New Orleans To Baton Rouge - Lower Mississippi River/General/MSIB	MSIB	The U.S. Coast Guard COTP Lower Mississippi River has issued a high water Safety Advisory between approximate Miles 439.0 and 303.0. Mariners are advised to transit the Lower Mississippi River with caution due to the hazardous conditions associated with strong currents, severe outdrafts, missing/off station aids to navigation and diving buoys. The U.S. Coast Guard COTP Lower Mississippi River, with the concurrence of the Lower Mississippi River Committee, recommends the following limits for tows transiting between Miles 439.0 and 303.0 when the Memphis Gauge reaches 25 feet, and/or Greenville Gauge reaches 45 feet and/or Vicksburg Gauge reaches 36 feet. All down-bound tows: Towing vessels must have at least 240 hp, per barge, with a maximum tow size of 36 barges. Towing vessels with less than 6,000 hp, a maximum tow size of 25 barges. Towing vessels with 6,001 hp to 7,200 hp, a maximum tow size of 30 barges. Towing vessels with 7,201 hp to 8,400 hp, a maximum tow size of 35 barges. Towing vessels with greater than 8,401 hp, a maximum tow size of 36 barges. Refer to the Waterways Action Plan for further details. All up-bound tows: Must maintain an average speed of 3 MPH, over the ground, for 2 miles leading up to the Memphis and/or Vicksburg Bridges. If a tow is unable to average 3 MPH, it must arrange for an assist tug or reduce tow size through the Memphis and/or Vicksburg Bridges. Fleet operators should regularly check their fleet and immediately report barge breakaways to the U.S. Coast Guard. Mariners are requested to contact the U.S. Coast Guard Western Rivers Command Center at (866) 777-2784, or via VHF-FM Channel 16, for additional information or to report areas of concern. New Orleans To Baton Rouge - Lower Mississippi River/General/MSIB	MSIB	Mississippi River, Mile 232.0 to 237.0, AHOP - Wilkinson Point - High Water Safety Advisory --- From: 2025-04-10 To: Until Further Notice --- The Baton Rouge Gauge is expected to reach 30 ft and continue to rise. The COTP New Orleans has issued the following updated Safety Advisories for waters of the Lower Mississippi River (LMR), from Mile 232.0 to Mile 237.0, AHOP: -- Line Tows Transiting Wilkinson Point -- A. Companies should consider staffing vessels with their most experienced crews. B. Tows should be kept to a maximum of 36 barges. C. All tow operators and towing companies should use a ratio of 240 hp per standard barge or 480 hp per oversize barge for southbound transits. For the purpose of this calculation, barges with dimensions 290 ft x 50 ft or larger are considered "oversize" while barges with dimensions less than 290 ft x 50 ft are considered "standard". If one of the barge dimensions (length or width) meets or exceeds the 290 ft x 50 ft, the barge is considered "oversize". Empty barges may be calculated at ½ the horsepower requirements to that of a loaded barge when computing the overall horsepower requirement. Towing vessels with Z-drive propulsion types may be treated as having a horsepower 20% greater than the engine's rating for the purpose of this calculation.
