advance notice to allow the removal of any waterborne equipment from the East Channel that restricts the horizontal clearance to less than 55 feet. The draw need not open for the passage of vessel traffic from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. Additional bridge openings shall be provided for tide restricted commercial vessels between 7 a.m. and 8 a.m. and between 5 p.m. and 6 p.m., if at least a two-hour advance notice is given by calling the number posted at the bridge. At all other times the bridge shall open on signal if at least a 2-hour advance notice is given. Please be advised that the existing Portal Bridge east channel horizontal clearance (temporary fender) will be maintained at approx. 55ft and west channel horizontal clearance at 91ft until it's demolished, both with a closed swing bridge vertical clearance of 23ft. With a swing bridge opening, the vertical clearance increases to 50ft with the existing Portal Bridge east channel horizontal clearance (temporary fender) being maintained at approx. 55ft and west channel being closed. Mariners are advised to exercise caution when transiting the area. This project will be completed by October 22, 2027.	Lat: 40° 45' 12" Lon: -074° 05' 43"

Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2025-04-29 To: 2026-04-29 Location: 42.899° N / 70.8203° W 42.89746° N / 70.81608° W 42.89488° N / 70.80814° W 42.89251° N / 70.81105° W 42.89471° N / 70.817° W 42.8953° N / 70.82135° W 42.899° N / 70.8203° W Bridge Name: Hampton River New Hampshire 1A State Route Bridge Mariners are urged to exercise extreme caution when exiting or entering Hampton Harbor. All vessel traffic is restricted to the center span of the bridge due to work trestles which have been constructed alongside the existing Hampton Harbor Bridge, blocking the side channels. Mariners should anticipate strong currents in the marked navigation channel coupled with very shallow water just outside the marked channel and plan their transits accordingly. One way vessel traffic is strongly recommended with vessels transiting with the tidal current having priority. Larger vessels will be limited in their maneuverability and once committed to the passage will not be able to stop. Mariners unfamiliar with the area are encouraged to contact the Harbor Master on VHF-FM Channel 16 for transit guidance, as well as making a radio broadcast of their transit to facilitate safest passage.	
Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/General/LAA/RNA/Temporary Regulated Navigation Zone	LAA/RNA	General/LAA/RNA/Temporary Regulated Navigation Zone From: 2025-07-08 To: 2030-12-31 The Coast Guard is establishing a temporary regulated navigation area (RNA) and a safety zone on the Hampton River at the inlet to Hampton Harbor, Hampton, NH, in response to hazardous conditions created by construction activities for the Neil R. Underwood Seabrook-Hampton Harbor Bridge replacement project. This rule is necessary to provide for the safety of life in the areas undergoing demolition and construction. The RNA will be enforced from July 1, 2025, through December 31, 2030, and will establish the following operating restrictions on vessels: Nothing in this regulation relieves any vessel, owner, operator, charterer, master, or person directing the movement of a vessel, from the consequences of any neglect to comply with this part or any other applicable law or regulation (i.e. the International Regulations for Prevention of Collisions at Sea, 1972 (72 COLREGS) or 33 CFR part 84—Subchapter E, Inland Navigation Rules) or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case. Entry and movement within the RNA is subject to a “Slow-No Wake” speed limit. All vessels may not produce a wake and may not attain speeds greater than five (5) knots unless a higher minimum speed is necessary to maintain bare steerageway. Any vessel transiting through the RNA must make a direct passage. No vessel may stop, fish, moor, anchor, or loiter within the RNA at any time. Vessels may not pass (overtake) another vessel within the RNA. Only one vessel is permitted to pass through the center span navigational channel at any given time. Except when transiting through the center span navigation channel, no vessel or craft may operate within 20 feet of the bridge(s). The operator of any vessel transiting in the RNA must comply with all lawful directions given to them by the COTP or the COTP’s on-scene representative. viii) One-way traffic will flow northbound between the eastern side of the shallow waters and the Seabrook-Hampton Harbor Bridge. The northern side of the shallow area will accommodate one-way traffic moving west. The Safety Zone, includes all navigable waters within a 50-yard radius of the center point of the bridge, will be effective from July 1, 2025, through December 31, 2030, but will only be enforced during active construction within the main span navigational channel or other instances which may cause a hazard to navigation as determined by the COTP. The COTP will make notification of the exact dates and times in advance of each closure period of the safety zone to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency. The complete rulemaking is available under Federal Register docket number USCG-2025-0389 and can be accessed through the federal portal at https://www.regulations.gov/document/USCG-2025-0389-0001 We invite your comments on this rulemaking. To submit your comment online, go to https://www.regulations.gov, and insert “USCG-2025-0389” in the “search box”. Click “Search” and then click “Comment.” We will consider all comments received on or before October 6, 2025. If the project is completed before December 31, 2030, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/msi. For questions regarding this Marine Safety Information Bulletin contact Mr. Craig Lapiejko, Waterways Management at First Coast Guard District, telephone (571) 607-6314, e-mail: craig.d.lapiejko@uscg.mil. Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Boring and Core Samples	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2024-11-24 To: 2027-01-20 Weeks Marine will conduct soil mixing within a 110' Wide x 600' Long cofferdam for the Hudson River Ground Stabilization Program located West of Pier 66 from October 10th, 2024, to January 20th, 2027. The four corners of the cofferdam structures will be marked with flashing white lights at 4S. Additional white flashing lights will be added at every 30 feet of the structure. White reflective tape 6" Wide x 4' Long Minimum will be installed above the MHHW marker every 50 feet on the structure. Hours of operation are currently 12 HRS x 5 Days a week Monday through Friday. The Weeks 263 barge will be on the southern side outside of the cofferdam to support drilling operations within. The Weeks 263 barge has limited maneuverability and requires a tugboat to move the vessel. 24 Hour Minimum notice is required to facilitate the barge move. Weeks Marine is requesting all Mariners to use extreme caution and transit the working area at their slowest safe speed and use the western side of the navigable channel. Marine VHF Channel 13 / 16 / 67 will be monitored while onsite. Class A AIS will be set up on the Weeks Marine 263 Barge: AIS Vessel Name (WEEKS 263). 2 Material barges – the Weeks 244 and the Weeks 295/2900 – will be onsite tied up alongside the Weeks 263. The 263 Barge and Material Barges will be marked with Steady White Lights on all four corners of the barge. The Weeks 526 barge will be on the north side of the cofferdam to advance the cofferdam East. The 526 will remove piles from the west end, lay them down on a deck barge, shift to the east, and reinstall them. Hours of operations are 12 HRS x 6 Days a week Monday through Saturday. The Weeks 526 Crane Barge has limited maneuverability and will require a Tugboat to move the vessel. Marine VHF Channel 13 / 16 / 66 will be monitored while onsite. Class A AIS is set up on the Weeks 526 Crane Barge: AIS Vessel Name (WEEKS 526). 2 Material barges – the Weeks 2221 and the Weeks 2225 – will be onsite tied up alongside the Weeks 526. The Weeks 526 Crane Barge and Material Barges will be marked with Steady White Lights on all four corners of the barge. Starting on or about October 27th, 2025 the Weeks 61 barge will be on the South side of the cofferdam to place sand inside the cofferdam as well as remove obstructions ahead of the drilling operations. Hours of operations are 12 HRS x 6 Days a week Monday through Saturday. The Weeks 61 barge has limited maneuverability and requires a tugboat to move the vessel. 24 Hour Minimum notice is required to facilitate the barge move. Weeks Marine is requesting all Mariners to use extreme caution and transit the working area at their slowest safe speed and use the western side of the navigable channel. Marine VHF Channel 13 / 16 / 68 will be monitored while onsite. Class A AIS will be set up on the Weeks Marine 61 Barge: AIS Vessel Name (WEEKS 61). 1 Dump Scow will be onsite tied up alongside the Weeks 61. All barges will be marked with Steady White Lights on all four corners of the barge.

The 263 Barge and Material Barges will be marked with Steady White Lights on all four corners of the barge. The Weeks 533 barge will be on the north side outside of the cofferdam pull piles from the west, lay them on a deck barge, and then shift to the east to reinstall them. Hours of operations are 12 HRS x 6 Days a week Monday through Saturday. The Weeks 533 Crane Barge has limited maneuverability and will require a Tugboat to move the vessel. A 24-Hour Minimum notice is required to facilitate the barge moves. Class A AIS is set up on the Weeks 533 Crane Barge: AIS Vessel Name (WEEKS 533). 2 Material barges – the Weeks 2221 and the Weeks 2225 – will be onsite tied up alongside the Weeks 533. The Weeks 533 Crane Barge and Material Barges will be marked with Steady White Lights on all four corners of the barge. Marine VHF Channel 13 /16 / 66 will be monitored while onsite. The Weeks 61 barge is onsite, and the Weeks 573 crane barge will be onsite August 4th, 2025, on the east of the cofferdam to extract timber piles from the remnants of Pier 68 and 69. Divers will be used as part of this operation. The Weeks 61 will also be installing sheet piles on the south side of the cofferdam. Hours of operations are 10 HRS x 5 Days a week Monday through Saturday. The divers work will be consistent throughout these hours of operation. The Weeks 61 barge and Weeks 573 crane barge have limited maneuverability and require a tugboat to move the vessels. 1 Dump Scow will be onsite tied up alongside the Weeks 61. 2 Material Barges will be tied up alongside the Weeks 573, one of which will support the dive operations. All barges will be marked with Steady White Lights on all four corners of the barge. 24 Hour Minimum notice is required to facilitate the barge move. Marine VHF Channel 13 / 16 / 79 will be monitored while onsite. Class A AIS will be set up on the Weeks Marine 61 Barge: AIS Vessel Name (WEEKS 61) and the Weeks Marine 573 Crane Barge: AIS Vessel Name (WEEKS 573). Weeks Marine is requesting all Mariners to use extreme caution, transit the working area at their slowest safe speed, maintain a 200' buffer to structures and barges, and use the western side of the navigable channel. Aids to Navigation: Two white hazard/danger buoys ¼ mile north of the cofferdam and two white hazard/danger buoys ¼ mile south of the cofferdam are installed. All four of the buoys have white flashing lights.	
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-09-22 To: 2025-12-31 Hornbeck Offshore Services will be conducting post-lay and remedial mattress installation operations for the CHPE Project, on the Hudson River, between Inwood, NY to Kingston, NY. Operations will run from September 22, 2025, to December 31, 2025, 24 hours a day, seven days a week, between positions 40-52-43.18N, 073-55-46.61W; to 41-55-57.82N, 073-57-40.28W. Equipment on scene will be the MSV HOS Mystique, monitoring VHF-FM CH 13 and 16 and will be restricted in ability to maneuver during mattress installation. Each crossing should take approximately 1 to 2 hours. Remedial mattresses will be sequentially laid, taking approximately 20 minutes per mattress

Main Channel - Little Harbor/General/MSIB	MSIB	General/MSIB From: 2025-06-02 To: 2025-11-30 Effective June 1, 2025, The Sector Southeastern New England Command Center has fully transferred all phone communications to (866) 819-9128. The old telephone number, (508) 457-3211, will not be in service after August 1, 2025. Please ensure your contact information has been updated. We will continue to monitor VHF Channel 16. If you have any questions, please contact the command center at (866) 819-9128 or SECSENE@uscg.mil. Waterway restrictions and other decisions affecting the port are based upon weather forecasts, risk assessments, and preparations being made by port partners. In most cases, given ample warning of an approaching hurricane or tropical storm, vessels may be advised to put to sea or directed to an appropriate anchorage. In addition, cargo or fuel oil transfers are likely also to be suspended for brief periods. As necessary, Sector Southeastern New England will contact port partners to share information regarding pre-storm preparedness and post-storm response. As your organization reviews its plans, please feel free to contact the Waterways Management Division at SENEWM@uscg.mil if there are questions about the Coast Guard's role, plans, or policies regarding navigation restrictions or port closures during hurricanes and heavy weather. Near-real-time information regarding tropical weather, storms, and hurricanes can be obtained through the National Hurricane Center's (NHC's) Facebook page, Twitter account, and official website. Visit https://www.nhc.noaa.gov/ for more information and periodical updates. For immediate assistance during an actual hurricane, severe weather event, or other maritime emergency, contact the Sector Southeastern New England Command Center at (866) 819-9128.

Ambrose Channel - Main Channel/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2023-09-11 To: 2025-12-30 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge Lower – Level Deck Rehab – Repairs to the Verrazzano Narrows Bridge over New York Harbor at mile 0.0 will commence on September 11, 2023. This project includes milling, paving, cleaning, painting, steel repairs/replacement, and miscellaneous drainage/utility work throughout the bridge. From April 1, 2024 and November 30, 2024, a bridge traveler will be operated under the main span to perform repairs (weekends from 11 pm Friday night to 5 am Monday morning) and weekdays for inspection. The traveler will be moved out of the navigable channel after work hours or when not in use. Installation of safespan shielding will be installing under the approach span between Brooklyn Tower and Brooklyn Anchorage on or about February 29, 2024 through November 30, 2024. The safespan shielding will not reduce the vertical clearance by more than 5ft below the low steel or below the existing catwalks. Mariners requiring full vertical clearance in the main navigation channel with one hour advance notice can contact Scott Valente via marine radio VHF-FM Ch. 13/16 or call 732-337-7576. Any questions regarding the construction can contact resident engineer Jeff Sawyer at 317-439-0978. This project is to be completed by December 30, 2025. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 36' 22" Lon: -074° 02' 44"

Under this temporary deviation, the Glen Island Temporary Bridge will remain in the closed position from October 2, 2025 through April 29, 2026. Mariners that can pass without a bridge opening may do so and are advised to exercise caution when transiting the area.	Lat: 40° 53' 21" Lon: -073° 46' 57"

New Rochelle Harbor North Approach - Middle Channel/General/LAA/RNA/Temporary Regulated Navigation Zone	LAA/RNA	New Rochelle, NY - Long Island Sound – Safety Zone – Bridge Construction Mariners are advised that a safety zone will be enforced for construction work on the Glen Island Approach Bridge. The safety zone will be enforced from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The Safety Zone encompasses all waters within a line beginning at 40° 53' 18.58"N 73° 46' 56.26"W; thence to 40° 53' 22.08"N 73° 46' 59.39"W; thence north along the shore to 40° 53' 23.8"N 73°46' 57.51"W; thence to 40° 53' 19.15"N 73° 46' 52.54"W and thence south along the shore back to the point of origin (WGS 84). Vessels may not enter, remain in, or transit through the Safety Zone during the enforcement period unless authorized by the Coast Guard Captain of the Port. Other Federal, State and local agencies may assist these personnel in the enforcement of the Safety Zone. Mariners are urged to exercise caution while in the area. The anticipated dates for the windows of full channel closures: Date December 2, 2024, through December 20, 2024 February 3, 2025, through May 22, 2025 October 2, 2025, through April 29, 2026 Tentative Full Channel Closure Dates August 11, 2026, through August 17, 2026 October 2, 2026, through October 29, 2026	
New Rochelle Harbor North Approach - Middle Channel/General/LAA/RNA/COTP Restriction	LAA/RNA	General/LAA/RNA/COTP Restriction From: 2024-12-16 To: 2027-05-31 The Coast Guard is establishing a temporary safety zone for certain waters of Long Island Sound in the vicinity of the Glen Island Approach Bridge, New Rochelle, NY, for construction vessels and machinery involved in the rehabilitation project of the bridge. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with the bridge construction between December 2, 2024, through May 27, 2027. When enforced, this regulation prohibits persons and vessels from being in the safety zone unless authorized by the Captain of the Port New York or a designated representative. DATES: This rule is effective without notice from December 3, 2024, through 5 p.m. on May 27, 2027. For the purposes of enforcement, actual notice will be used from midnight on December 2, 2024, until December 3, 2024. This rule will only be enforced during periods when construction operations at the bridge are in progress. Comments and related material must be received by the Coast Guard on or before March 3, 2025. ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to https://www.regulations.gov , type USCG-2024-0956 in the search box and click "Search." Next, in the Document Type column, select "Supporting & Related Material." FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Jeffrey Yunker, Waterways Management Division, U.S. Coast Guard Sector New York; telephone 718-354-4195, email Jeffrey.M.Yunker@uscg.mil . IV. Discussion of the Rule This rule establishes a safety zone from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The anticipated dates for the windows of full channel closures are from 7 a.m. on December 2, 2024, through 5 p.m. on December 20, 2024; from 7 a.m. on February 3, 2025, through 5 p.m. on May 22, 2025; and from 7 a.m. on October 2, 2025, through 5 p.m. on April 29, 2026. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in advance of these scheduled closures. All these dates are tentative and subject to change due to weather, supply chain delays, or other unforeseen circumstances. This rule remains effective through May 27, 2027, in case the project is delayed due to unforeseen circumstances. The area regulated by the safety zone will encompass the waters around the Glen Island Bridge and will cover all navigable waters, from surface to bottom, within the area formed by connecting the following latitude and longitude points in the following order: 40°53'18.58" N 73°46'56.26" W; thence to 40°53'22.08" N 73°46'59.39" W; thence north along the shore to 40°53'23.8" N 73°46'57.51" W; thence to 40°53'19.15" N 73°46'52.54" W and thence south along the shore back to the point of origin. This area is intended for the vessels and machinery being used by personnel for the Glen Island Bridge rehabilitation project. The duration of the zone is intended to ensure the safety of personnel, vessels, and these navigable waters during the bridge construction. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition.

Quantuck Canal - Moriches Bay/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2024-09-13 To: 2039-12-28 NY-SHINNECOCK BAY TO EAST ROCKAWAY INLET (Chart 12352)-MORICHES BAY-Update 2/8/22 Severe shoaling is present in Moriches Bay along the Long Island Intracoastal Waterway in the vicinity of Moriches Bay Buoys 21, 24, 26, 27, 28, and 29 extending the entire width of the channel at nearly all tide levels. The area from Buoys 24 to 29 is only navigable at the operator's risk. The most severe area of shoaling can be found between buoys 26 and 28 and is less than half the charted channel depth in some areas. Mariners should be aware that the Aids to Navigation in these areas are unreliable due to shoaling and mariners are strongly advised to seek alternate routes. Moriches Bay dredging has been completed. Shoaling has been reported in Moriches Bay along the Long Island Intercoastal Waterway in the vicinity of Moriches Bay Buoy 17, 18, 21, 26, 27, 28 and 29 extending the entire width of the channel and at any tide level. The most severe area of shoaling can be found between buoys 26 and 27 and is less than 3 ft. Shoaling is also reported in Moriches Inlet in the vicinity of Moriches Inlet East Cut Buoys 3E and 5E. Mariners should be aware that the Aids to Navigation in these areas have been deemed unreliable due to shoaling and mariners are advised to seek alternate routes. If transiting these areas, do so only at high tide and proceed slowly and with extreme caution. In addition, shoaling exists west of Moriches Bay Buoy 23 and East of Moriches Bay Buoy 27. Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Main Channel - New Jersey Pierhead/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2025-02-13 To: 2027-02-28 Claremont Terminal Channel Shoaling – The Harbor Safety, Operations and Navigation Committee of the Port of NY and NJ – Deep Draft Working Group: The need to immediately restrict the deep draft of vessels transiting Claremont Terminal Channel has come to our attention. Based on the latest available surveys conducted by the Army Corps of Engineers, November 4, 2024, shoaling has occurred in the channel. The shoaling has minimized the available depth of water to 15 feet near the centerline of the channel. Based on this data, vessels will be restricted to a draft of 13 feet, plus the rise in tide, with a maximum draft of 18 feet. On 11/04/2024, the shoal area was bound by the following approximate coordinates: 40° 41'11"N, 074° 04' 41"W; thence to 40° 41' 17"N, 074° 04' 33"W; thence to 40° 40' 14"N, 074° 03' 06"W; thence to 40° 40' 10"N, 074° 03' 13"W.

For more information, please contact Tara Hughgill at 603-235-4656.	
Boston North Channel - President Roads/General/MSIB	MSIB	General/MSIB From: 2025-06-03 To: 2025-11-30 2025 HURRICANE SEASON AND SEVERE WEATHER PLANNING The 2025 North Atlantic hurricane season commences on June 1 and continues through November 30. The National Oceanic and Atmospheric Administration (NOAA) forecasts an above average hurricane season for 2025, with 13-19 named storms and 6-10 hurricanes predicted with 3-5 of those being major hurricanes. As in past years, the Coast Guard Captain of the Port, Sector Boston will set port conditions in advance of an approaching hurricane or tropical storm. I encourage you to review and update your hurricane and severe weather plans. This includes internal and external communication procedures, methods of minimizing storm damage and environmental risk (e.g. securing transfers, ballasting down storage tanks, draining transfer lines), and reconstitution procedures. As a hurricane or tropical storm approaches, Coast Guard Sector Boston will contact the maritime community to establish communications and coordinate preparations. The Captain of the Port seeks to be as transparent as possible when making decisions that will impact commercial vessel and facility operations. Waterway restrictions and other decisions affecting the port are based upon weather forecasts, risk assessments, and preparations being made by port partners. In most cases, given ample warning of an approaching hurricane or tropical storm, vessels may be advised to put to sea or directed to an appropriate anchorage. In addition, cargo or fuel oil transfers may be suspended for brief periods. As necessary, Sector Boston will contact port partners to share information regarding pre-storm preparedness and post-storm response. As your organization reviews its plans, please feel free to contact the Coast Guard Sector Boston Command Center at (833) 449-0539, or the Waterways Management Division Chief LCDR Jessica Hull at (617) 512-9615 email at SECBOSSWaterways@uscg.mil if there are questions about the Coast Guard's role, plans, or policies regarding navigation restrictions or port closures during hurricanes and heavy weather. Sector Boston may also be available should your organization choose to hold a tabletop exercise to test portions of your plan. The Coast Guard is no longer utilizing Homeport for the distribution of Marine Safety Information Broadcast or for relaying Port Condition and Port Status changes. Mariners are advised to utilize the Coast Guard Navigation center site for the most recent updates https://www.navcen.uscg.gov NOAA provides near-real-time information regarding tropical weather, storms, and hurricanes through the National Hurricane Center's (NHC's) Facebook page, Twitter account, and official website. Visit https://www.nhc.noaa.gov/ for more information and check in periodically for updates. The "NOAA NWS National Hurricane Center" page provides updates about the NHC outreach and education campaign and other items that might be of interest to the public throughout the year. During the hurricane This release has been issued for public information and notification purposes only. Please refer to the document(s) published in the Federal Register for specific details and requirements of subjects announced here. season, the site contains a daily tropical weather update as well as alerts regarding any tropical cyclone activity as needed. The NHC Facebook page is http://www.facebook.com/US.NOAA.NationalHurricaneCenter.gov. For maritime emergencies during an actual hurricane or severe weather event, contact the Sector Boston Command Center at (833) 449-0539 or VHF-FM Channel 16 for immediate assistance.

Vessels CALYPSO, VIKING NEPTUN, and ECO LIBERTY will be supporting cable installation and surveying within the Lease Area. Local fishing vessels will also support this work to promote communication and safety on the waterway. Potential vessels include: PAMELA ANN, GABRIELLE ELIZABETH, TRIUNFO, BARBARA ANN, ITALIAN PRINCESS, REDEMPTION, ENFORCER, FLEET KING and FLEET QUEEN.	

Sector New York, Submerged Lands Act (SLA)/General/LAA/RNA/COTP Restriction	LAA/RNA	General/LAA/RNA/COTP Restriction From: 2025-11-19 To: 2025-11-27 A 500-meter Safety Zone will be enforced around Empire Wind operations from 8:00am, November 19, 2025, to 8:00am, November 26, 2025, Mariners are to avoid transiting within 500-meters of the following positions: C09: 40°20'25.307N, 073°26'50.160W; F11: 40°17'49.988N, 073°25'10.306W; F17: 40°17'03.018N, 073°20'01.227W; H15: 40°16'19.659N, 73°21'45.664W; H16: 40°15'57.881N, 73°20'54.528W; D19: 40°18'04.195N, 73°18'16.307W; G16: 40°16'32.420N, 73°20'53.667W; F18: 40°16'52.952N, 73°19'09.781W; E18: 40°17'33.610N, 73°19'08.774W; E19: 40°17'23.537N, 73°18'17.324W; D20: 40°17'54.115N, 73°17'24.853W; B02: 40°22'15.912N, 73°32'49.958W; B03: 40°22'05.938N, 73°31'58.412W; B04: 40°21'55.959N, 73°31'06.870W; B05: 40°21'45.973N, 73°30'15.333W; B06: 40°21'35.981N, 73°29'23.800W; B07: 40°21'25.983N, 73°28'32.271W; B08: 40°21'15.978N, 73°27'40.747W; B09: 40°21'05.967N, 73°26'49.227W; B10: 40°20'55.950N, 73°25'57.712W; B11: 40°20'45.926N, 73°25'06.201W; D18: 40°18'14.268N, 73°19'07.766W; D17: 40°18'24.335N, 73°19'59.229W; C18: 40°18'54.926N, 73°19'06.757W; C19: 40°18'44.853N, 73°18'15.290W; C20: 40°18'34.773N, 73°17'23.828W; C21: 40°18'24.687N, 73°16'32.370W; B21: 40°19'05.344N, 73°16'31.335W; B20: 40°19'15.431N, 73°17'22.802W. Van Oord will be operating the vessel BRAVENES and will be conducting scour protection operations around monopile and jacket foundations from October 14th, 2025, to November 30th, 2025. Vessels CALYPSO, VIKING NEPTUN, NORTHSTAR NAVIGATOR and ECO LIBERTY will be supporting cable installation and surveying within the Lease Area. Local fishing vessels will also support this work to promote communication and safety on the waterway. Potential vessels include: PAMELA ANN, GABRIELLE ELIZABETH, TRIUNFO, BARBARA ANN, ITALIAN PRINCESS, REDEMPTION, ENFORCER, FLEET KING, FLEET QUEEN, OCEAN QUEEN, NEW HORIZON, and JO ANN V.	
Sector New York, Submerged Lands Act (SLA)/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-05-30 To: 2025-12-31 ASCO Applied Sciences, in support of Empire Wind will be deploying up to 5 Sound Field Verification (SFV) buoys concurrently with monopile and offshore substation foundation installation, from May 30, 2025, to December 31, 2025, and will remain on site for 2-3 days until they are retrieved and moved to a new location. Temporary SFV surface buoys will mark the location of underwater, autonomous recording devices placed on the seabed for brief duration (3 days maximum) during pile driving. The location of the recording devices and their surface buoys is relative to the wind turbine generator monopile foundations or offshore substation foundation being installed. All temporary SFV surface buoys are red, round, polyform A-6 surface floats (350 kg buoyancy), 34 inches, with tethered highflyer including radar reflector and nighttime strobe light. The highflyer is 15 feet high with approximately 7 feet above water. The radar reflector is a standard 6 corner aluminum reflector approximately 1 foot in diameter. Each SFV buoy has a red strobe light that flashes 3 strobes in rapid succession (quick flashing) every 1.5 seconds. Buoys will be deployed from the R/V Danielle Miller.	
Sector New York, Submerged Lands Act (SLA)/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-09-03 To: 2026-03-02 Stony Brook University and Monmouth University with funding from the Hudson River Foundation will be deploying and maintaining, fish monitoring, oceanographic instruments in New York Rockaway area. To reduce the risk of entangling protected species, receivers have no surface buoys and are connected to a mooring system weighing approximately 150 pounds that extends about 2 meters (6 feet) off the sea floor. There will be multiple ships used for the downloading, recovering, and redeploying all of the gear such as Monmouth's R/V Heidi Lynne Sculthorpe and R/V Ocean Hawk (https://www.monmouth.edu/school-of-science/vessels-equipment-and-field-activities) as well as Stony Brook's R/V Seawolf and R/V Paumanok (https://you.stonybrook.edu/somas/about/facilities/researchvessels). Equipment will be serviced throughout the month of September 2025 and will be deployed at these locations until further notice. For information please contact Michael Frisk (Professor Stony Brook University University) michael.frisk@stonybrook.edu ; Oliver Shipley (Associate Professor Stony Brook University) oliver.shipley@stonybrook.edu ; Keith Dunton (Associate Professor Monmouth University) kdunton@monmouth.edu .	
General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-11-93 To: 2026-01-10 DEME Offshore will be conducting cable installation works and associated planned operations for the installation of array cables at the OCS-A 0512 Lease area, in NY Bight, from November 9, 2025, to January 9, 2026, 24 hours a day. Equipment on scene will be the CLV Viking Neptun, monitoring VHF-FM CH 16.

General/LAA/RNA/COTP Restriction	LAA/RNA	General/LAA/RNA/COTP Restriction From: 2025-11-12 To: 2025-11-20 A 500-meter Safety Zone will be enforced around Ørsted Northeast Program operations from 8:00am, November 12, 2025, to 8:00am, November 19, 2025, Mariners are to avoid transiting within 500 meters of the following positions: Revolution Wind Lease Area 486 Wind Turbine Generators (WTG): AG05: 41-11-31.741N, 071-11-37.495W, AJ02: 41-09-27.123N, 071-15-31.816W, AJ15: 41-09-45.449N, 070-58-22.049W, AP11: 41-04-40.246N, 071-03-28.891W, AE09: 41-13-37.9113N, 071-06-24.123W, AJ03: 41-09-28.218N, 071-14-12.753W Revolution Wind Lease Area 486 Offshore Substations (OSS): AF08: 41-12-36.00N, 071-07-42.120W, AL11: 41-07-41.15N, 071-03-32.6W. Sunrise Wind Lease Area 487 Offshore Converter Station (OCS): AU08: 40-59-36.26160N, 071-07-16.95360W. Ørsted Northeast Program On September 22, the U.S. District Court for the District of Columbia granted Revolution Wind, LLC's request for a preliminary injunction against the government's stop-work order issued on August 22. The preliminary injunction allows Revolution Wind, LLC to resume offshore construction, which Revolution Wind, LLC is doing with safety as its top priority. SEAWAY AIMERY is conducting seabed preparation and cable installation for Revolution Wind's 2025 inter-array and inter-link cable campaign. DEEP SEA VOLANTIS is trenching and burying the cables. There is an area of exposed cable adjacent to AM11. For cable burial progress updates, visit the Ørsted Mariners Briefing at us.orsted.com/mariners or radio VHF16. SCYLLA and supporting vessels are installing wind turbine generators (WTG) in Revolution Wind. WTG components are stored and prepared in New London, CT. Barge 455-8 and tugs SAM and OCEAN WIND, transport one complete WTG per roundtrip, consisting of two tower sections, one nacelle and three blades. Starting on or around November 15, NORTHSTAR COMMANDER will conduct seabed preparations for the installation of Sunrise Wind's Export Cable. Seabed preparation will start on the nearshore section and move towards the Lease Area. ROGER WILLIAMS will follow these operations to conduct pre-lay surveys. HYDRA is positioned for commissioning of the Revolution Wind Offshore Substation (OSS) at AL11. There is construction activity at AF08. Sunrise Wind Foundation Installation has concluded for the 2025 season. LEVIATHAN is positioned for commissioning at Sunrise Wind's Offshore Converter Station (OCS) at AU08. Please be advised, there is a circular seafloor obstruction approximately 9' off the seafloor and over 30' in diameter at 41-07-41.1478N, 071-03-32.5954W. There are temporary mattresses installed at the Sunrise Wind Exit Pit off Smith Point Park within a 60-meter radius of 40-43-54.18N, 072-50-38.94W. A number of other vessels are working to support the above work. Visit us.orsted.com/mariners for more information.

Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-09-06 To: 2025-11-21 University of Connecticut Avery Point, will be deploying 6 surface drifters for marine science data collection in Coxes Ledge from September 6, 2025, to November 21, 2025. The drifters will be deployed near the following positions: 41-08.17 N, 071-14.882 W; 41-14.137 N, 071-00.352W; 41-12.944N, 071-04.437W; 41-11.275N, 071-09.024 W. 41-09.400N, 071-00.285W; 41-07.264N, 070-53.470 W. The drifters are wood construction with metal down-weight (screw and washers) approximate dimensions: 29” long vertically and 8” max horizontal width, weight (out of water) less than 10 lbs, with a reflective red/silver or yellow/black tape at top, GPS (battery-powered) on top of drifter approximately 6” above still-waterline. Mariners are advised to keep a sharp lookout while transiting the area.	
Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/MSIB	MSIB	General/MSIB From: 2025-06-11 To: 2025-12-08 The Coast Guard is establishing 85 temporary safety zones around the construction of individual wind energy facilities during the development of the Sunrise Wind Farm project area. The project area lies within Federal waters on the Outer Continental Shelf, specifically in the Bureau of Ocean Energy Management Renewable Energy Lease Area OCS-A 0487, approximately 16 nautical miles south of Martha’s Vineyard, MA. This action protects life, property, and the environment during construction of each facility. When a safety zone is being enforced, only attending vessels and vessels with authorization are permitted to enter or remain in the safety zone. This action is necessary to provide for the safety of life, property, and the environment during the planned construction of each facility’s foundation and subsequent installation of the wind turbine generators and offshore substations from June 1, 2025, through May 31, 2028. When enforced, only attending vessels and those vessels specifically authorized by the First Coast Guard District Commander, or a designated representative, are permitted to enter or remain in the temporary safety zones. Again, each safety zone will only be enforced during active major construction, which could occur at several locations, sometimes simultaneously. The First Coast Guard District Commander will make notification of the exact dates and times in advance of each enforcement period to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency. If the project is completed before May 31, 2028, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/msi . The complete Temporary Interim Rule regulatory text can be found at the following link: https://www.navcen.uscg.gov/sites/default/files/pdf/Inms/D01_LNM_Special_Notice_Temporary_Interim_Safety_Zone_Sunrise_Wind.pdf

Sector Southeastern New England, Territorial Sea - Sector Southeastern New England, Submerged Lands Act (SLA)/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-09-02 To: 2025-11-30 The Barnstable County dredges Sand Shifter & Cod Fish II will be conducting dredge operations in the Popponesset Approach Channel, Mashpee located in Nantucket Sound. Dredging will take place in the channel with the dredge pipe running from the dredges to discharge locations on the south side of Popponesset Spit. Dredging will run from September 2, 2025, to November 30, 2025, Monday through Saturday, between 7:00am to 4:30pm. Equipment on scene will be the dredges Sand Shifter & Cod Fish II, three Pushboats – J.W. Doane, Sandman & Bradbury, a barge, numerous skiffs and pipeline, monitoring VHF-FM CH 16. When dredging and on station, the Sand Shifter & Cod Fish II will have limited maneuverability. The discharge pipe will be floating at times during dredging operations and may be blocking the channel. Floats will be marking the location of the submerged pipe. There will be cables extending on both the port and starboard side of the forward part of the dredges leading to anchors with floats marking their locations. The dredges will remain on station 24 hours when weather permits and will display anchor lights at night. When the dredges are not on station, the ends of the pipe will be attached to yellow pontoons that are anchored and floating. Mariners are advised to use extreme caution when navigating in this area and to give adequate clearance to the equipment at all times. Contact the dredges to arrange for passing arrangements as needed. A ‘no wake’ zone will be established in this area per the Town of Mashpee Harbormaster.
