Matanzas River Light 1 (LLNR 39035) will permanently be changed to Matanzas River Lighted Buoy 1 (LLNR 39035). Matanzas River Light 1 has been destroyed on a few occasions over the last 10 years and it is currently being advertised as destroyed since 2020. In addition, the water depth at its assigned position is 21 feet making it more difficult for a CG asset to spud and maintain position to rebuild the aid safely. Converting the light to a floating aid will allow for a timelier response and consistent maintenance in the event the aid becomes discrepant. Therefore, this change will provide mariners a more reliable signal while approaching the Matanzas River Channel entrance from the St. Augustine Inlet and while exiting the channel. The nominal range permanently reduced from 5NM to 4NM. The current nominal range of 5NM is not necessary. Based on the design of the Short-Range Aids System (SRA), mariners should be able to see two lighted aids to navigation forward of the aid from which they are alongside. Based on this data, a nominal range of 4NM is more than adequate.	Lat: 31° 52' 19" Lon: -081° 04' 34"
