SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

GPS TESTING

At times, throughout our area or responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

<https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LA - MERMENTAU ENTRANCE CHANNEL, INCLUDING THE MERMENTAU RIVER, UPPER MUD LAKE, GRAND LAKE AND LAKE ARTHUR - Waterways Analysis and Management System Study

The U.S. Coast Guard is conducting a Waterways Analysis and Management System study of the Mermentau Entrance Channel, including the Mermentau River, Upper Mud Lake, Grand Lake and Lake Arthur, in its entirety. This study focuses on the area's aids to navigation system, waterborne commerce, marine casualty information, port/harbor resources, emergency response plans, routine and emergency communication capabilities and future development projects. Any interested company or individual wishing to provide comments or participate in a user survey

should contact:

LA - MISSISSIPPI RIVER - Old River Lock - UPDATE

Continuing until approximately July 31, 2023, due to repairs on the Lock Emergency Bulkhead Lowering Carriage, and the procedures contained in this bulletin, tows entering the Lock are urged to use extreme caution while approaching and entering the lock chamber. While approaching the Lock, the following are required for passage:

1. Tows are to enter the Lock at DEAD SLOW speed.
2. All tows are restricted to no longer than 1,100 feet in length.
3. All tows will line up along the floating guidewall before proceeding.
4. Two line-handlers with life vests and bumpers will be required on both approach and exiting of the Lock.
5. Vessels must be moored by bow and stern lines to floating timberheads.

Again, use extreme caution when locking through Old River Lock. The Lockmaster, Anthony T. Lindsly, can be reached at (225) 492-3333, for up-to-date information. The point of contact with the USACE New Orleans District is Russell Beauvais, at (225) 492-2169.

FL/AL/GA - APALACHICOLA - CHATTAHOOCHEE AND FLINT (ACF) RIVER SYSTEM

In accordance with Section 7-11 of the Apalachicola, Chattahoochee and Flint (ACF) Master Water Control Manual and the Jim Woodruff Lock and Dam and Lake Seminole Water Control Manual (Appendix A), dated March 2017, a 7-foot navigation channel will be supported via water releases on the ACF during the months of January 2023, through May 2023, when the composite storage for the system is in Zones 1 and 2. Below is a link to a graphic showing the ACF composite storage in Zone 1, indicating sufficient water is available to support the beginning of this navigation season. The composite storage graphic, which is updated weekly, can be viewed at the following website:

<https://water.sam.usace.army.mil/ACFconstorage.pdf>. A 7.4-foot Blountstown Gauge is needed to provide a 7-foot channel on the Apalachicola River. River stages for the ACF system can be viewed at: https://water.sam.usace.army.mil/forecast_acf_plots.htm. Commercial mariners should schedule lockage appointments at the Jim Woodruff Lock by calling (850) 663-4692 or (229) 723-3482. George W. Andrews and Walter F. George Locks remain closed due to mechanical failures.

SAFETY NOTICE - NAVIGATIONAL RANGE AND SECTOR LIGHTS ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that the Range and Sector Light Characteristic labels are not displayed on Electronic Navigational Charts (ENCs) when used in an Electronic Chart Display and Information System (ECDIS), due to limitations of the S-52 ECDIS, display specification. Mariners may query the ENC data directly within ECDIS or refer to the Light List for complete information on Range and Sector Light Characteristics.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections. This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

FL - GULF OF MEXICO - PENSACOLA - PANAMA CITY - TALLAHASSEE - Hazardous Operations

Mariners making plans to transit offshore Tallahassee, Panama City and Pensacola, Florida, are advised of frequent rocket activity and associated hazardous areas which may include free falling debris and/or descending vehicles or vehicle components under various means of control.

Mariners should contact U.S. Coast Guard Sector Mobile at (251) 441-5940, for more information. Specific scheduled information and Marine Safety Information Bulletins (MSIB) can be found at the following website <https://homeport.uscg.mil/port-directory/jacksonville>. Upcoming information and Hazardous Areas are also posted on the Patrick Air Force Base website: <https://www.patrick.af.mil>, or can be obtained by calling 1 (800) 470-7232.

FL - GULF OF MEXICO - Temporary Buoy Deployment

Continuing until March 31, 2023, as a part of the U.S. Navy funded Coastal Land-Air-Sea Interaction program, the University of Miami and the U.S. Naval Postgraduate School are deploying oceanographic measurement buoys in the Northern Gulf of Mexico in the region between Destin, FL and Panama City, FL. The vessels conducting the operations will be the Research Vessel ARMSTRONG and Research Vessel APALACHEE. The Research Vessel ARMSTRONG will be conducting the mooring operations as described in this request. There will be three different types of moorings installed during the experiment: Air-Sea Interaction Spar buoys (ASIS), Inshore spar (I-Spar) and Sofar Spotter wave buoys, bound by the following approximate positions:

restricted to navigation within the marked temporary navigation channels only. Temporary lighted navigation buoys shall be installed in each area affected and subsequently removed from the water upon completion of the area survey work. The temporary navigation buoy channels shall also be shifted to the next survey area affected. This process will be repeated until all six survey areas have been completed. Each temporary lighted navigation buoy channel shall have lighted red buoys, showing a RED flashing 2.5 second light, at night and lighted green buoys, with GREEN flashing 2.5 second light, at night, to signify each of the temporary navigation channels. The project will commence in Area 2 and the temporary navigation channels are illustrated in the attached enclosures, with the temporary lighted buoy geographic positions. This notice shall be updated as the survey areas change and a revised temporary navigation channel illustration shall be published to update the mariner for the affected area of Lake Maurepas. Temporary lighted danger buoys and/or signs are installed on each side of the affected waterway(s) to mark the submerged pipeline crossing to visually identify the precise area where the submerged pipeline crosses the waterway.

The staging area in the vicinity of Grand Pass, Venice, LA will be used throughout the duration of the project. Equipment and dredge pipeline will be anchored within the following approximate positions:

29°15'28.29"N, 89°21'1.35"W
29°15'30.30"N, 89°20'53.48"W

29°15'4.81"N, 89°20'42.21"W
29°14'32.99"N, 89°20'35.97"W
29°14'32.40"N, 89°20'43.55"W

Floating and submerged pipelines will have all required U.S. Coast Guard lighting for night operations. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

Your office will be notified immediately if there are any changes to our schedule. If you have any questions or require additional information, please contact me at (985) 875-2564 or macruz@weeksmarine.com or please contact Project Manager(s)/Superintendent(s) on site:

SL-B700 Float Collar Buoy

Regulatory and Channel/Navigation Markers

The SL-B700 Buoy is rotationally-molded in one piece from strong, durable UV-stabilized polyethylene and is filled with closed-cell polyurethane. It is available in three different configurations: a red nun and green can navigation buoys, as well as a regulatory style buoy, which meet federal, state, and local requirements. A large mooring attachment point accommodates a 5/8 inch (16mm) shackle or 1/2 inch (12mm) cable.

Sealite's SL-B700 Buoy incorporates stainless steel interconnected mooring and lifting eye (see below) for additional strength while being deployed and retrieved. The top section has three threaded M6 inserts, molded into the buoy to allow easy mounting of the SL-60 Large Base or SL-70 2-3NM Marine Lanterns.

Regulatory signage and custom graphics are available, which will hold up under heavy UV exposure without peeling and fading. Vinyl wraps and decal restoration kits are also available to repurpose older buoys (see back).

Above:
SL-B700 is available in green can and red nun style for channel marking configurations (shown in region B colors)

Above:
Structural integrity of SL-B700 is reinforced through the use of an interconnected stainless steel mooring and lifting eye

Features

- Molded from strong, durable UV-stabilized polyethylene
- Interconnected mooring and lifting eye for additional strength
- Easy mounting of solar marine lanterns
- Regulatory signage available

Cost Effective

- Low maintenance costs
- Withstand heavy UV exposure - no peeling or fading

Flexible Configurations

- Channel Markers - Green Can or Red Nun
- Regulatory Buoy - White with Orange Stripes

Optional

- Mold-in graphics
- Mooring equipment & chains
- Vinyl decal restoration kits and wraps to refurbish or repurpose existing buoys

Applications

- Navigation channels, harbor approaches and port entrances
- Regulatory marking of hazards, mooring fields, cautionary zones

Certifications

- Meets U.S. federal, state and local regulations

Reliable

- Excellent buoyancy & stability

1-2NM+ Solar Marine Lantern

SL-15

The equipment complies with requirements of the U.S Coast Guard in 33 CFR part 66 for private aid to navigation and 33 CFR part 88.15 for lights on dredge pipelines

The Sealite SL-15 1-2NM+ compact LED light is exceptional value and incorporates some of the most advanced technology available. In the tradition of Sealite lanterns, the SL-15 is designed to be maintenance-free and have a service life of over 5 years.

The SL-15 can be installed in minutes and requires no operator intervention. The SL-15 has a rotary switch to allow users to change the flash character of the light without the need for special tools or programmers.

During daylight hours the solar module will charge the battery, and the lantern will automatically begin operation at dusk – once the ambient light threshold drops sufficiently.

The SL-15 features Sealite's Single LED Optic which boasts exceptional power to light output efficiency. The tough outer polycarbonate lens incorporates an environment-friendly spike – deterring unwelcome bird life.

The internally housed battery is user-replaceable after years of reliable service.

The unit is sealed using advanced UV-sealing, enabling a rugged and complete waterproof seal capable of prolonged and deep immersion (IP68).

Optional ON/OFF Switch

The SL-15 is also available with an optional ON/OFF switch for temporary installations such as worksites.

User Advantage

- User-adjustable flash characters
- User-replaceable battery in sealed battery compartment
- Installs in minutes & operates maintenance-free for up to five years

Reliable

- Completely sealed & self-contained using advanced UV-sealing
- IP68 waterproof
- NiMH battery for long service life & wide temperature range

Cost Effective

- Solar Powered

Optional

- Optional ON/OFF switch for temporary installations

HOUSTON SHIP CHANNEL, TEXAS
HSC- Redfish to Beacon 78 And Bayport Flare
Port of Houston Project No. 2021-0321 3-4A
Great Lakes Dredge and Dock Company Project No. 84959

To Whom It May Concern:

The US Army Corps of Engineers (USACE) awarded Great Lakes Dredge and Dock Co. LLC (GLDD) the Redfish to Beacon 78 & Bayport Flare Contract - Bayport Flare sections 1-4 and adjacent Houston Ship Channel (HSC) section 5. This assignment includes Dredging accumulated shoal material within the Bayport Flare and Houston Ship Channel. Great Lakes Dredge and Dock Co. LLC will be hauling excavated material from Bayport Flare and the adjacent portion of the HSC and disposing placement off shore in the approved ODMDS designated area in the Gulf of Mexico.

Attached is information for publication in Local Notice to Mariners for our dredging operations pertinent to this contract. More details information will be provided as work progresses.

For further information, please contact:

- Project Manager – Christy DiFelice (630) 484-6608 or CDiFelice@gldd.com
- Project Engineer – Tyler Maiers (630) 917-1696 or TNMaiers@gldd.com
- Assistant Project Engineer – Samantha Cepeda (630) 272-8555 or SFCepeda@gldd.com

Thank you for your cooperation in this matter.

Sincerely,

Jeff Bradford
Quality Systems Engineer
Great Lakes Dredge and Dock Company

Current Operations:

Dredge 54 (Mechanical Clamshell)

Great Lakes Dredge and Dock Company, LLC (GLDD) commenced mechanical dredging activities on April 10th, 2022 for the Houston Ship Channel (HSC) and Bolivar Roads (BRC) EXPANSION CHANNEL IMPROVEMENT PROJECT (ECIP) PROJECT 11: BOLIVAR ROADS TO REDFISH HSC STA 138+369 TO HSC STA 73+476. The Mechanical Dredge 54 will continue to remove material from the HSC Expansion **between approximate channel markers Green 53/Red 54 and Green 49/Red 50** and place material at a designated offshore disposal area in the Gulf of Mexico using material transport scows towed by tugs. These works are estimated to be complete in and around December 10th 2022.

The Dredge 54 will then move outbound of the GIWW on the Red Side and continue to remove material from the HSC Expansion **between the GIWW on the Bolivar Peninsula Side out past marker Red 18**. This material is also designated to the offshore disposal area in the Gulf of Mexico using material transport scows towed by tugs. During these works the Dredge will be outside of the Navigable Channel but in case of a conflict the Dredge 54 will need a 30-minute notice to move.

Dredge Carolina (Cutter Suction)

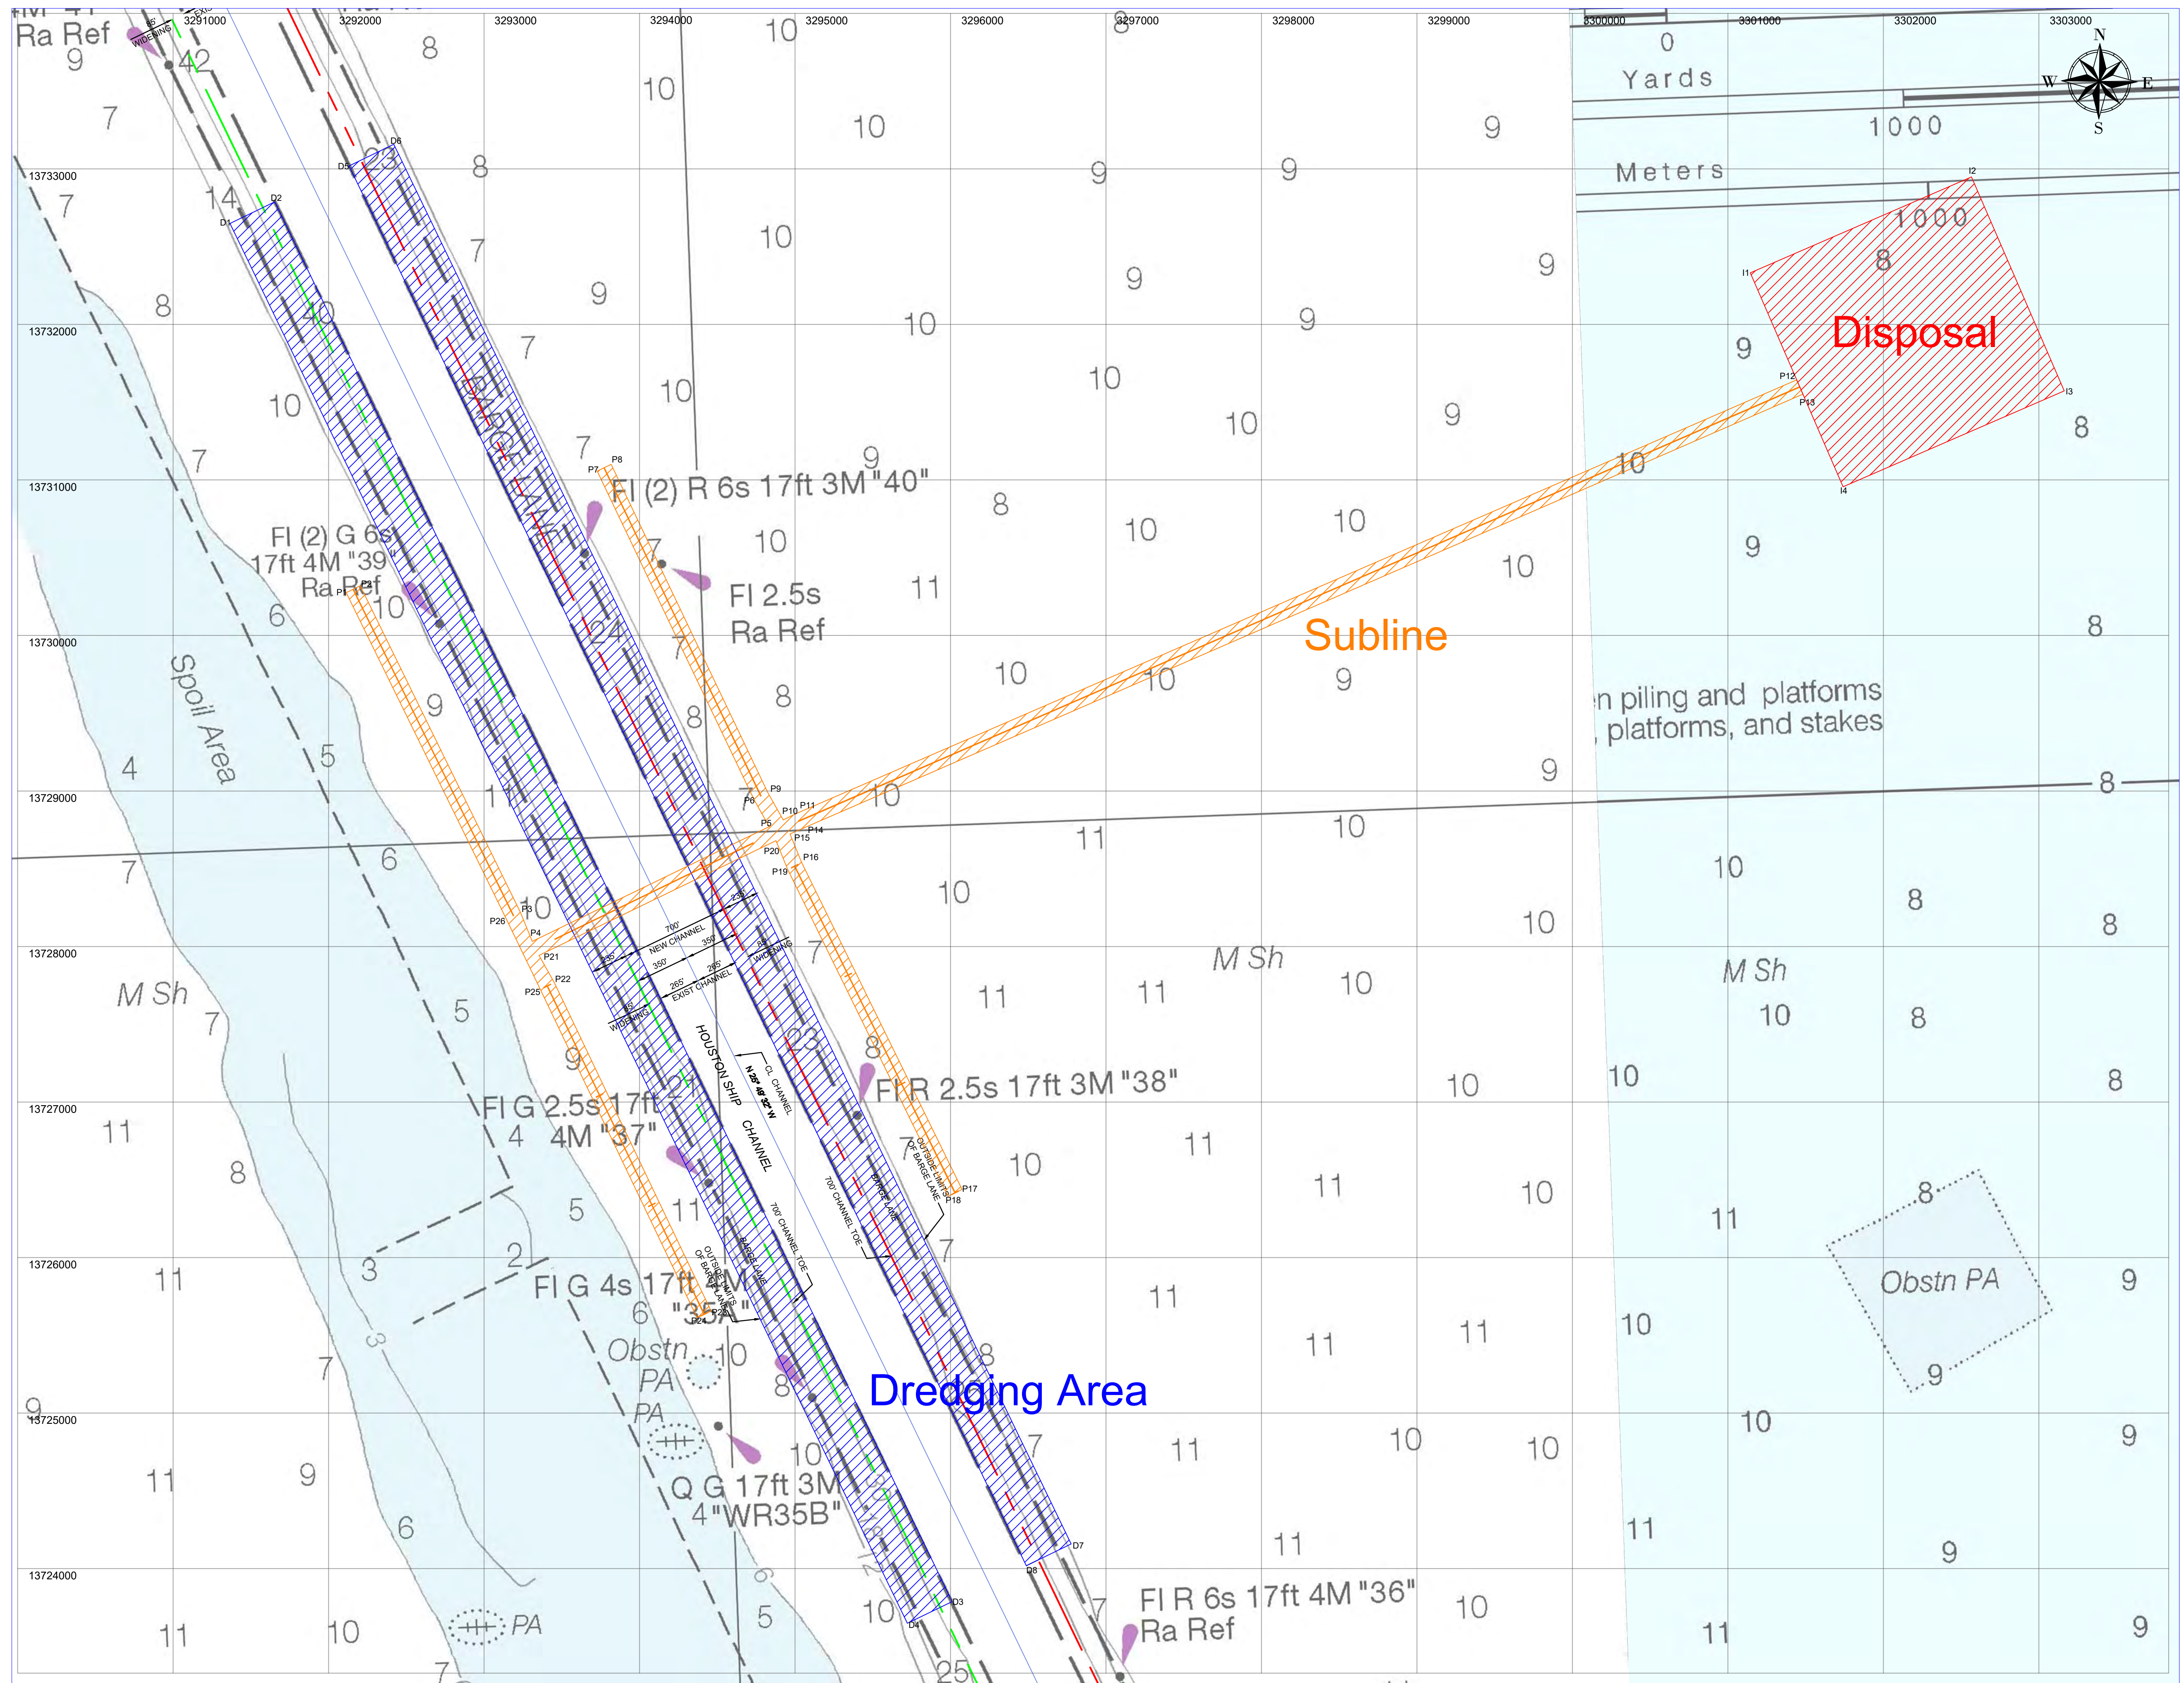

Great Lakes Dredge and Dock Company, LLC (GLDD) commenced Hydraulic Dredging with the cutter suction Dredge Carolina on July 10th, 2022 for the Houston Ship Channel (HSC) and Bolivar Roads (BRC) EXPANSION CHANNEL IMPROVEMENT PROJECT (ECIP) PROJECT 11: BOLIVAR ROADS TO REDFISH HSC STA 138+369 TO HSC STA 73+476. The Dredge Carolina is currently continuing their dredging works removing material from the HSC **between approximate channel markers Green 35/Red 36 and just south of Green 41/Red 42**. The material will be placed in East Galveston Bay into a new disposal area called Long Bird Island via submerged dredge pipeline along the outer limits of the Houston Ship Channel.

Mariners are urged to use extreme caution in the area and to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. GLDD understands that circumstances that warrant specific maritime precautions must be handled on a case-by case basis in coordination with the local U. S. Coast Guard representatives. GLDD requests that the U.S. Coast Guard disseminate information provided in this notification to the general maritime community through Local Notice to Mariners publications and marine band broadcasts.

GLDD will continue to report project updates on status and equipment location changes as needed throughout the duration of the project via e-mail and/or phone. Should you have any questions concerning this project, please contact GLDD Project Manager Nicholas Williams (630-247-2256) NDWilliams@gldd.com

Subject: Notice to Mariners
Reference: **Houston Ship Channel (HSC) & Bayport Ship Channel (BSC) Expansion Channel Improvement Project (ECIP) Project 11: REDFISH TO BAYPORT HSC STA 78+844 TO HSC STA 16+000 & BAYPORT SHIP CHANNEL**

Mariners:

Curtin Maritime request that a Notice to Mariners be posted regarding our dredging operations in the Houston Ship Channel from approximately channel marker G-75/R-76 to G-71/R-72.

Please be advised that Curtin Maritime (CMC) will be conducting dredging activities commencing on or about December 15, 2022 and conclude on or about May 3rd, 2023. Sediment will be dredged within the main ship channel and existing barge lane and will be loaded into scows. The mechanical clamshell dredge, DB Avalon, will be utilizing spuds without any anchors and does not have any associated dredge pipeline.

From approximately Dec 15, 2022 to Feb 16, 2023, scows will be pushed directly from the DB Avalon to the San Leon oyster mitigation site located at 29d 31.602000' N, 094d 57.52920' W. From approximately Feb 17, 2023 to Apr 16, 2023 the scows will be pushed from the DB Avalon in the HSC utilizing the barge lane, where possible, to the vicinity of light 45. The tug will take the scow within 300ft outside of the western toe of the main ship channel and swap the loaded scow to shallower draft tugs. The shallower draft tugs will pass a light scow to the larger tug to take back to the DB Avalon and the loaded scow will be transported to the Dollar Reef oyster mitigation site located at 29d 26.899043' N, 094d 53.128969' W.

From approximately Feb 3, 2023 to Apr 6, 2023, a placement barge, DB Ironbound, will be located at the San Leon oyster mitigation site placing material. Then the placement barge will relocate to Dollar Reef oyster mitigation site on approximately Apr 7, 2023 and conclude operations on or about May 3, 2023.

Our fleet for this operation will consist of:

Equipment	Name	LxWxDraft
Dredge	DB Avalon	250'x77'x9'
Placement Barge	DB Ironbound	144'x54'x6'
Split Hull Scow	Arrow Point	174'x48'x10'

Split Hull Scow	Telsiai	200'x44'x10'
Split Hull Scow	Thomas Desmond	250'x52'x10'
Split Hull Scow	GL33	234'x53'x10'
Split Hull Scow	GL35	234'x53'x10'

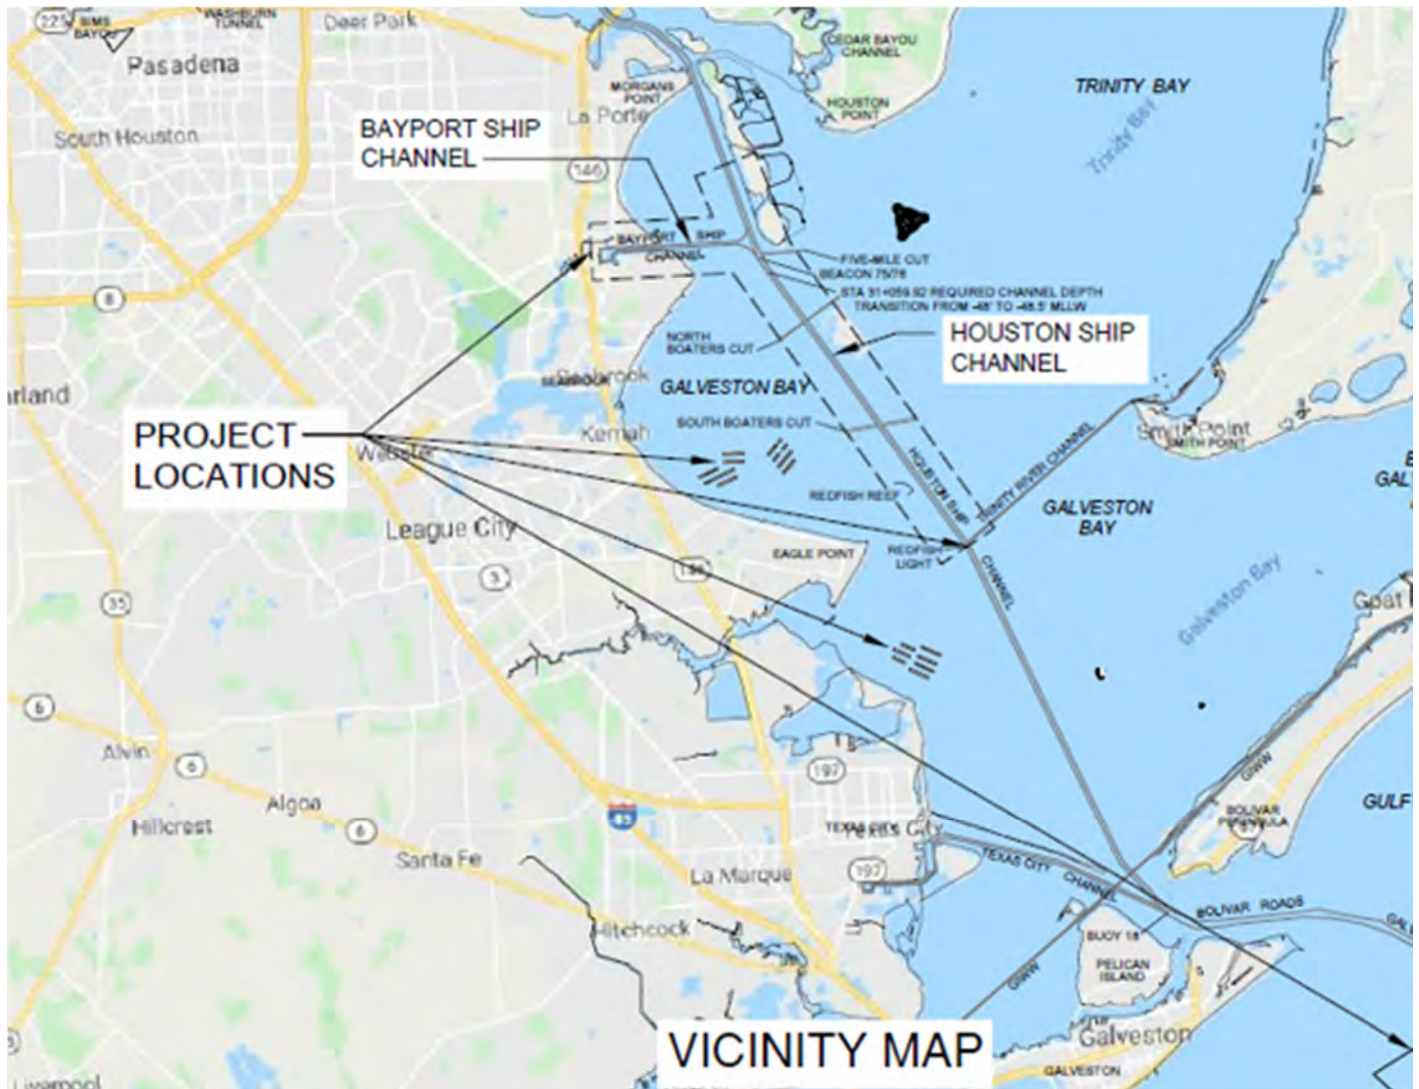

Dredge Tending Tug	Elizabeth C	90'x28'x12'
Scow Tending Tug	Alice C	120'x31'x15'
Scow Tending Tug	Karen C	126'x34'x16'
Scow Tending Tug	Taurus	69'x24'x9'
Scow Tending Tug	Baby T	26'x14'x5'

CMC will be operating 24 hours per day / 7 days per week (Monday through Sunday). Mariners are urged to transit at their slowest safest speed to minimize wake between lights 43/44 and 47/48 while a scow swap is occurring. While approaching the DB Avalon, mariners are urged to proceed with caution after passing arrangements have been made.

All manned equipment will monitor VHF-FM Channels 13, 11 and 05A. The dredge DB Avalon can be reached by phone at (562) 600-9854. Our Project Manager, Mr. Mike Patria can be reached at (630) 418-1190.
