Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory --- Reported: 2025-02-10 --- The Houston Ship Channel widening project is complete between Houston Ship Channel (HSC) Light 63 (LLNR-24295) through Houston Ship Channel Light 84 (LLNR-24540), approximately South Boaters Cut Channel to Atkinson Island. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep. The aids to navigation from HSC Light 63 to HSC Light 84 have been relocated based on the new channel dimensions. Currently, NOAA charts do not reflect the new aid to navigation positions; however, the USCG is actively working with NOAA to make chart corrections as soon as possible. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 83/84. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners should reference U.S. Coast Guard Sector Houston-Galveston Marine Safety Information Bulletin 02-25 at: https://homeport.uscg.mil/my-homeport/safety-Notifications/MSIB?cotpid=28
