| Ohio River - Allegheny/General/Bridges/Inspection                                                          | Bridges                                 | Fort Duquesne Bridge: Continuing through February 25, 2026, inspection operations will be conducted on the bridge. Work will be conducted Monday through Saturday. Work will extend up to 150 feet over the river, on the north side of the bridge. There will be a containment system set up that will reduce vertical clearance by 1.5 feet. All mariners are reminded to transit the bridge with caution and report any unsafe conditions to the United States Coast Guard. | Lat: 40° 26' 40"<br>Lon: -080° 00' 33" |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Commencing November 12, 2025 and continuing until December 20, 2025, the Allegheny River Lock and Dam 2, Mile 6.7, will be closed for maintenance. Mariners are urged to use caution in the area and should monitor VHF-FM Channel 13 for updates or changes to the L/D closure.                                                                                                                                                                                               |                                        |

| Ohio River - Kanawha River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Commencing November 6, 2025 and continuing through November 22, 2025, an overhead transmission wire crossing project will take place over the Kanawha River in the vicinity of Mile 54.4. Operations will take place from 8:00 a.m. to 7:00 p.m., daily. As a safety precaution, vessels may be requested to stop their transit for short periods of time while wires cross the river. The T/V BAILEY MATTHEW will monitor VHF-FM Channels 13 and 16. Mariners are urged to exercise caution, maintain proper lookouts and should coordinate passing arrangements with on-scene safety vessels during the operational period. | Lat:<br>38° 22' 21"<br>Lon:<br>-081° 42' 06" |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                            | Marine Construction (Excluding Bridges) | Continuing through November 20, 2025, water testing equipment will be installed on the Kanawha River in the vicinity of the southern channel at Mile 55.0, near Blaine Island. Operations will be conducted during daylight hours. The water testing equipment will be installed below the mudline, with marker buoys that will be four to five feet under the waterline. Vessels are urged to transit the area with extreme caution and at their slowest safe speed. For additional information, mariners can contact U.S. Coast Guard Sector Ohio Valley on VHF-FM Channel 16.                                              | Lat:<br>38° 22' 23"<br>Lon:<br>-081° 41' 26" |
| Ohio River - Kanawha River/General/Miscellaneous                                                                                      | Miscellaneous                           | Continuing until December 2025, Union Carbide Corporation South Charleston Facility will deploy a 75-foot by 50-foot sorbent boom alongside Blaine Island's south bank, in the vicinity of Mile 55.3. The boom will be in place 24-hours a day, 7-days a week, and lighted accordingly. Mariners are urged to exercise caution in the area.                                                                                                                                                                                                                                                                                   |                                              |

| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Continuing until April 17, 2026, work will be conducted at the McAlpine Locks and Dam, Mile 606.8. The contractor will continue repair work on the Portland Canal wall at the upstream end of the canal. Operations will be conducted up to 12-hours each day, Monday through Saturday. During working hours, the contractor will have a 52-foot-wide floating plant at the mouth of the canal moored at the site of repair. Outside of working hours, the contractor's floating plant will be moored on the Indiana side of the channel just downstream of the L&I Bridge, in the Portland Canal. The floating plant will consist of a crane barge, excavator barge, work vessel, two material barges, and a dive/crew vessel. The contractor will have lighted floats/buoys marking the site of the repair. Mariners are requested to avoid this area to prevent disturbance to the ongoing construction. Traffic restrictions will be in place Monday through Saturday, as detailed below: 1) Normal Pool: Vessel Traffic Service (VTS) deactivated, McAlpine Upper Gage less than 13 ft. • 7:00 a.m. - 10:00 a.m., only upbound traffic will be permitted. • 10:00 a.m. - 3:00 p.m., no traffic will transit the Portland Canal while diving activities are underway. • 3:00 p.m. - 7:00 p.m., only upbound traffic will be permitted. • 7:00 p.m. - 7:00 a.m., normal operations with upbound and downbound traffic will be permitted. 2) Moderately High Water: VTS activated, McAlpine Upper Gage between 13 ft and 15 ft (shortened work hours will be in place, with only 5 work hours per day). • 10:00 a.m. - 3:00 p.m., no traffic will transit the Portland Canal while diving activities are underway. • 3:00 p.m. - 10:00 a.m., normal operations with upbound and downbound traffic will be permitted. 3) High Water: VTS activated, McAlpine Upper Gage greater than 15 ft. • No contractor work will take place during this river condition and no traffic restrictions will be in place for the repair project. • Traffic shall take direction from McAlpine lock operators for all lockage procedures. Vessels should contact the M/V MISS LINDA for passing instructions on VHF-FM Channel 14. Upbound traffic should initiate contact at the L&I Railroad Bridge prior to reaching the work site. Mariners are urged to transit this area with extreme caution. | Lat:<br>38° 16' 39"<br>Lon:<br>-085° 47' 24" |

| General/Marine Construction (Excluding Bridges)/Dredging                                             | Marine Construction (Excluding Bridges) | Continuing through November 16, 2025, dredging will be conducted in the vicinity of Mile 652.0. The Dredge MIDWAY will monitor VHF-FM Channels 13 and 71. Mariners are urged to transit with caution and at their slowest safe speed to minimize wake.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                     |
| New Orleans To Baton Rouge - Lower Mississippi River/General/Miscellaneous                           | Miscellaneous                           | A concrete revetment has been reported 200 feet off the RDB at Mile 914.0, near Island 8 Head Light. Mariners are advised to favor the LDB and exercise caution in the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                     |
| New Orleans To Baton Rouge - Lower Mississippi River/General/Miscellaneous                           | Miscellaneous                           | The U.S. Coast Guard COTP Ohio Valley, with the concurrence of the Lower Mississippi River Committee, has placed the following safety advisory on the Lower Mississippi River, from Mile 869.0 to 953.8: Northbound tows are to have drafts no greater than 10 ft with tows configured no more than 4 barges wide, fully loaded, and no more than 6 wide total. Tows shall be configured no more than 7 barges long. Southbound tows are to have drafts no greater than 11 ft, with tows configured no more than 6 barges wide. Mariners should transit with caution and are advised that USACE maintained depth and width may not be available on all buoy lines. Mariners are requested to contact U.S. Coast Guard Sector Ohio Valley via VHF-FM Channel 16 or at (800) 253-7465, to report shoaling, hazardous conditions, or missing aids to navigation.                                                                                                                                                                                                                                                                                                                                                                                                                              |                                     |
| New Orleans To Baton Rouge - Lower Mississippi River/General/Miscellaneous                           | Miscellaneous                           | Low water pumping operations are taking place at the New Madrid Power Station intake structure. Mariners are urged to transit at their slowest safe speed to minimize wake from Mile 885.0 to 883.0.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                     |
| New Orleans To Baton Rouge - Lower Mississippi River/General/Miscellaneous                           | Miscellaneous                           | A dangerous cross current has been reported by the southernmost weir dike, along the RDB, in the vicinity of Mile 414.0. Mariners are urged to exercise caution in the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                     |
| General/Miscellaneous                                                                                | Miscellaneous                           | A red buoy has been reported off station near the middle of the channel in the vicinity of Mile 920.7. Mariners should transit the area with caution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                     |
| General/Miscellaneous                                                                                | Miscellaneous                           | Continuing until further notice, mariners should sail the Lower Mississippi River, Miles 708.0 to 710.0, using only physical buoys. The virtual buoys in Rosepoint have been reported inaccurate between Mile 708.0 and 710.0. Vessels are urged to transit this area with extreme caution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                     |
| General/Miscellaneous                                                                                | Miscellaneous                           | A buoy has been reported off station and mid-channel in the vicinity of Mile 598.8. Mariners are advised to transit the area with caution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                     |
| New Orleans To Baton Rouge - Lower Mississippi River/General/MSIB                                    | MSIB                                    | The U.S. Coast Guard COTP Lower Mississippi River has issued a low water Safety Advisory between approximate Miles 869.0 and 303.0. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation. The U.S. Coast Guard COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, recommend the following limits for tows: Southbound tows between Miles 869.0 and 303.0 Drafts no greater than 10.0 feet. Barges to be configured no more than 6 wide. Barges drafting over 10.0 feet shall transit below Mile 303.0 no later than October 8, 2025. Northbound tows between Miles 869.0 and 303.0 Drafts no greater than 9.6 feet. Barges to be configured no more than 6 wide. Barges to be configured no more than 4 wide for max on loads. Barges to be configured no more than 7 long. Barges currently in the system, with drafts greater than the advised depths, should be placed as near to the center of the tow as possible. Mariners are requested to contact U.S. Coast Guard Western Rivers Command Center via VHF-FM Channel 16 or at (866) 777-2784, to report areas of shoaling, hazardous conditions or missing aids to navigation. | Lat: 36° 20' 06" Lon: -089° 32' 59" |

| Lower Mississippi River - Ohio River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Continuing until December 31, 2025, cofferdam construction will be conducted to install a new municipal intake along the right descending bank of the Ohio River, Mile 350.7. Work will be performed from 7:00 a.m. through 3:30 p.m., Monday through Friday. The contractor's floating plant will consist of the M/V MARY JANE, one barge mounted crane, and two material barges. During non-working hours the contractor's floating plant will be moored at the worksite and lighted accordingly. The M/V MARY JANE will be monitoring VHF-FM Channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution.                                                                                                                       |                                        |
| Lower Mississippi River - Ohio River/General/Marine Construction (Excluding Bridges)/Dredging                                                   | Marine Construction (Excluding Bridges) | Commencing September 19, 2025, and continuing until November 7, 2025, Superior Marine Ways Inc., will be conducting facility maintenance dredging along the LDB, in the vicinity of Mile 315.4. The contractor's floating plant will consist of the M/V MORGAN LEE, one barge mounted crane and one material barge. Work will be conducted from 7:00 a.m. until 7:00 p.m., Monday through Saturday. The M/V MORGAN LEE will monitor VHF-FM Channel 13 or 16. During nonworking hours, the contractor's floating plant will be moored at the worksite and lighted accordingly. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution.                                                                                              |                                        |
| Lower Mississippi River - Ohio River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Commencing October 13, 2025, and continuing until December 14, 2025, the Auxiliary Chamber at the Captain Anthony Meldahl L/D will be closed for inspections and repairs. During this closure, the Main Chamber will remain open and available to pass traffic. Mariners should be alert for and abide by any special instructions issued by the lockmaster.                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                        |
| Lower Mississippi River - Ohio River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Continuing until January 10, 2026, the Dashields Locks and Dam, Mile 13.3, will be closed for maintenance, Mondays through Fridays, from 7:00 a.m. to 5:00 p.m. Mariners are urged to use caution in the area and should monitor VHF-FM Channel 13 for updates or changes to the L/D closure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                        |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                      | Marine Construction (Excluding Bridges) | Continuing until further notice, construction operations are being conducted at the Paducah Riverfront, between Miles 934.5 and 935.0. Mariners are requested to transit the area at their slowest safe speed to minimize wake and proceed with caution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                        |
| Lower Mississippi River - Ohio River/General/Marine Construction (Excluding Bridges)/Dredging                                                   | Marine Construction (Excluding Bridges) | Continuing until November 17, 2025, channel maintenance dredging will be conducted in the lower approaches to the Greenup Locks and Dam, Ohio River, Mile 341.0. Work will be performed from 6:00 a.m. through 4:30 p.m., daily. Dredged material will be placed in the permitted in-water placement area located downstream of the dam. The floating plant will consist of the M/Vs KEITH BLOUNT and BUS BROWN, two dump scows, and one barge mounted crane. During non-working hours the floating plant will be moored at the worksite and lighted accordingly. On-scene vessels will monitor VHF-FM Channel 13. Mariners should coordinate passing arrangements through the area in advance and are urged to transit at their slowest safe speed to minimize wake and proceed with caution. |                                        |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                      | Marine Construction (Excluding Bridges) | Continuing through November 7, 2025, the Markland Auxiliary Lock will be closed for repairs. All vessel traffic must use the main chamber during this time. Mariners should take all direction from the Markland L/D operators for current lockage procedures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                        |

| General/Marine Construction (Excluding Bridges)/Dredging   | Marine Construction (Excluding Bridges) | Continuing through November 11, 2025, dredging operations will be conducted at Mile 490.0 near Vistra Camp Miami Fort Power Plant. Work will be conducted from 7:00 a.m. to 5:30 p.m. Mariners are urged to transit the area with caution. For additional information, mariners can contact (513) 467-3976.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| Lower Mississippi River - Ohio River/General/Miscellaneous | Miscellaneous                           | Continuing until February 13, 2026, Expand Water Resources LLC., installed a spud barge along the LDB, in the vicinity of Mile 97.1. A 16-inch waterline and gangway will extend from the barge to the shoreline. Mariners may contact Mike Tuttle at (304) 266-3900, for further information. Mariners are urged to transit the area with caution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| Lower Mississippi River - Ohio River/General/MSIB          | MSIB                                    | The U.S. Coast Guard COTP Lower Mississippi River has issued a low water Safety Advisory between approximate Miles 869.0 and 303.0. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation. The U.S. Coast Guard COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, recommend the following limits for tows: Transiting southbound between Miles 953.8 and 869.0 Drafts no greater than 10.6 feet. Barges to be configured no more than 6 wide. Barges drafting over 10.0 feet shall not transit after October 8, 2025. Transiting northbound between Miles 953.8 and 869.0 Drafts no greater than 9.6 feet. Barges to be configured no more than 6 wide total, and loaded barges no more than 4 wide. Barges to be configured no more than 7 long. Barges currently in the system, with drafts greater than the advised depths, should be placed as near to the center of the tow as possible. Mariners are requested to contact U.S. Coast Guard Western Rivers Command Center via VHF-FM Channel 16 or at (866) 777-2784, to report areas of shoaling, hazardous conditions or missing aids to navigation. |  |

|----------------------------------------------------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Lower Old River - Red River/General/Bridges/Construction | Bridges       | Jimmie Davis Bridge; Continuing until December 31, 2025, bridge construction operations are being conducted on the new bridge. Floating equipment may be present in both spans. Channel restrictions are variable and may be reduced by 90 feet. Mariners may contact Mitch Palmer at (251) 225-5713, for further information. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution. |          |
| Lower Old River - Red River/General/Miscellaneous        | Miscellaneous | Mariners are advised of low water conditions on the Red River in the Gauntlet, between approximate Miles 42.0 and 34.0. The 9-foot navigation channel will be lost when the ACME gauge reads 7.5. Mariners shall ensure that transits occur only during water levels above 7.5 on the ACME gauge.                                                                                                                                                  |          |

Work will be conducted 7a.m. to 7 p.m., daily. There will be a containment system set up that will reduce vertical clearance by 4 feet. All mariners are reminded to transit the bridge with caution and report any unsafe conditions to the United States Coast Guard.                                                                                                                                                                          | Lat: 35° 03' 30"<br>Lon: -085° 18' 26" |
| Ohio River - Tennessee River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Commencing August 18, 2025, and continuing through December 20, 2025, natural gas pipeline maintenance will be conducted between approximate Miles 247.0 and 241.0. Work will be conducted 24-hours a day, 7-days a week. Work will extend 600 feet off the LDB. The contractor's floating plant will consist of a tug and 2 spud barges. The floating plant will monitor VHF-FM Channel 16. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made. |                                        |

| General/Marine Construction (Excluding Bridges)/Dredging                                                   | Marine Construction (Excluding Bridges) | Continuing until further notice, the M/V ROCK ISLAND and the M/V MOLINE will be conducting dredging operations between approximate Miles 529.8 and 530.2. Work will be conducted 24-hours a day, 7-days a week. The M/V ROCK ISLAND and the M/V MOLINE will monitor VHF-FM Channels 13, 14, 16 and 82, and request 30-minutes advance notice of passage. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made.                                                   |                                     |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Continuing until further notice, helo wire operations will be conducted over the Upper Mississippi River, Mile 200.0. Operations will be conducted from 9:00 a.m. to 5:30 p.m. Work will take place over the shoreline and is not expected to interfere with navigation. Mariners are urged to transit the area with caution.                                                                                                                                                                                                                                            |                                     |

|                                                                                                                                                              |                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |

| Lower Mississippi River - Upper Mississippi River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Commencing June 9, 2025, and continuing until further notice, the J.F. Brennan Company Inc., is constructing a mooring cell above L/D Nr. 11, along the RDB, in the vicinity of Mile 584.0. Work will be conducted from 6:30 a.m. until 6:00 p.m. The contractor's floating plant will be located between the mooring cell and the RDB. The M/V THOMAS KENNEDY will be on-scene monitoring VHF-FM Channels 13 and 16. Mariners are urged to transit the area with caution.                                                                                                                                                                                                                                                           |  |
| Lower Mississippi River - Upper Mississippi River/General/Marine Construction (Excluding Bridges)/Dredging                                                   | Marine Construction (Excluding Bridges) | Continuing until November 30, 2025, M/V MISS KATE is conducting dredging operations between approximate Miles 821.5 and 815.0. Work will be conducted 24-hours a day, 7-days a week. M/V MISS KATE will monitor VHF-FM Channel 14, 16 or 19, and requests 30-minutes advance notice of passage. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made.                                                                                                                                                                                                                                                                        |  |
| Lower Mississippi River - Upper Mississippi River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | Continuing until December 25, 2025, the J.F. Brennan Company is constructing a mooring cell below the Centennial Highway Bridge between the RDB and the navigation channel, near Mile 482.0. Work will be conducted from 6:30 a.m. until 6:00 p.m., Monday through Friday. The M/V THOMAS KENNEDY will be on-scene monitoring VHF-FM Channels 13 and 16. Mariners are urged to transit the area with caution.                                                                                                                                                                                                                                                                                                                        |  |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                                   | Marine Construction (Excluding Bridges) | Commencing December 8, 2025 and continuing through March 15, 2026, Lock and Dam No. 9, at Mile 647.9, will be closed to navigation for maintenance. If navigation is critical through the Lock during the scheduled closure, mariners can contact the USACE between 7:00 a.m. and 3:30 p.m., at (651) 290-5410.                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                                   | Marine Construction (Excluding Bridges) | Commencing December 8, 2025 and continuing through March 15, 2026, Lock and Dam No. 7, at Mile 702.5, will be closed to navigation for maintenance. If navigation is critical through the Lock during the scheduled closure, mariners can contact the USACE between 7:00 a.m. and 3:30 p.m., at (651) 290-5410.                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                                   | Marine Construction (Excluding Bridges) | Commencing November 2, 2025 and continuing through April 19, 2026, the Lower St. Anthony Falls Lock and Dam, at Mile 853.3, will be closed to navigation for maintenance. If navigation is critical through the Lock during the scheduled closure, mariners can contact the Lockmaster between 7:00 a.m. and 2:00 p.m., at (651) 290-5928.                                                                                                                                                                                                                                                                                                                                                                                           |  |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                                   | Marine Construction (Excluding Bridges) | Commencing November 2, 2025 and continuing through April 19, 2026, Lock and Dam 1, at Mile 847.9, will be closed to navigation for maintenance. If navigation is critical through the Lock during the scheduled closure, mariners can contact the Lockmaster between 7:00 a.m. and 2:00 p.m., at (651) 290-5928.                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| General/Marine Construction (Excluding Bridges)/Dredging                                                                                                     | Marine Construction (Excluding Bridges) | Commencing October 22, 2025 and continuing until further notice, mechanical dredging will be conducted at the Auxiliary Lock of the Melvin Price Locks and Dam, at Mile 200.5. The Auxiliary Lock will be closed during dredging operations. The Main Lock will be available for vessel transits. The on-scene vessels, M/V CLINTON and M/V DAVENPORT, can be contacted on VHF-FM Channels 13, 14, 16 or 82. Mariners should be alert for, and abide by, any special instructions that may be issued by the Lockmaster and should transit the area with caution.                                                                                                                                                                     |  |
| General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes                                                   | Marine Construction (Excluding Bridges) | Continuing until further notice, the M/V MISS KARA PATRICIA is conducting marine construction operations in the vicinity of Mile 663.0. The floating plant will be operating in the channel and near the Lansing Bridge. Mariners should contact the M/V MISS KARA PATRICIA on VHF-FM Channel 16 to coordinate passing arrangements. Vessels are urged to transit the area at their slowest safe speed and proceed with caution after passing arrangements have been made.                                                                                                                                                                                                                                                           |  |
| General/Marine Construction (Excluding Bridges)/Dredging                                                                                                     | Marine Construction (Excluding Bridges) | Continuing until November 7, 2025, the Dredge POTTER will be conducting dredging operations in the main channel near Mile 171.0 and Mile 173.0. The dredge and attendant plant will include tender boats, small boats, barges and pipeline. Work will be conducted 24-hours a day, 7-days a week. Dredged material will be pumped through a pontoon pipeline or self-floating pipeline, which may cross the channel and will be placed outside of the navigation channel. The Dredge POTTER requests 30-minutes notice prior to transiting the area and will monitor VHF-FM Channel 13 and 16. Vessels are urged to transit the area at their slowest safe speed and proceed with caution after passing arrangements have been made. |  |
| General/Marine Construction (Excluding Bridges)/Dredging                                                                                                     | Marine Construction (Excluding Bridges) | Continuing until further notice, the Dredge GOETZ will be conducting dredging operations in the vicinity of Mile 690.0. Operations will be conducted 24-hours a day, 7-days a week. The attendant plant will include tender boats, small boats, barges and pipeline. Vessels should coordinate passing arrangements 30-minutes in advance with the Dredge GOETZ on VHF-FM Channel 13, 16 or 82. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.                                                                                                                                                                                       |  |
