TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Lower Old River - Atchafalaya River/General/Bridges/Closure (Scheduled Or Emergency)	Bridges	Atchafalaya River - Bridge Closure --- From: 2025-05-06 To: Until Further Notice --- The Krotz Springs Railroad Bridge experienced a mechanical failure and will remain in the closed position, except as follows: The bridge will open daily at 2:00 p.m., and will remain open until the vessel queue is cleared. Mariners must contact the Krotz Springs Railroad Bridge with two hours advance notice to be placed in the opening queue. Mariners should allow for additional time for bridge openings due to reduced capacity of the backup opening mechanism. For on scene information and advance notices, vessels should contact the Krotz Springs Railroad Bridge at (337) 566-3713 or on VHF-FM Channel 13.	Lat: 30° 32' 20" Lon: -091° 44' 46"
Atchafalaya Channel - Atchafalaya River/General/Hazards To Navigation/Wrecks	Hazards To Navigation	Atchafalaya River - Partially Submerged Vessel --- Reported: 2025-05-18 --- A 16 ft white hull P/C has been reported partially submerged, with the stern visible approximately 2 ft above the waterline and adrift. The partially submerged and adrift P/C is reportedly not marked. Mariners are urged to use extreme caution in this area and report any sightings or findings to the nearest U.S. Coast Guard unit.	Lat: 29° 39' 06" Lon: -091° 14' 41"
Atchafalaya Channel - Atchafalaya River/General/MSIB	MSIB	MSIB 016-25, Safety Alert: High Water Restrictions on the Atchafalaya River --- The Atchafalaya River gauge has reached and is forecasted to remain above 6.0 ft. In accordance with 33 CFR 165.811, the following Emergency Vessel Movement Controls (EVMC) are in place for the designated Regulated Navigation Area (RNA) that encompasses the Atchafalaya River, in the vicinity of the Morgan City Triple Span Bridges. For these restrictions, length of tow (LoT) indicates length and width of the barges, excluding length of towing vessel. a) All tows transiting the bridges will be limited to maximum tow length of 600 ft. b) All south and northbound tows with a length of tow >400 ft (regardless of horsepower) must have an additional assist boat when turning westbound into the GIWW at Mile 98.5, WHL. c) All southbound tows with a length of tow >400 ft (regardless of horsepower) must have an additional assist boat through the bridges. d) All westbound tows turning into the GIWW at Mile 98.5 shall be limited to a maximum tow length of 600 ft. e) All tows with a loaded box in the lead shall be limited to 600 ft. f) Towing on a hawser is not authorized, except when a tug is pushing ahead on a barge that is being towed on a hawser by another towing vessel, it is considered "Pushing Ahead" and shall be allowed. g) Minimal available horsepower requirements in accordance with 33 CFR 165.811(e) TABLE are in effect. h) Towing Certain Dangerous Cargoes (CDC) Barges, as defined in 33 CFR 160.202, must have available horsepower of at least 600, or three times the length of tow, whichever is greater. For double wide CDC tows, length of tow is computed as if arranged in tandem. i) All tows shall have at least 75% of the required horsepower wired-in when transiting the bridges. Once that condition is met, a shadow assist may be used to make up the remaining horsepower deficit. j) Tows shall ensure the assist boat is ready and in position to provide IMMEDIATE assistance throughout the entire transit through the RNA. k) Strong abeam currents are present near the Wax Lake Outlet. Mariners should avoid crossing at night with no prior experience. There is no requirement for an assist vessel until currents reach over 3.0 kts; however, mariners may utilize assist vessels for their transit. --Navigating vessels in high water conditions increases the risk of casualties. Mariners are reminded of their ongoing responsibility to conduct and manage their required navigation assessments and voyage plans to prepare bridge teams for known hazards. Vessel operators are strongly encouraged to continuously evaluate the experience of their mariners operating in high water conditions and consider ensuring more experienced wheelmen are on watch during critical stages of the voyage or using "posted" wheelmen to transit through high-risk areas.--	Lat: 29° 41' 39" Lon: -091° 12' 47"

Galveston Bay - Bolivar Peninsula/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW Alternate Route - Dredge Operation --- From: 2024-10-24 To: 2025-05-31 --- Non-continuous maintenance dredging is being conducted by the Dredge GENERAL EISENHOWER in the GIWW, from the High Island Bridge, Mile 319.3, WHL, to the Bolivar Flare, Mile 350.0, WHL. Work is currently taking place between Miles 346.0 and 347.0, WHL, 24-hours a day, 7-days a week. The dredge will set up outside of the channel and swing into the channel via anchors set alongside both edges of the channel. Floating rubber hose, floating pipe, submerged pipe and shore pipe leading to the dredged material placement areas will be used throughout the project. Submerged pipelines will be placed across the GIWW at sufficient depths and will be marked with lights and buoys. Survey boats, tender boats, and work boats will operate alongside the dredge and throughout the project area. Mariners should transit with caution and coordinate passing arrangements 30-minutes in advance. VHF-FM Channels: 13, 16 and 78, POC: (409) 539-1770	
Galveston Bay - Bolivar Peninsula/General/Safety Zones/COPT Restrictions	Safety Zones	GIWW, Mile 348.0 to 349.0, WHL - VTS Waterway Closure --- On: 2025-05-28 --- Vessel Traffic Service Houston-Galveston directs no vessel movements on the Gulf Intracoastal Waterway between Miles 348.0 to 349.0, from 8:00 a.m. to 12:00 p.m., due to dredge operations. Vessels will not be allowed to stop or push-in along the Houston Ship Channel during the closure. For additional information on the closure, mariners can contact the VTS at (281) 464-4837.

Operations will be conducted 24-hours a day, 7-days a week. The Cutter Suction Dredge CAROLINA will be pumping dredged material from the ship channel to the Upland Placement Areas located adjacent and south of the channel. Dredged material will be placed within the Placement Areas through varying lengths of floating hose, submerged pipeline, pontoon pipeline and shore pipeline. Submerged pipelines will cross the channel between Brownsville Channel Lights 35 (LLNR-29895/43015) and 37 (LLNR-29915/43035) and a booster pump will be positioned along the south side of the channel in the same area. Additional submerged pipeline has been installed along the south side of the ship channel between Laguna Madre Channel Light 27 (LLNR-29600) and Brownsville Channel Light 41 (LLNR-29940). A spud barge with a floating dock will be staged along the green side of the channel, across from Laguna Madre Channel Light 28 (LLNR-29605). Additional support vessels and equipment include: the Boosters JESSIE, CAPT. BARNEY, and BOOSTER 9, auxiliary equipment, pipe rafts, barges and towing vessels. Staging areas will be located throughout the project area, along the Brownsville Ship Channel and Port Isabel Channel. Mariners should transit the project area with extreme caution and coordinate passing arrangements in advance. VHF-FM Channels: 10, 12 and 16, POC: (252) 342-4971 or (630) 207-3593

Aransas Pass To Baffin Bay - Corpus Christi Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Corpus Christi Channel - Dredge Operation --- From: 2025-05-07 To: 2025-06-20 --- The Dredge EMIL KURTZ is conducting dredging in the Corpus Christi Channel, between Miles 10.0 and 13.0. Work will take place 24-hours a day, 7-days a week. The floating plant will consist of approximately 22,000 ft of combined steel, plastic, and floating pipeline, three anchor barges (#24, #21, and #9), one fuel barge, one supply barge, and the M/Vs JESUS F., SAM S., WYATT C., and MINNIE T. Passing arrangements should be made 45-minutes in advance. Mariners are urged to transit at their SLOWEST SAFE SPEED to minimized wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 3 and 13, POC: (361) 487-6471	
Aransas Pass To Baffin Bay - Corpus Christi Channel/General/MSIB	MSIB	MSIB 29-25: Barge Shelves – Corpus Christi Ship Channel Cut B --- Marker relocation in the Corpus Christi Ship Channel Cut B for Corpus Christi Channel Light 38 (LLNR-28685) through Corpus Christi Channel Light 82 (LLNR-28800) is complete. These aids to navigation changes are in support of the Port of Corpus Christi Ship Channel Improvement Project, including the completion of dedicated barge lanes, which will allow for two-way traffic of vessels and barges in tandem. For additional information, mariners can contact the U.S. Coast Guard Sector Corpus Christi Command Center at (800) 874-2143, or the U.S. Coast Guard Sector Corpus Christi Waterways Management Department at: CCWaterways@uscg.mil

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Houston-Galveston, Submerged Land Act (SLA) - Galveston Bay Entrance Channel/General/MSIB	MSIB	MSIB 05-25: VTS Area Vessel Requirements --- The Captain of the Port (COTP) Houston-Galveston has received reports of vessels underway in the Vessel Traffic Service Area (VTSA) with a main engine unable to immediately achieve maximum ahead revolutions as requested by the Pilot on board. During our review of these matters, it was determined that the main engines were in good working order, but were unable to answer the full range of commands because of some type of automatic acceleration-limiting program that prevented the main engine from responding immediately. Owner/Operators are reminded that before embarking a Pilot when entering or getting underway in the navigable waters of the VTSA, main propulsion machinery should be available to immediately respond to the full range of maneuvering commands and that any load-limiting programs or automatic acceleration-limiting programs that would limit the speed of response to engine orders beyond that needed to prevent immediate damage to propulsion machinery are capable of being overridden immediately. Prior to entering the VTSA, the attending Pilot should be provided information on how any load-limiting programs or automatic acceleration-limiting programs effect the operation of the main propulsion plant and the mechanism/procedure used to override the system should that become necessary for safe navigation. Furthermore, each self-propelled vessel of 1,600 or more gross tons subject to 33 CFR Part 164 should also attempt to comply with the following: 1.) While underway in the VTSA, each vessel should have an engineering watch capable of monitoring the propulsion system, communicating to the bridge, and implementing manual control measures immediately when necessary. The watch should be physically present in the machinery spaces or in the machinery-control spaces and should consist of at least a licensed engineer. 2.) While underway in the VTSA, each vessel should pay due regard to Navigation Rule (COLREGS) 6, Safe Speed: "Every vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid collision and be stopped within a distance appropriate to the prevailing circumstances and conditions." Due regard to operating in a narrow channel should also be considered: negative hydrodynamic effects such as bank suction/cushion, sheer, and depth of the channel being prone to shoaling should be taken into consideration. Vessels should operate in such a manner as to have normal operating speed in reserve in times of extremis. The disabling of load limiting devices should be considered when reserve speed is not effective in maintaining safe navigation. In addition, the Master should ensure the Chief Engineer of the vessel has certified that the main propulsion plant is in all respects ready for operations including the main propulsion air-start systems, fuel systems, lubricating systems, cooling systems, and automation systems, that cooling, lubricating, and fuel-oil systems are at proper operating temperatures, and that main-propulsion standby systems are ready to be immediately placed in service. Please contact the Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at (281) 464-4851, if you have any questions or comments.	Lat: 29° 16' 60" Lon: -094° 35' 38"

Work barges and equipment may be relocated near Texas Petro Chemical B dock, located in Sims Bayou. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with caution. POC: (713) 806-0576 or (281) 607-6850	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Barbours Cut - Barbours Terminal Channel - Houston Ship Channel --- From: 2025-04-30 To: 2025-06-24 --- The Dredge GENERAL BRADLEY will conduct emergency dredging in the Barbours Terminal Channel and the Houston Ship Channel, in the vicinity of the Barbours Cut Flare. Work will take place 24-hours a day, 7-days a week. Floating and submerged pipeline will be located throughout the project area and used to transport dredged material to Spilman Island and dedicated Beneficial Use Sites. Additional on-scene vessels may include the Booster Barge CAL 2109, a double barrel booster, Anchor Barge CAL 2104, Crew Boat TARPON II, and T/Vs BRANDON JOHN and IWO JIMA. Mariners are urged to use extreme caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made. VHF-FM Channels: 11, 13, 71 and 82, POC: (912) 508-1351 or (832) 217-0541	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	San Jacinto Barge Channel - Dredge Operation --- From: 2025-05-16 To: Until Further Notice --- The Dredge MBI-08 is dredging in the San Jacinto Barge Channel at Turn Services. Mariners are urged to transit the area at their slowest safe speed to minimize wake. VHF-FM Channels: 13 and 76, POC: (228) 213-0600	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dredge Operation --- From: 2025-05-31 To: 2025-11-30 --- The Hopper Dredges R.B. WEEKS and MAGDALEN will be operating in the vicinity of the Houston Ship Channel and the Bayport Flare. Dredged material will be transported offshore to an ocean dredged material disposal site located south of the Galveston Entrance Channel. Work will take place 24-hours a day, 7-days a week. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (910) 512-1034 or (985) 860-3451	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	U.S. Coast Guard Sector Houston-Galveston MSIB 35-24 --- Aids to Navigation Discrepancy Reporting --- The USCG continues to operate in an environment with a high number of unreported Aids to Navigation (ATON) knockdowns within this Captain of the Port Zone. The underreporting of discrepant ATON directly affects the ability of local USCG Aids to Navigation units to effectively prioritize sections of the Marine Transportation System in a timely manner. This current environment of unreported discrepant ATON continues to increase the risk of groundings, collisions or allisions with potential of serious injuries, environmental damage, and waterway closures. To promote safety, mariners are reminded to utilize all means of visual navigation, to include the use of Electronic Chart Display Information Systems (ECDIS), and to report missing or discrepant ATON. Reports of missing and/or discrepant ATON may be made to the USCG for correction prioritization through any of the following means: VHF-FM Channel: 16, Phone: Sector Houston-Galveston Command Center, (866) 539-8114, or Sector Houston-Galveston Vessel Traffic Service, (281) 464-4837, E-Mail: houstonnwm@uscg.mil, Online: <a href="https://www.navcen.uscg.gov/contact/aton-discrepancy-report">https://www.navcen.uscg.gov/contact/aton-discrepancy-report</a>	Lat: 29° 21' 07" Lon: -094° 46' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory (MSIB 02-25) --- The Houston Ship Channel widening project is complete between Houston Ship Channel (HSC) Light 63 (LLNR-24295) through Houston Ship Channel Light 84 (LLNR-24540), approximately South Boaters Cut Channel to Atkinson Island. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep. The aids to navigation from HSC Light 63 to HSC Light 84 have been relocated based on the new channel dimensions. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 83/84. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners can contact the U.S. Coast Guard Sector Houston-Galveston Waterways Management Department at houstonnwm@uscg.mil.

Pensacola Bay - Pensacola-Mobile/General/Bridges/Construction	Bridges	GIWW, Mile 156.6, EHL - Bridge Construction --- From: 2024-09-11 To: 2025-09-30 --- New bridge construction is being conducted in the GIWW in Gulf Shores, AL, from 6:00 a.m. to 6:00 p.m., Monday through Saturday. Continuing until approximately July 2025, steel girder construction and erection will take place on the northern and southern land portions for the GIWW bridge crossing. This construction will include the assistance of cranes stationed on land, as well as, a barge mounted crane stationed on the north and south shores of the GIWW. During this construction phase, the barge mounted crane WILL NOT be stationed within the main navigational channel. After the steel girders have been erected, contractors will begin constructing the middle spans of the bridge. Middle span construction will continue until approximately September 2025. During this phase, the barge mounted ringer crane WILL be stationed within the main navigational channel. Waterway closures are expected during the middle span construction and will be communicated at a future date. Project vessels and equipment will include the T/V MISS PATSY, a 24 ft work boat, two material barges, and a 70 ft x 195 ft barge mounted ringer crane. Vessels should transit the area at no wake speed and coordinate passing arrangements in advance. VHF-FM Channels: 16, POC: (334) 737-8992

All vessel traffic restrictions have been lifted.	
Houston Ship Channel - San Jacinto River/General/MSIB	MSIB	MSIB 09-16: San Jacinto River Mud Bank --- The following operating restrictions have been put in place to mitigate unsafe conditions/hazards in the vicinity of the Mud Bank in the San Jacinto River: · Only tugboats with barges in tow are permitted on the Mud Bank. No unattended or shared barges are authorized on the Mud Bank. · The only tugboats, barges and tows permitted on the Mud Bank are those awaiting fleet space or dock space. · Tugboats, barges and tows that make use of the Mud Bank are limited to no more than 48 consecutive hours and shall not exceed this timeframe. · Tugboats, barges and tows using the Mud Bank shall not extend into the San Jacinto River beyond 162 ft from the riverbank. · No barges are permitted beyond the Channel Shipyard Dry-Dock in the direction of the ship channel. -- The Coast Guard is required by the Ports and Waterways Safety Act to maintain the safety of all U.S. waterways at all times. Coast Guard personnel will continue to monitor safety in the vicinity of the San Jacinto River Mud Bank and compliance with the above operating restrictions. Waterway users who fail to comply with the above operating restrictions will be subject to regulatory and administrative action. Persistent disregard of these operating restrictions may result in closure of the San Jacinto River Mud Bank to all tugboats, barges and tows. The Coast Guard strives to facilitate commerce by maximizing the availability of waterways and navigational safety. This can only be achieved through close coordination and cooperation with waterway users. Questions regarding operating restrictions on the San Jacinto River Mud Bank can be sent to houstonwww@uscg.mil. --	Lat: 29° 46' 36" Lon: -095° 04' 37"

Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Bridges/Inspection	Bridges	Bayou Lafourche, Mile 38.7 - LA 308 Drawbridge - Bridge Inspection and Repairs --- From: 2025-05-27 To: 2025-06-10 --- Machinery gear couplings on the LA 308 Drawbridge across Bayou Lafourche, Mile 38.7, near Larose, LA, will be inspected and repaired, if necessary. Inspections will take place from 7:00 a.m. to 5:00 p.m., daily. During these times, the draw need not open for boats. Following the inspection each day, and provided no repairs are necessary, the draw will open on signal beginning at 5:00 p.m. and ending at 7:00 a.m., the following morning. On any day, if a defective gear coupling is discovered and needs to be replaced, the draw will immediately be placed in the open-to-boat position. The draw will remain in the open-to-boat position until all parts and supplies to replace the coupling arrive at the bridge. The draw will then be set in the closed-to-boat position until repairs or replacement are completed. Repairs and the bridge closure could take place for up to 48 consecutive hours. After the coupling has been repaired or replaced, the draw will open to boats on signal for a continuous period of 48-hours. Inspections will then resume after the 48-hour opening period. If no gear couplings require repairs, the project will end at 5:00 p.m., on June 10, 2025. Mariners should contact the bridge tender to obtain the status of the bridge.
