On-scene vessels will include deck barges, spud barges, and truckable mud tugs. Mariners should transit the area with caution. VHF-FM Channel: 16, POC: (225) 571-6708 or (337) 247-1071	Lat: 29° 56' 54" Lon: -091° 50' 16"

Algiers Alternate Route

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Via Mississippi River And Harvey Canal - Algiers Alternate Route/General/Bridges/Temp Deviation	Bridges	Algiers Canal, Mile 3.7 - GIWW - SR 23 Drawbridge – Bridge Demolition and Waterway Closures --- From: 2025-05-08 To: 2025-10-25 -- - The SR 23 Fixed Bridge has opened to vehicle traffic. The SR 23 Drawbridge is being prepared for demolition. Continuing until October 25, 2025, the waterway will be closed to all vessel traffic from 6:00 a.m. to 2:30 p.m., Monday through Saturday, for demolition activities. The M/V DUTCHMAN (Call Sign: WDC4711) is the on-site contact vessel and will communicate with passing vessels to ensure safe passage through the demolition site. Mariners are urged to transit this area with extreme caution. VHF-FM Channels: 13, 14 and 16	

Apalachicola Bay

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
St George Sound - Apalachicola Bay/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Apalachicola Bay - Two Mile Channel - Shoaling --- Reported: 2025-05-27 --- Cross channel shoaling has been reported in Two Mile Channel, between Two Mile Channel Buoy 2 (LLNR-2860) and Two Mile Channel Buoy 5 (LLNR-2875). Mariners are urged to transit the area with caution.	

Apalachicola River

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Apalachicola River Entrance - Apalachicola River/General/MSIB	MSIB	Apalachicola, Chattahoochee and Flint (ACF) River System - Seasonal Channel Conditions/ATON Discrepancies --- The U.S. Army Corps of Engineers concluded the 2025 navigation season on the ACF and suspended water releases to support the 7 ft navigation channel. Current hydrological conditions, meteorological forecasts, and basin-wide modeling do not support the extension of the navigation season. Aids to navigation may be off station or riding low in the water between Miles 109.0 to 0.0, in the Apalachicola River. The relocation and replacement of these aids will be addressed when the 7-foot navigational channel is restored. POC: USACE (251) 694-4074 or USCG (251) 382-8653	Lat: 30° 42' 49" Lon: -084° 51' 55"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Lower Old River - Atchafalaya River/General/Hazards To Navigation/Obstructions	Hazards To Navigation	Little Island Pass - Exposed Pipeline --- Reported: 2025-06-10 --- An exposed pipeline has been reported near Little Island pass, in approximate position 29-44-53.11N 091-14-23.20W, along with two lighted buoys, in approximate position 29-44-49.29N 091-14-23.24W. Mariners are urged to transit the area with extreme caution.	
Atchafalaya Channel - Atchafalaya River/General/MSIB	MSIB	MSIB 016-25, Safety Alert: High Water Restrictions on the Atchafalaya River --- The Atchafalaya River gauge has reached and is forecasted to remain above 6.0 ft. In accordance with 33 CFR 165.811, the following Emergency Vessel Movement Controls (EVMC) are in place for the designated Regulated Navigation Area (RNA) that encompasses the Atchafalaya River, in the vicinity of the Morgan City Triple Span Bridges. For these restrictions, length of tow (LoT) indicates length and width of the barges, excluding length of towing vessel. a) All tows transiting the bridges will be limited to maximum tow length of 600 ft. b) All south and northbound tows with a length of tow >400 ft (regardless of horsepower) must have an additional assist boat when turning westbound into the GIWW at Mile 98.5, WHL. c) All southbound tows with a length of tow >400 ft (regardless of horsepower) must have an additional assist boat through the bridges. d) All westbound tows turning into the GIWW at Mile 98.5 shall be limited to a maximum tow length of 600 ft. e) All tows with a loaded box in the lead shall be limited to 600 ft. f) Towing on a hawser is not authorized, except when a tug is pushing ahead on a barge that is being towed on a hawser by another towing vessel, it is considered "Pushing Ahead" and shall be allowed. g) Minimal available horsepower requirements in accordance with 33 CFR 165.811(e) TABLE are in effect. h) Towing Certain Dangerous Cargoes (CDC) Barges, as defined in 33 CFR 160.202, must have available horsepower of at least 600, or three times the length of tow, whichever is greater. For double wide CDC tows, length of tow is computed as if arranged in tandem. i) All tows shall have at least 75% of the required horsepower wired-in when transiting the bridges. Once that condition is met, a shadow assist may be used to make up the remaining horsepower deficit. j) Tows shall ensure the assist boat is ready and in position to provide IMMEDIATE assistance throughout the entire transit through the RNA. k) Strong abeam currents are present near the Wax Lake Outlet. Mariners should avoid crossing at night with no prior experience. There is no requirement for an assist vessel until currents reach over 3.0 kts; however, mariners may utilize assist vessels for their transit. --Navigating vessels in high water conditions increases the risk of casualties. Mariners are reminded of their ongoing responsibility to conduct and manage their required navigation assessments and voyage plans to prepare bridge teams for known hazards. Vessel operators are strongly encouraged to continuously evaluate the experience of their mariners operating in high water conditions and consider ensuring more experienced wheelmen are on watch during critical stages of the voyage or using "posted" wheelmen to transit through high-risk areas.--	Lat: 29° 41' 39" Lon: -091° 12' 47"

Laguna Madre Channel - Brownsville Channel/General/Hazards To Navigation/Hazards	Hazards To Navigation	Brownsville Ship Channel - Dismantle and Disposal of Former U.S. Naval Vessels --- From: 2025-02-03 To: 2027-12-31 --- The International Shipbreaking Limited facility, located adjacent to the Brownsville Ship Channel, is actively dismantling and disposing of U.S. Navy ships. All passing vessels, including tour boats, fishing vessels, and recreational vessels, should remain in the channel and away from shipbreaking activity due to potential hazards associated with overhead industrial work. POC: (956) 831-2299, Email: arnie.tyler@internationalshipbreaking.com or daniel.l.richardson20.civ@us.navy.mil	
Laguna Madre Channel - Brownsville Channel/General/Hazards To Navigation/Obstructions	Hazards To Navigation	Brownsville Ship Channel - ATON Wreckage --- Brownsville Channel A Range Front Light (LLNR-29870) has been reported destroyed and partially submerged outside of the channel in approximate position 26-01-50.722N 097-13-32.099W. The partially submerged structure has been marked channel ward of the wreckage with a lighted buoy displaying a quick flashing green light at night, in approximate position 26-01-50.883N 097-13-32.253W.	Lat: 26° 01' 51" Lon: -097° 13' 32"
Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brazos Santiago Pass - Brownsville Ship Channel - Dredge Operation --- From: 2024-08-28 To: 2026-03-26 --- Dredging is taking place in the Brownsville Ship Channel for the Brazos Island Harbor Channel Improvement and Rio Grande LNG Dredge Project. Operations will be conducted 24-hours a day, 7-days a week. The Cutter Suction Dredges OHIO and CAROLINA will be pumping dredged material from the ship channel to the Upland Placement Areas located adjacent and south of the channel. Dredged material will be placed within the Placement Areas through varying lengths of floating hose, submerged pipeline, pontoon pipeline and shore pipeline. Thirty-inch submerged pipelines will cross the channel between Brownsville Channel Lights 35 (LLNR-29895/43015) and 37 (LLNR-29915/43035) and a booster pump will be positioned along the south side of the channel in the same area. Additional submerged pipeline has been installed along the south side of the ship channel between Laguna Madre Channel Light 27 (LLNR-29600) and Brownsville Channel Light 41 (LLNR-29940). A spud barge with a floating dock will be staged along the green side of the channel, across from Laguna Madre Channel Light 28 (LLNR-29605). Additional support vessels and equipment include the Boosters JESSIE, CAPT. BARNEY, and BOOSTER 9, auxiliary equipment, pipe rafts, barges and towing vessels. Staging areas will be located throughout the project area, along the Brownsville Ship Channel and Port Isabel Channel. Mariners should transit the project area with extreme caution and coordinate passing arrangements in advance. VHF-FM Channels: 10, 12 and 16, POC: (252) 342-4971 or (630) 207-3593	

Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brownsville Ship Channel - Brazos Island Harbor Channel - Dredge Operation --- From: 2024-11-27 To: 2026-05-06 --- The Dredges GENERAL MARSHAL and GENERAL BRADLEY will work in the Brownsville Ship Channel, 24-hours a day, 7-days a week. Dredges may work in the area simultaneously or individually during the project. On-scene vessels and equipment will include barges, tugboats, survey boats, skiffs, and floating and submerged pipeline. Vessels should coordinate passing arrangements with the dredge 1-hour in advance. Mariners are urged to transit the area at their slowest safe speed and proceed with caution. VHF-FM Channels: 13 and 72, POC: USACE (956) 638-2026	
Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brownsville Channel - Dredge Operation --- From: 2025-06-15 To: 2025-07-16 --- The Dredge GENERAL MACARTHUR will conduct dredging in the Brownsville Channel. Work will take place 24-hours a day, 7-days a week. Pipeline will be setup behind the dredge using a combination of floating, steel submerged, and HDPE shore pipeline. Dredged material will be transported via various lengths of pipeline to a placement site in the Port of Brownsville. Vessels should coordinate passing arrangements 1-hour in advance. Mariners are requested to avoid passing or overtaking at the crossing and should transit at their slowest safe speed to minimize wake. VHF-FM Channels: 13 and 72, POC: (409) 407-5605	
Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brownsville Channel - Laguna Madre Channel - Submerged Pipeline --- From: 2025-06-03 To: Until Further Notice --- A portion of submerged pipeline has been laid in shallow water on the green side of the channel, between Laguna Madre Channel Light 21 (LLNR-29585) and Laguna Madre Channel Light 27 (LLNR-29600). The pipeline is marked with Danger Buoys. Vessels with a draft more than 2 ft should not cross or transit near the pipe. Mariners are urged to transit the area with caution.

Aransas Pass To Baffin Bay - Corpus Christi Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Corpus Christi Channel - Dredge Operation --- From: 2025-05-07 To: 2025-06-20 --- The Dredge EMIL KURTZ is conducting dredging in the Corpus Christi Channel, between Miles 10.0 and 13.0. Work will take place 24-hours a day, 7-days a week. The floating plant will consist of approximately 22,000 ft of combined steel, plastic, and floating pipeline, three anchor barges (#24, #21, and #9), one fuel barge, one supply barge, and the M/Vs JESUS F., SAM S., WYATT C., and MINNIE T. Passing arrangements should be made 45-minutes in advance. Mariners are urged to transit at their SLOWEST SAFE SPEED to minimized wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 3 and 13, POC: (361) 487-6471	
Aransas Pass To Baffin Bay - Corpus Christi Channel/General/MSIB	MSIB	MSIB 29-25: Barge Shelves – Corpus Christi Ship Channel Cut B --- Marker relocation in the Corpus Christi Ship Channel Cut B for Corpus Christi Channel Light 38 (LLNR-28685) through Corpus Christi Channel Light 82 (LLNR-28800) is complete. These aids to navigation changes are in support of the Port of Corpus Christi Ship Channel Improvement Project, including the completion of dedicated barge lanes, which will allow for two-way traffic of vessels and barges in tandem. For additional information, mariners can contact the U.S. Coast Guard Sector Corpus Christi Command Center at (800) 874-2143, or the U.S. Coast Guard Sector Corpus Christi Waterways Management Department at: CCWaterways@uscg.mil

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Houston-Galveston, Submerged Land Act (SLA) - Galveston Bay Entrance Channel/General/MSIB	MSIB	MSIB 05-25: VTS Area Vessel Requirements --- The Captain of the Port (COTP) Houston-Galveston has received reports of vessels underway in the Vessel Traffic Service Area (VTSA) with a main engine unable to immediately achieve maximum ahead revolutions as requested by the Pilot on board. During our review of these matters, it was determined that the main engines were in good working order, but were unable to answer the full range of commands because of some type of automatic acceleration-limiting program that prevented the main engine from responding immediately. Owner/Operators are reminded that before embarking a Pilot when entering or getting underway in the navigable waters of the VTSA, main propulsion machinery should be available to immediately respond to the full range of maneuvering commands and that any load-limiting programs or automatic acceleration-limiting programs that would limit the speed of response to engine orders beyond that needed to prevent immediate damage to propulsion machinery are capable of being overridden immediately. Prior to entering the VTSA, the attending Pilot should be provided information on how any load-limiting programs or automatic acceleration-limiting programs effect the operation of the main propulsion plant and the mechanism/procedure used to override the system should that become necessary for safe navigation. Furthermore, each self-propelled vessel of 1,600 or more gross tons subject to 33 CFR Part 164 should also attempt to comply with the following: 1.) While underway in the VTSA, each vessel should have an engineering watch capable of monitoring the propulsion system, communicating to the bridge, and implementing manual control measures immediately when necessary. The watch should be physically present in the machinery spaces or in the machinery-control spaces and should consist of at least a licensed engineer. 2.) While underway in the VTSA, each vessel should pay due regard to Navigation Rule (COLREGS) 6, Safe Speed: "Every vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid collision and be stopped within a distance appropriate to the prevailing circumstances and conditions." Due regard to operating in a narrow channel should also be considered: negative hydrodynamic effects such as bank suction/cushion, sheer, and depth of the channel being prone to shoaling should be taken into consideration. Vessels should operate in such a manner as to have normal operating speed in reserve in times of extremis. The disabling of load limiting devices should be considered when reserve speed is not effective in maintaining safe navigation. In addition, the Master should ensure the Chief Engineer of the vessel has certified that the main propulsion plant is in all respects ready for operations including the main propulsion air-start systems, fuel systems, lubricating systems, cooling systems, and automation systems, that cooling, lubricating, and fuel-oil systems are at proper operating temperatures, and that main-propulsion standby systems are ready to be immediately placed in service. Please contact the Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at (281) 464-4851, if you have any questions or comments.	Lat: 29° 16' 60" Lon: -094° 35' 38"

GIWW West/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Colorado River - GIWW - Lock Closure --- From: 2025-04-01 To: 2025-06-27 --- The Colorado River Locks on the GIWW, Miles 441.0 and 442.0, WHL, will be closed to marine traffic for repairs from 7:00 a.m. to 5:00 p.m., Monday through Friday, excluding federal holidays. Mariners should confirm closure times prior to transiting the area to avoid delays. POC: Lockmaster (979) 863-7842, ext. 2002, or (979) 482-7321	

GIWW West/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Caney Creek Cutoff - GIWW, Mile 420.5, WHL - Dredge Operation --- From: 2025-06-05 To: 2025-07-17 --- Maintenance dredging will be conducted at the Caney Creek Cutoff, located along the GIWW, near Mile 420.5, WHL. Dredged material will be placed at approved disposal sites located south of the GIWW via floating and submerged pipelines. Pre and post dredging surveys and hazard surveys will also be conducted throughout the project area. Two-way traffic will be maintained on the GIWW; however, short-term delays may occur during daylight hours for pipeline crossings and equipment relocation. Mariners are urged to transit the area at their slowest safe speed to minimize wake and should coordinate passing arrangements in advance. VHF-FM Channels: 13 and 16, POC: (979) 417-6045

South Pass - Head Of Passes To New Orleans/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River, LDB, Mile 24.0, AHOP - Subaqueous Stone Placement --- From: 2025-05-06 To: 2025-09-06 --- A U.S. Government Contractor will be placing subaqueous stone along the LDB of the Mississippi River at approximate Mile 24.0, AHOP. The contractor will work daily for 10 hours a day, during daylight hours. The plant will include a spud barge with a hydraulic backhoe, the M/V OSCAR WALTERS, an office barge and various material barges, which will be on-site and staged along the river at this location. During nighttime hours, the contractor will be staged along the LDB out of the Mississippi River Channel. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 67 and 79, POC: (318) 452-5448, USACE (337) 295-3498	
South Pass - Head Of Passes To New Orleans/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	New Orleans Harbor - Algiers Canal - Dredge Operation --- From: 2025-05-23 To: 2025-08-31 --- The Dredge CAPTAIN FRANK and attendant plant will conduct dredging in the New Orleans Harbor, in the Lock Forebay Regions of the Inner Harbor Navigation Canal Lock (Mile 92.5, AHOP), Algiers Lock (Mile 88.0 AHOP), and Harvey Lock (Mile 98.3, AHOP). Dredged material will be discharged outside of the channel in the Mississippi River through approximately 800 to 3,000 ft of floating pipeline. Staged equipment and vessels will be located on the LDB near Mile 96.3, AHOP, and the landing location will be located near Mile 95.7, AHOP. Operations will be conducted 24-hours a day, 7-days a week. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. VHF-FM Channels: 13, 16, and 67, POC: (224) 563-4432, (224) 221-3753, or (985) 688-9741

Hopper barges will be loaded at the dredge site and transported to an unloader barge located at the placement area along the upper San Jacinto River. On-scene vessels will include the Dredges MBI-05, MBI-08, and multiple towing vessels. Mariners should transit the area with caution. VHF-FM Channel: 16, POC: MBI-05 (228) 224-7395 and MBI-08 (228) 213-0600	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	U.S. Coast Guard Sector Houston-Galveston MSIB 35-24 --- Aids to Navigation Discrepancy Reporting --- The USCG continues to operate in an environment with a high number of unreported Aids to Navigation (ATON) knockdowns within this Captain of the Port Zone. The underreporting of discrepant ATON directly affects the ability of local USCG Aids to Navigation units to effectively prioritize sections of the Marine Transportation System in a timely manner. This current environment of unreported discrepant ATON continues to increase the risk of groundings, collisions or allisions with potential of serious injuries, environmental damage, and waterway closures. To promote safety, mariners are reminded to utilize all means of visual navigation, to include the use of Electronic Chart Display Information Systems (ECDIS), and to report missing or discrepant ATON. Reports of missing and/or discrepant ATON may be made to the USCG for correction prioritization through any of the following means: VHF-FM Channel: 16, Phone: Sector Houston-Galveston Command Center, (866) 539-8114, or Sector Houston-Galveston Vessel Traffic Service, (281) 464-4837, E-Mail: houstonwwm@uscg.mil, Online: https://www.navcen.uscg.gov/contact/aton-discrepancy-report	Lat: 29° 21' 07" Lon: -094° 46' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory (MSIB 02-25) --- The Houston Ship Channel widening project is complete between Houston Ship Channel (HSC) Light 63 (LLNR-24295) through Houston Ship Channel Light 84 (LLNR-24540), approximately South Boaters Cut Channel to Atkinson Island. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep. The aids to navigation from HSC Light 63 to HSC Light 84 have been relocated based on the new channel dimensions. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 83/84. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners can contact the U.S. Coast Guard Sector Houston-Galveston Waterways Management Department at houstonwwm@uscg.mil .	
Galveston Bay Entrance Channel - Houston Ship Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	In order to provide a more efficient and effective Aid to Navigation signal, the Coast Guard is proposing the following Aid to Navigation Changes: Relocate Lower Red Light Bend Outbound Range Front Light (LLNR-25070) in approximate position 29-41-58.528N/094-59-50.647W showing Q R, 24ft to approximate position 29-41-58.401N/094-59-49.479W, showing Q R, 15ft. Comments will be taken until July 29, 2025. Please email comments regarding this proposal to: D08-SMB-District-LocalNoticeFeedback@uscg.mil	Lat: 29° 41' 59" Lon: -094° 59' 51"

Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	Inner Harbor Navigation Canal, Mile 2.9 - Almonaster Avenue Drawbridge - Bridge Repairs --- From: 2024-10-03 To: 2025-06-30 --- The Almonaster Avenue Drawbridge crossing the Inner Harbor Navigation Canal, Mile 2.9, will undergo repairs. Bridge repairs will be conducted from 6:30 a.m. to 5:00 p.m., Monday through Friday. During working hours, a single 35 ft wide barge will be working in the channel, adjacent to the bridge protection system. Mariners requiring movement of the barge should coordinate with the bridge tender 2-hours in advance. After working hours, the barge will be removed from the channel. To coordinate movement of the barge, mariners should contact the bridge tender, at (504) 945-3112, or on VHF-FM Channel 13.	Lat: 30° 00' 16" Lon: -090° 01' 33"
Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	Inner Harbor Navigation Canal - GIWW - Seabrook Avenue Railroad Drawbridge - Repairs --- From: 2025-03-31 To: 2025-06-30 --- The bridge protection system on the Seabrook Avenue Railroad Drawbridge across the Inner Harbor Navigation Canal, Mile 4.5, is being repaired. Work will take place from 6:30 a.m. until 5:00 p.m., Monday through Friday. A single 35 ft wide barge will be working in the channel adjacent to the bridge protection system. The work barge can be removed from the channel to allow boats to safely pass with 2-hours advance notice to the bridge tender. The work barge will be removed from the channel after working hours. For updated information, mariners should contact the bridge tender on VHF-FM Channel 13 or at (504) 282-7070.	Lat: 30° 01' 53" Lon: -090° 02' 04"
Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	New Orleans Harbor - Inner Harbor Navigation Canal - Dredge Operation --- From: 2025-05-23 To: 2025-08-31 --- The Dredge CAPTAIN FRANK and attendant plant will conduct dredging in the New Orleans Harbor, in the Lock Forebay Regions of the Inner Harbor Navigation Canal Lock (Mile 92.5, AHOP), Algiers Lock (Mile 88.0 AHOP), and Harvey Lock (Mile 98.3, AHOP). Dredged material will be discharged outside of the channel in the Mississippi River through approximately 800 to 3,000 ft of floating pipeline. Staged equipment and vessels will be located on the LDB near Mile 96.3, AHOP, and the landing location will be located near Mile 95.7, AHOP. Operations will be conducted 24-hours a day, 7-days a week. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. VHF-FM Channels: 13, 16, and 67, POC: (224) 563-4432, (224) 221-3753, or (985) 688-9741

Operations will take place from 6:00 a.m. to 8:00 p.m., daily. On-scene vessels will include towing vessels, the 300 ft by 100 ft Barge MARMAC-301, and the 260 ft by 72 ft Barge MARMAC-304. Mariners are requested to transit the area at no wake speed and proceed with caution. VHF-FM Channels: 10 and 67, POC: (936) 402-7890 and (225) 610-0699	Lat: 30° 11' 23" Lon: -091° 00' 58"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River Deep Draft Crossings - Dredge Operation --- From: 2025-05-20 To: Until Further Notice --- The Dredge HURLEY will be working at the Mississippi River Deep Draft Crossings, Mile 115.0 to Mile 235.0, AHOP, between Baton Rouge and New Orleans, LA. The dredge will start working at the Baton Rouge Front Crossing, near Mile 231.0, AHOP. Work will take place 24-hours a day, 7-days a week. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	Lat: 30° 27' 53" Lon: -091° 11' 50"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River Deep Draft Crossings - Dredge Operation --- From: 2025-05-21 To: Until Further Notice --- The Dredge WALLACE McGEORGE will be working at the Mississippi River Deep Draft Crossings, Mile 115.0 to Mile 235.0, AHOP, between Baton Rouge and New Orleans, LA. The dredge will start working at the Alhambra Crossing, near Mile 190.5, AHOP. Work will take place 24-hours a day, 7-days a week. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	Lat: 30° 11' 58" Lon: -091° 06' 33"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River - Bringier Point - Dredge Operation --- From: 2025-06-13 To: 2025-06-26 --- The Dredge HAROLD M. is conducting dredging at Bringier Point, LDB, Mile 172.1, AHOP. The dredge is located 650 ft off the LDB and restricting the waterway. Dredge pipeline will block the river from the dredge to the bank. Additional on-scene vessels include T/Vs MISS SISS and MISS PAULINE, a crane barge, and a supply barge. U.S. Coast Guard VTS-Lower Mississippi River (VTS-LMR) is implementing one-way traffic for all large line tows and deep draft vessels, with no meeting or over-taking in the area. The VTS-LMR will coordinate vessel traffic in the area. For further information, mariners can contact the dredge on VHF-FM Channel 67 and 6, or contact the VTS-LMR at (504) 365-2514 or on VHF-FM Channel 05A.	
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River - Dredge Operation --- From: 2025-06-28 To: 2025-07-12 --- The Dredge HAROLD M. is conducting dredging at Mile 165.0, LDB, AHOP. The dredge is located 650 ft off the LDB and restricting the waterway. Dredge pipeline will block the river from the dredge to the bank. Additional on-scene vessels include T/Vs MISS SISS and MISS PAULINE, a crane barge, and a supply barge. U.S. Coast Guard VTS-Lower Mississippi River (VTS-LMR) recommends all large line tows and deep draft vessels operate under a one-way traffic pattern in the area, with no meeting or overtaking. For further information, mariners can contact the dredge on VHF-FM Channel 67 and 6, or contact the VTS-LMR at (504) 365-2514 or on VHF-FM Channel 05A.	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Mississippi River, Mile 109.5 to 110.5, AHOP - Waterway Restrictions --- From: 2025-04-29 To: Until Further Notice --- U.S. Coast Guard Vessel Traffic Service (VTS) Lower Mississippi River (LMR) has established a VTS measure for all waters of the Lower Mississippi River from Mile 109.5 to 110.5, AHOP, due to a sunk barge near Mile 110.5. The following vessel traffic restrictions are in place: • All vessels shall transit at their slowest safe speed. • All vessels shall avoid meeting or overtaking in this area. For additional information, mariners can contact the VTS-LMR at (504) 365-2514.	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Mississippi River, Mile 219.0 to 229.0, AHOP - Port Allen Canal - Port Allen Lock - High Water Safety Advisory --- From: 2025-04-08 To: Until Further Notice --- The Baton Rouge Gauge is expected to reach 30 ft and continue to fall, therefore, the U.S. Coast Guard COTP New Orleans has issued a Safety Advisory for waters of the Lower Mississippi River (LMR), from Mile 219.0 to Mile 229.0, AHOP. In accordance with the Waterway Action Plan Baton Rouge Annex, for the Port Allen Lock and LMR: 1) All tows greater than 600 ft (excluding the towboat) are recommended to employ an assist vessel of at least 1,200 hp when entering the Port Allen Lock. 2) All tows exiting the Port Allen Lock intending to turn northbound are recommended to use an assist vessel or proceed southbound below Mile 221.0 before heading north. 3) Companies should consider staffing vessels with the most experienced crews. 4) Towing vessels shall catch a headline when entering the Port Allen Lock. 5) Vessels will be put on queue for lock turn when their tow is built and may remain in the area in which their tow was built until it is time for lock turn.

Pensacola Bay - Pensacola-Mobile/General/Bridges/Construction	Bridges	GIWW, Mile 156.6, EHL - Bridge Construction --- From: 2024-09-11 To: 2025-09-30 --- New bridge construction is being conducted in the GIWW in Gulf Shores, AL, from 6:00 a.m. to 6:00 p.m., Monday through Saturday. Continuing until approximately July 2025, steel girder construction and erection will take place on the southern land portions for the GIWW bridge crossing. This construction will include the assistance of cranes stationed on land, as well as, a barge mounted crane stationed on the north and south shores of the GIWW. During this construction phase, the barge mounted crane WILL NOT be stationed within the main navigational channel. After the steel girders have been erected, contractors will begin constructing the middle spans of the bridge in August 2025. Middle span construction will continue until approximately September 2025. During this phase, the barge mounted ringer crane WILL be stationed within the main navigational channel. Waterway closures are expected during the middle span construction and will be communicated at a future date. Project vessels and equipment will include the T/V MISS PATSY, a 24 ft work boat, two material barges, and a 70 ft x 195 ft barge mounted ringer crane. Vessels should transit the area at no wake speed and coordinate passing arrangements in advance. VHF-FM Channels: 16, POC: (334) 737-8992

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Houston Ship Channel - San Jacinto River/General/MSIB	MSIB	MSIB 09-16: San Jacinto River Mud Bank --- The following operating restrictions have been put in place to mitigate unsafe conditions/hazards in the vicinity of the Mud Bank in the San Jacinto River: · Only tugboats with barges in tow are permitted on the Mud Bank. No unattended or shared barges are authorized on the Mud Bank. · The only tugboats, barges and tows permitted on the Mud Bank are those awaiting fleet space or dock space. · Tugboats, barges and tows that make use of the Mud Bank are limited to no more than 48 consecutive hours and shall not exceed this timeframe. · Tugboats, barges and tows using the Mud Bank shall not extend into the San Jacinto River beyond 162 ft from the riverbank. · No barges are permitted beyond the Channel Shipyard Dry-Dock in the direction of the ship channel. -- The Coast Guard is required by the Ports and Waterways Safety Act to maintain the safety of all U.S. waterways at all times. Coast Guard personnel will continue to monitor safety in the vicinity of the San Jacinto River Mud Bank and compliance with the above operating restrictions. Waterway users who fail to comply with the above operating restrictions will be subject to regulatory and administrative action. Persistent disregard of these operating restrictions may result in closure of the San Jacinto River Mud Bank to all tugboats, barges and tows. The Coast Guard strives to facilitate commerce by maximizing the availability of waterways and navigational safety. This can only be achieved through close coordination and cooperation with waterway users. Questions regarding operating restrictions on the San Jacinto River Mud Bank can be sent to houstonwmm@uscg.mil. --	Lat: 29° 46' 36" Lon: -095° 04' 37"

Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Bridges/Inspection	Bridges	Bayou Lafourche, Mile 38.7 - LA 308 Drawbridge - Bridge Inspection and Repairs --- From: 2025-05-27 To: 2025-06-30 --- Machinery gear couplings on the LA 308 Drawbridge across Bayou Lafourche, Mile 38.7, near Larose, LA, will be inspected and repaired, if necessary. Inspections will take place from 7:00 a.m. to 5:00 p.m., daily. During these times, the draw need not open for boats. Following the inspection each day, and provided no repairs are necessary, the draw will open on signal beginning at 5:00 p.m. and ending at 7:00 a.m., the following morning. On any day, if a defective gear coupling is discovered and needs to be replaced, the draw will immediately be placed in the open-to-boat position. The draw will remain in the open-to-boat position until all parts and supplies to replace the coupling arrive at the bridge. The draw will then be set in the closed-to-boat position until repairs or replacement are completed. Repairs and the bridge closure could take place for up to 48 consecutive hours. After the coupling has been repaired or replaced, the draw will open to boats on signal for a continuous period of 48-hours. Inspections will then resume after the 48-hour opening period. If no gear couplings require repairs, the project will end at 5:00 p.m., on June 10, 2025. Mariners should contact the bridge tender to obtain the status of the bridge.
