All passing vessels, including tour boats, fishing vessels, and recreational vessels, should remain in the channel and away from shipbreaking activity due to potential hazards associated with overhead industrial work. POC: (956) 831-2299, Email: arnie.tyler@internationalshipbreaking.com or daniel.l.richardson20.civ@us.navy.mil	
Laguna Madre Channel - Brownsville Channel/General/Hazards To Navigation/Obstructions	Hazards To Navigation	Brownsville Ship Channel - ATON Wreckage --- Brownsville Channel A Range Front Light (LLNR-29870) has been reported destroyed and partially submerged outside of the channel in approximate position 26-01-50.722N 097-13-32.099W. The partially submerged structure has been marked channel ward of the wreckage with a lighted buoy displaying a quick flashing green light at night, in approximate position 26-01-50.883N 097-13-32.253W.	Lat: 26° 01' 51" Lon: -097° 13' 32"

Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brazos Santiago Pass - Brownsville Channel - Dredge Operation --- From: 2024-08-28 To: 2026-05-02 --- Dredging is taking place in the Brownsville Channel and Brazos Santiago Pass Entrance Channel for the Brazos Island Harbor Channel Improvement and Rio Grande LNG Dredge Project. Operations will be conducted 24-hours a day, 7-days a week. The Cutter Suction Dredges OHIO and CAROLINA are currently working in the Brownsville Channel and pumping dredge spoils from the channel to the Upland Placement Areas located adjacent and south of the channel. The Dredge DODGE ISLAND is working in the Brazos Santiago Pass Entrance Channel, alongside the Trawlers MR. TOMMY and JESSICA MARIE. Dredged material will be pumped through varying lengths of floating hose, submerged pipeline, pontoon pipeline and shore pipeline. Submerged pipeline has been installed along the south side of the ship channel between Laguna Madre Channel Light 15 (LLNR-29575) and Brownsville Channel Light 41 (LLNR-29940). Additional project equipment along the channel includes: • A subline channel crossing west of the Dredge OHIO, near Brownsville Channel A Range Rear Light (LLNR-42995). • The BOOSTER 9, staged west of Brownsville Channel Light 37 (LLNR-29915). • A spud barge with a floating dock located along the green side of the channel, south of Laguna Madre Channel Light 28 (LLNR-29605). • A shallow water subline between Laguna Madre Channel Light 15 (LLNR-29575) and Laguna Madre Channel Light 21 (LLNR-29585). Additional support vessels/equipment include the Boosters JESSIE and CAPT. BARNEY, auxiliary equipment, pipe rafts, barges and towing vessels. Staging areas will be located throughout the project area, along the Brownsville Channel and Port Isabel Channel. Mariners should transit the project area with extreme caution and coordinate passing arrangements in advance. VHF-FM Channels: 10, 12 and 16, POC: (252) 342-4971 or (630) 207-3593

General/MSIB	MSIB	MSIB 18-25 --- North Calcasieu River Navigational Considerations --- Due to several documented near miss situations investigated by U.S. Coast Guard MSU Lake Charles, this Marine Safety Information Bulletin (MSIB) is to bring heightened awareness to all commercial vessels with anticipated voyages to the unique waterway features in the north Calcasieu Ship Channel. Specifically, the northeast sections of Mile Marker 16.0, and the area southeast of the Calcasieu Saltwater Barrier leading to applicable commercial waterfront facilities. Mariners are advised that this waterway features sharp winding turns, shoaling along the banks, and the presence of private docks and residential structures along the shoreline. These characteristics, particularly near the Saltwater Barrier and southward, may present navigational challenges for transiting vessels and tows. For all commercial vessels transiting through this area, consideration should be given to the voyage plan and navigational assessments, provision of suitable lookouts, and awareness of shoals, private docks and residential structures. Consider the assessment of safe speed to enable timely and effective maneuvers to mitigate the risks of collision, allision, or grounding. These considerations are not exhaustive and do not supersede navigation rules, sound mariner judgment, or good seamanship. Compliance with a vessel's Towing Safety Management System (TSMS), where applicable, remains essential. All commercial vessel operators are strongly encouraged to share this MSIB with their vessel crews during voyage planning for transits through this area. For questions about this MSIB, mariners should contact the MSU Lake Charles Casualty Investigations Division inbox at: LakeCharlesIO@uscg.mil.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Houston- Galveston, Submerged Land Act (SLA) - Galveston Bay Entrance Channel/General/MSIB	MSIB	MSIB 05-23: VTS Area Vessel Requirements --- The Captain of the Port (COTP) Houston-Galveston has received reports of vessels underway in the Vessel Traffic Service Area (VTSA) with a main engine unable to immediately achieve maximum ahead revolutions as requested by the Pilot on board. During our review of these matters, it was determined that the main engines were in good working order, but were unable to answer the full range of commands because of some type of automatic acceleration-limiting program that prevented the main engine from responding immediately. Owner/Operators are reminded that before embarking a Pilot when entering or getting underway in the navigable waters of the VTSA, main propulsion machinery should be available to immediately respond to the full range of maneuvering commands and that any load-limiting programs or automatic acceleration-limiting programs that would limit the speed of response to engine orders beyond that needed to prevent immediate damage to propulsion machinery are capable of being overridden immediately. Prior to entering the VTSA, the attending Pilot should be provided information on how any load-limiting programs or automatic acceleration-limiting programs effect the operation of the main propulsion plant and the mechanism/procedure used to override the system should that become necessary for safe navigation. Furthermore, each self-propelled vessel of 1,600 or more gross tons subject to 33 CFR Part 164 should also attempt to comply with the following: 1.) While underway in the VTSA, each vessel should have an engineering watch capable of monitoring the propulsion system, communicating to the bridge, and implementing manual control measures immediately when necessary. The watch should be physically present in the machinery spaces or in the machinery-control spaces and should consist of at least a licensed engineer. 2.) While underway in the VTSA, each vessel should pay due regard to Navigation Rule (COLREGS) 6, Safe Speed: "Every vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid collision and be stopped within a distance appropriate to the prevailing circumstances and conditions." Due regard to operating in a narrow channel should also be considered: negative hydrodynamic effects such as bank suction/cushion, sheer, and depth of the channel being prone to shoaling should be taken into consideration. Vessels should operate in such a manner as to have normal operating speed in reserve in times of extremis. The disabling of load limiting devices should be considered when reserve speed is not effective in maintaining safe navigation. In addition, the Master should ensure the Chief Engineer of the vessel has certified that the main propulsion plant is in all respects ready for operations including the main propulsion air-start systems, fuel systems, lubricating systems, cooling systems, and automation systems, that cooling, lubricating, and fuel-oil systems are at proper operating temperatures, and that main-propulsion standby systems are ready to be immediately placed in service. Please contact the Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at (281) 464-4851, if you have any questions or comments.	Lat: 29° 16' 60" Lon: -094° 35' 38"

General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Galveston Harbor Channel - Port of Galveston - Draft Restrictions --- From: 2024-10-25 To: Until Further Notice --- Draft restrictions of 44 ft or less are in place at the Port of Galveston. Waivers for vessel drafts may be granted based on the state of tides and transit plans. All deep draft vessels should transit the channel with caution and reference recent USACE channel surveys at: <a href="http://www.swg.usace.army.mil/Missions/Navigation/Navigation-Projects-Contracts/">http://www.swg.usace.army.mil/Missions/Navigation/Navigation-Projects-Contracts/</a>	
Galveston Bay - Galveston Channel/General/Hazards To Navigation/Hazards	Hazards To Navigation	Galveston Channel - Oil Spill Clean-up Operations --- Reported: 2025-10-29 --- Oil spill clean-up operations are taking place along the Galveston Channel in the vicinity of Pier 32. To prevent wake and surge from affecting oil spill clean-up, U.S. Coast Guard VTS Houston-Galveston directs minimum safe speed and no meeting or overtaking within 0.5 nm between Galveston Docks 30 to 32. Vessels must also maintain at least a 200 ft radius from Galveston Docks 30 through 32. As a precaution, boom will remain along the dock from Pier 28 to 34. Mariners should consult the Galveston Harbor Master and the Gal-Tex Pilots for safe maneuvering and docking procedures while boom is deployed. Mariners are urged to transit with extreme caution in the area.	
Galveston Bay - Galveston Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Galveston Channel - Dock Construction --- From: 2025-10-20 To: Until Further Notice --- Dock construction is being conducted at Galveston Ship Docks 40/41. Work will be conducted from 8:00 a.m. to 5:00 p.m., daily. During working hours, wake and surge considerations are requested from all vessel traffic. TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
South Pass - Head Of Passes To New Orleans/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River, LDB, Mile 24.0, AHOP - Subaqueous Stone Placement --- From: 2025-05-06 To: 2025-11-23 --- A U.S. Government Contractor will be placing subaqueous stone along the LDB of the Mississippi River at approximate Mile 24.0, AHOP. The contractor will work daily for 10 hours a day, during daylight hours. The plant will include a spud barge with a hydraulic backhoe, the M/V OSCAR WALTERS, an office barge and various material barges, which will be on-site and staged along the river at this location. During nighttime hours, the contractor will be staged along the LDB out of the Mississippi River Channel. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 67 and 79, POC: (318) 452-5448, USACE (337) 295-3498	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Grand Bayou - Marsh Restoration/Dredging --- From: 2025-08-15 To: 2025-11-30 --- Marsh creation and restoration demobilization is taking place along the Mississippi River, Grand Bayou, and in the marshes west of the Mississippi River. The project work site includes dredging areas, staging areas for anchored dredge pipe, and areas for submerged pipelines. Dredging is complete in the Magnolia Anchorage Borrow Area, between Miles 46.2 and 47.5, AHOP. Demobilization will take place 24-hours a day, 7-days a week. A submerged dredge pipe has been installed along the RDB between Miles 45.0 and 49.0, AHOP. For safety, a 500 ft buffer zone should be maintained between any vessel and the submerged pipe. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake. VHF-FM Channels: 16, 67 and 72, POC: (985) 276-7505 or (224) 221-9834	
South Pass - Head Of Passes To New Orleans/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River - Wharf Demolition --- From: 2025-09-15 To: 2025-11-14 --- Wharf demolition will be conducted along the Mississippi River, LDB, Mile 91.8, AHOP, at the St. Maurice Wharf. Work will take place Monday through Friday, from 6:30 a.m. to 6:30 p.m. On-scene vessels and equipment will include a spud barge, a trackhoe on a barge, a deck barge, and a work boat. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution. VHF-FM Channels: 16 and 67	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Saltwater Sill Demobilization --- From: 2025-10-14 To: 2025-11-30 --- The underwater saltwater barrier sill construction is complete. Demobilization will continue between approximate Miles 63.0 and 65.5, AHOP. A staging area will be utilized throughout demobilization along the RDB between Miles 63.5 and 65.0, AHOP. Four white buoys with lights will be located in the staging area to mark the location of Weeks Marine assets. Work will be conducted 24-hours a day, 7-days a week. Mariners are urged to transit the area with caution. VHF-FM Channels: 16, 67 and 72, POC: (224) 221-9834	
South Pass - Head Of Passes To New Orleans/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Anchorage Closure/Sill Construction --- From: 2025-09-24 To: Until Further Notice --- Due to saltwater sill operations, portions of Alliance Anchorage are closed to all vessels due to sublines and equipment. For additional information, mariners can contact U.S. Coast Guard Sector New Orleans at WWMNOLA@uscg.mil.	
South Pass - Head Of Passes To New Orleans/General/MSIB	MSIB	Low Water Safety Advisory: Mile 0.0 to Mile 167.0, AHOP --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to 232.0, AHOP, when the Baton Rouge River Gauge reads 16 ft and below and the Carrollton Gauge reads 2.5 ft and below. Mariners are reminded the sailing line between Miles 0.0 and 232.0 follows a path through naturally deep water connected by twelve marked channels known as "crossings." Low water conditions have significantly reduced water depths in areas of the river outside the sailing line where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit. (1) Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water, to ensure the safe and efficient movement of vessels. (2) Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship's wake. (3) Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. (4) Aids to Navigation discrepancies should be reported to the Sector New Orleans Command Center. (5) Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. • Reporting: Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. • To see the National Weather Service Extended Streamflow Prediction for LMR please use the following link: <a href="https://forecast.weather.gov/product.php?site=NWS&amp;amp;issuedby=ORN&amp;amp;product=ESP&amp;amp;format=txt&amp;amp;version=1&amp;amp;glossary=0">https://forecast.weather.gov/product.php?site=NWS&amp;amp;issuedby=ORN&amp;amp;product=ESP&amp;amp;format=txt&amp;amp;version=1&amp;amp;glossary=0</a> • US Army Corps Navigation Conditions Surveys can be found at: <a href="https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/">https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/</a>	Lat: 29° 53' 33" Lon: -089° 54' 20"
South Pass - Head Of Passes To New Orleans/General/MSIB	MSIB	Mississippi River - MSIB Vol XXXV Issue 072 - Saltwater Barrier Sill - Construction of the Saltwater Barrier Sill at Mississippi River Mile 63.7, AHOP, is complete. The current sill height sits approximately 55 ft below the waterline across the width of the river at Mile 63.7, AHOP. The channel restrictions and check-in requirements in the area have been lifted. The contact pilots remain on-site to assist with navigation, if necessary. The contact pilot can be reached during the day at (985) 215-9798, and during the night at (504) 756-9821. Portions of Alliance Anchorage remain closed to all vessels due to sublines and equipment. Mariners are reminded that future construction on the sill may be needed, requiring additional safety measures and/or draft restrictions. The U.S. Coast Guard will coordinate closely with the USACE to provide updates as soon as information becomes available. For additional information, mariners can contact U.S. Coast Guard Sector New Orleans Waterways Management at (504) 365-2280 or WWMNOLA@uscg.mil.	Lat: 29° 42' 03" Lon: -089° 58' 44"
General/MSIB	MSIB	MSIB Vol XXV Issue 074 - VTS Safety Measure: Temporary Closure Mile 0.0 - Mile 2.0, AHOP --- Vessel Traffic Service (VTS) Lower Mississippi River, in accordance with the Navigation Safety Regulations (33 CFR 161.11), will establish a series of VTS measures for all waters of the Lower Mississippi River from Mile 0.0 to Mile 2.0, AHOP. These measures are needed to protect persons and vessels from the potential safety hazards associated with the installation of the Hopper Dredge Disposal Area (HDDA) discharge pipeline that will be crossing the navigation channel, and are in effect with the following provisions: • 12:00 p.m., 16NOV2025, to 6:00 a.m., 17NOV2025: One-way traffic between Mile 0.0 and Mile 2.0, AHOP. • 17NOV2025, from 6:00 a.m. to 6:00 p.m.: All vessels are prohibited from transiting between Mile 0.0 to Mile 2.0, AHOP. • 18NOV2025, from 6:00 a.m. to 6:00 p.m.: The channel will be open to vessel traffic. • 19NOV2025, from 6:00 a.m. to 6:00 p.m.: All vessels are prohibited from transiting between Mile 0.0 and Mile 2.0, AHOP. • (Back-up Date) 21NOV2025, from 6:00 a.m. to 6:00 p.m.: All vessels are prohibited from transiting between Mile 0.0 and Mile 2.0, AHOP. - -- For additional information or status updates, mariners can contact the on-scene pilots stationed on the Dredge TEXAS via VHF-FM Channels 67 and 88, or at (910) 547-9917. Pilot boats are exempt from the above provisions during river closures. Vessels intending to arrive or depart the Mississippi River on the days of a closure must arrive the morning of the closure at Pilotown (outbound) no later than 5:30 a.m., or Southwest Pass Entrance Light (LLNR-420, inbound) no later than 4:00 a.m. Updates and/or changes to this schedule will be broadcast via industry-wide email and/or Broadcast Notice to Mariners.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Galveston Bay Entrance Channel - Houston Ship Channel/General/Bridges/Construction	Bridges	Houston Ship Channel - Bridge Construction --- From: 2025-07-24 To: 2026-11-01 --- The Harris County Toll Road Authority (HCTRA) and a contractor will commence over-the-water construction of the new Beltway 8 (Sam Houston Tollway Ship Channel Bridge) over the Houston Ship Channel. Construction on areas outside the navigable channel will continue through May 2026. Work over the Houston Ship Channel is projected to begin May 2026 and finish by November 2026. Mariners are urged to transit this area with extreme caution.	Lat: 29° 44' 10" Lon: -095° 08' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Houston Ship Channel - Shoaling --- Reported: 2024-12-11 To: Until further notice --- Shoaling has been reported in the Upper Houston Ship Channel, reducing water depths from the red side of the channel to the center line, between the Texas Beltway 8 Toll Bridge and a quarter mile above Houston Ship Channel Light 146 (LLNR-25790). Deep draft vessels are advised to proceed with caution. Vessels with a draft of 35 feet or greater should avoid the red side of the channel in this area. USACE surveys can be found at the following: <a href="https://www.svg.usace.army.mil/Missions/Navigation/Hydrographic-Surveys/">https://www.svg.usace.army.mil/Missions/Navigation/Hydrographic-Surveys/</a>	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dredge Operation --- From: 2025-11-10 To: 2025-12-02 --- The Dredge MBI-10 will be conducting mechanical dredging operations along the Houston Ship Channel at the Energy Transfer/Houston Fuel and Oil Terminal. Dredged material will be loaded into regulation hopper barges and transported to an unloader barge located on the upper end of the San Jacinto River at Adloy. The T/V ADMIRAL will be the on-scene support vessel. Mariners are urged to transit at their slowest safe speed to minimize wake and avoid meeting/overtaking in the area. VHF-FM Channels: 76 or 78, POC: (228) 760-0931	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Shoreline Revetment and Protection/Rock Placement --- From: 2025-03-07 To: Until Further Notice --- Shoreline revetment/protection and rock placement operations are being conducted along the Houston Ship Channel. On-scene vessels include the M/V MISS WRENN, a 140 ft x 54 ft spud barge, two 110 ft x 40 ft spud barges, and between one and thirteen deck barges. Operations will be conducted 6-days a week, during daylight hours only. When vessels are working, wake and surge considerations are requested from ships transiting along Atkinson Island and when transiting near Houston Ship Channel Light 86 (LLNR-24550). VHF-FM Channels: 11 and 16	

Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Barbours Terminal Channel - Marine Construction and Dredging --- From: 2025-04-07 To: 2027-07-01 --- Dredging and marine construction will be taking place along the Houston Ship Channel and the Barbours Terminal Channel, 24-hours a day, 7-days a week. Dredging and demolition will take place along Morgans Point and transition into concrete bulkhead construction. An additional bulkhead wall will be built along Spilmans Island. Dive operations may take place intermittently throughout the project. On-scene vessels will include the T/Vs MOONEY and EVERLINE, the Work Boat SCULLY, the Crane Barge CB01 and the Barge GD-2013. Mariners are urged to transit the area at their slowest safe speed, observe all day shapes and dive flags, and proceed with caution. VHF-FM Channels: 13 and 16	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Barbours Terminal Channel - Dredge Operation --- From: 2025-04-30 To: Until Further Notice --- The Dredge GENERAL BRADLEY is dredging along the Houston Ship Channel at the Barbours Cut Flare. Work will take place from 6:00 a.m. to 6:00 p.m., 7-days a week. A submerged pipeline is crossing the channel near Houston Ship Channel Light 91 (LLNR-24595). The dredge will connect to the subline and pump material to the CM Land Booster located north of the Cedar Bayou Channel near Cedar Bayou Channel Buoy 3 (LLNR-24620.01). Additional on-scene vessels may include the CM2006 Anchor Barge, the CM Land Booster Barge, and the T/Vs GUAM and CAPT BRENNAN. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 20A, 68, 41 and 82, POC: (912) 508-1351	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2025-09-04 To: 2026-01-12 --- Dock construction is being conducted along the Houston Ship Channel at City Docks 20 and 21. Work will consist of demolishing and rebuilding of the fendering system and bulkhead construction. Workers will operate at the waterline and under the dock on skiffs. Divers may also be present intermittently throughout the project. Mariners should transit the area with caution. POC: (832) 926-2215	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Peggys Lake - Drilling and Staging Area --- From: 2025-09-25 To: Until Further Notice --- The T/V DRAKE THOMAS have equipment staged outside of the Houston Ship Channel in support of a drilling/digging project near the shoreline of Peggys Lake. The U.S. Coast Guard VTS Houston-Galveston requests wake and surge considerations from ships. VHF-FM Channels: 11 and 13, POC: (713) 824-0285	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2025-10-21 To: 2025-12-15 --- The T/V MR. TATE will be assisting with dock construction along the Houston Ship Channel at City Docks 13 and 14. Operations will be conducted from 7:00 a.m. to 5:30 p.m., Monday through Friday. Mariners should transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 12, 21 and 66A, POC: (713) 775-2783	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Barbours Cut Channel - Dredge Operation --- From: 2025-11-19 To: 2025-11-28 --- Maintenance dredging will be conducted along the Barbours Cut Terminal Channel. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be transported in scows to the north end of Alexander Island where an offloading barge will pump dredge spoils inside the island. On-scene vessels will include the Bucket Dredge CATALINA, T/Vs CORRINE C., HENRY BROOKS, TROY BERNIER and COLUMBIA, three scows, an offloader barge, the Crew Boat MONICA C., and the Survey Boat SILVER BULLET. Mariners are urged to transit at their slowest safest speed to minimize wake and proceed with caution. VHF-FM Channels: 05A, 11 and 13, POC: (321) 474-5633	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dredge Operation --- On: 2025-11-28 and 2025-11-29 --- Maintenance dredging will be conducted along the Houston Ship Channel at the Sam Houston Landing. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be transported in scows to the north end of Alexander Island where an offloading barge will pump dredge spoils inside the island. On-scene vessels will include the Bucket Dredge CATALINA, T/Vs CORRINE C., HENRY BROOKS, TROY BERNIER and COLUMBIA, three scows, an offloader barge, the Crew Boat MONICA C., and the Survey Boat SILVER BULLET. Mariners are urged to transit at their slowest safest speed to minimize wake and proceed with caution. VHF-FM Channels: 05A, 11 and 13, POC: (321) 474-5633	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Miscellaneous	Miscellaneous	San Jacinto Bay Barge Channel - USI Canal - Aid to Navigation Discontinuation --- Reported: 2025-08-19 --- The private aids to navigation marking the San Jacinto Bay Barge Channel (USI Canal), from San Jacinto Bay Barge Channel Daybeacon 5 (LLNR-25120) to San Jacinto Bay Barge Channel Daybeacon 28 (LLNR-25200) have been discontinued. Vessels should avoid meeting or overtaking throughout the channel and should exercise extreme caution when transiting at night or during reduced visibility. Mariners accustomed to utilizing these private aids when navigating the San Jacinto Bay Barge Channel (USI Canal) should transit the area with caution.	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	U.S. Coast Guard Sector Houston-Galveston MSIB 35-24 --- Aids to Navigation Discrepancy Reporting --- The USCG continues to operate in an environment with a high number of unreported Aids to Navigation (ATON) knockdowns within this Captain of the Port Zone. The underreporting of discrepant ATON directly affects the ability of local USCG Aids to Navigation units to effectively prioritize sections of the Marine Transportation System in a timely manner. This current environment of unreported discrepant ATON continues to increase the risk of groundings, collisions or allisions with potential of serious injuries, environmental damage, and waterway closures. To promote safety, mariners are reminded to utilize all means of visual navigation, to include the use of Electronic Chart Display Information Systems (ECDIS), and to report missing or discrepant ATON. Reports of missing and/or discrepant ATON may be made to the USCG for correction prioritization through any of the following means: VHF-FM Channel: 16, Phone: Sector Houston-Galveston Command Center, (866) 539-8114, or Sector Houston-Galveston Vessel Traffic Service, (281) 464-4837, E-Mail: houstonwwm@uscg.mil, Online: <a href="https://www.navcen.uscg.gov/contact/aton-discrepancy-report">https://www.navcen.uscg.gov/contact/aton-discrepancy-report</a>	Lat: 29° 21' 07" Lon: -094° 46' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory (MSIB 02-25) --- The Houston Ship Channel widening project is complete between Houston Ship Channel (HSC) Light 63 (LLNR-24295) through Houston Ship Channel Light 84 (LLNR-24540), approximately South Boaters Cut Channel to Atkinson Island. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep from approximately Houston Ship Channel Entrance Lighted Buoy 18 (LLNR-36055) to Houston Ship Channel Light 84 (LLNR-24540). The aids to navigation along the Houston Ship Channel have been relocated based on the new channel dimensions. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 83/84. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners can contact the U.S. Coast Guard Sector Houston-Galveston Waterways Management Department at <a href="mailto:houstonwwm@uscg.mil">houstonwwm@uscg.mil</a> .	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Morgans Point - VTS USI Canal/San Jacinto Bay Channel Directive --- The USI Canal/San Jacinto Bay Channel has become increasingly trafficked over the last 2 years. For various reasons, many tows attempt to reconfigure between Morgans Point and Exxon to go into or come out of the USI Canal. This practice has resulted in several near miss situations between Morgans Point and the Exxon Terminal in the Houston Ship Channel. In order to fulfill the VTS mission of reducing risk of collision, allision, damage, pollution, and injury, the following Directive is in effect and will be written as policy in documentation updates to the U.S. Coast Guard VTS Houston-Galveston User Guide: • Vessel Traffic Service Houston-Galveston Directs no barge work in the Houston Ship Channel between Morgans Point and Exxon for purposes of going into/out of the USI Canal. •	

Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory (MSIB 11-25) --- The Houston Ship Channel dimensions have changed, impacting channel dimensions between Houston Ship Channel (HSC) Light 83 (LLNR-24535) and Houston Ship Channel Light 92 (LLNR-24600). The red side barge lane now ends at HSC Light 92. The green side barge lane remains the same, beginning at HSC Light 89 (LLNR-24565). Surveys have been successfully completed, extending the channel from Houston Ship Channel Light 83 to Houston Ship Channel Light 90 (LLNR-24575) to the following dimensions: 700 ft wide by 46 ft deep in the main channel and barge lanes measuring 235 ft wide by 12 ft deep on either side of the main channel. The aids to navigation along the Houston Ship Channel have been relocated based on the new channel dimensions. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 89/90. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners can contact the U.S. Coast Guard Sector Houston-Galveston Waterways Management Department at houstonwvm@uscg.mil.

General/Miscellaneous	Miscellaneous	Inner Harbor Navigation Canal Lock - USACE Navigation Bulletin Reissue --- * MARINERS ARE ADVISED THAT THIS POLICY NOTICE FOR THE INNER HARBOR NAVIGATION CANAL (IHNC) LOCK REMAINS IN EFFECT INDEFINITELY. * Due to the limited mooring space between the Florida Avenue Bridge and the Inner Harbor Navigation Canal Lock, it is required that all tows contact the Lock on VHF-FM Channel 14 for locking information prior to navigating through the Florida Avenue Bridge. Towboat Captains are reminded that if a tow has to be broken for locking operations, this shall be done prior to coming through the Florida Avenue Bridge and the barges shall not be left unattended in the canal for any reason. Towboat Captains must use the mooring buoys and tend the wheelhouse at all times. To prevent bank erosion, Tow Captains are also reminded not to push the head of their tow into the banks on the river or canal end of the lock for any reason while waiting for their locking. The Lockmaster, Richard McKinzie, can be reached at 504-945-2157. The points of contact with the New Orleans District are Robert Swayze at 504-862-2060, Jesse Adams at 504-862-1061 and Brandon Keck at 504-862-2630.	Lat: 29° 57' 53" Lon: -090° 01' 38"

New Orleans To Baton Rouge - Lower Mississippi River/General/MSIB	MSIB	Low Water Safety Advisory: Mile 167.0 To Mile 303.0, AHOP (12 ft and Falling) -- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued a low water safety advisory for all waters of the Lower Mississippi River (LMR) from Mile 167.0 to Mile 303.0, AHOP. This safety advisory is effective immediately with the following provisions, in accordance with the Waterways Action Plan Baton Rouge Annex: • LMR Miles 167.0 - 303.0: (1) Commercial vessel operators shall be aware of falling river-level conditions and monitor Coast Guard safety broadcasts announcing known navigation hazards. (2) Tow sizes and vessel drafts from cargo loading should be adjusted as necessary to meet decreasing channel depths. (3) Pilots and Masters of oceangoing vessels should review facility docking procedures prior to arrival in port. (4) All vessels should transit within the charted navigational channel, to the greatest extent possible. (5) All vessels should consider staffing vessels with their most experienced crews. (6) Missing aids to navigation should be reported to the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2209. • 81 Mile Point, LMR Miles 177.0 - 179.0: (1) In accordance with 33 CFR 161.65(e), all vessels moving or intending to move in the 81 Mile Point VTS Special area shall comply with the reporting requirements detailed in the VTS LMR User Manual or in 33 CFR 161.65 by contacting "New Orleans Traffic" on VHF-FM Channel 05A. (2) Mariners are advised of the increased possibility of shoaling in this area and should use extreme caution while transiting. • College Town Light, LMR Miles 225.0 - 228.3: (1) All towing vessels are advised to keep flat on the bank and provide a wide berth to deep-draft vessel traffic. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Low Water Safety Advisory: Mile 0.0 to Mile 167.0, AHOP --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to 232.0, AHOP, when the Baton Rouge River Gauge reads 16 ft and below and the Carrollton Gauge reads 2.5 ft and below. Mariners are reminded the sailing line between Miles 0.0 and 232.0 follows a path through naturally deep water connected by twelve marked channels known as "crossings." Low water conditions have significantly reduced water depths in areas of the river outside the sailing line where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit. (1) Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water, to ensure the safe and efficient movement of vessels. (2) Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship's wake. (3) Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. (4) Aids to Navigation discrepancies should be reported to the Sector New Orleans Command Center. (5) Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. • Reporting: Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. • To see the National Weather Service Extended Streamflow Prediction for LMR please use the following link: <a href="https://forecast.weather.gov/product.php?site=NWS&amp;issuedby=ORN&amp;product=ESP&amp;format=txt&amp;version=1&amp;glossary=0">https://forecast.weather.gov/product.php?site=NWS&amp;issuedby=ORN&amp;product=ESP&amp;format=txt&amp;version=1&amp;glossary=0</a> • US Army Corps Navigation Conditions Surveys can be found at: <a href="https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/">https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/</a>	Lat: 30° 01' 46" Lon: -090° 28' 29"
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Low Water Safety Advisory: Mile 167.0 To Mile 303.0, AHOP (12 ft and Falling) -- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued a low water safety advisory for all waters of the Lower Mississippi River (LMR) from Mile 167.0 to Mile 303.0, AHOP. This safety advisory is effective immediately with the following provisions, in accordance with the Waterways Action Plan Baton Rouge Annex: • LMR Miles 167.0 - 303.0: (1) Commercial vessel operators shall be aware of falling river-level conditions and monitor Coast Guard safety broadcasts announcing known navigation hazards. (2) Tow sizes and vessel drafts from cargo loading should be adjusted as necessary to meet decreasing channel depths. (3) Pilots and Masters of oceangoing vessels should review facility docking procedures prior to arrival in port. (4) All vessels should transit within the charted navigational channel, to the greatest extent possible. (5) All vessels should consider staffing vessels with their most experienced crews. (6) Missing aids to navigation should be reported to the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2209. • 81 Mile Point, LMR Miles 177.0 - 179.0: (1) In accordance with 33 CFR 161.65(e), all vessels moving or intending to move in the 81 Mile Point VTS Special area shall comply with the reporting requirements detailed in the VTS LMR User Manual or in 33 CFR 161.65 by contacting "New Orleans Traffic" on VHF-FM Channel 05A. (2) Mariners are advised of the increased possibility of shoaling in this area and should use extreme caution while transiting. • College Town Light, LMR Miles 225.0 - 228.3: (1) All towing vessels are advised to keep flat on the bank and provide a wide berth to deep-draft vessel traffic.	Lat: 30° 05' 31" Lon: -090° 54' 39"
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Mississippi River - Highway 190 Bridge - Low Water Advisory --- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued the following low water safety advisory for the Upper Baton Rouge (HWY 190) Bridge: Mariners should refer to the U.S. Army Corps of Engineers' Lower Mississippi River Chart No. 73 which states, the Port Allen span is navigable when the Baton Rouge River gauge is above 15 ft. Current river levels do not support using this span.	Lat: 30° 30' 28" Lon: -091° 11' 51"

Sector Mobile, Submerged Land Act (SLA) - Pensacola Bay/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Pensacola Bay - Bayou Grande - Davenport Bayou - Dredge/Marsh Restoration Operation --- From: 2025-04-01 To: 2026-02-21 --- Hydraulic dredging operations will be conducted in Pensacola Bay, at the mouths of Bayou Grande and Davenport Bayou. A 1,350 ft access channel will be created to facilitate rock barge operations. Dredged material will be transported via pipeline to marsh fill areas for the creation of eight marsh islands and 33.64 acres of marsh planting. Additional project activities will include the construction of five breakwaters, ranging from 259 ft to 366 ft in length, the placement of 14 rock piles, and the construction of five submerged rock reefs, ranging from 276 ft to 438 ft in length, for habitat restoration and navigational safety enhancements. Eight danger markers will be installed to mark the project work zones. Work will take place during daylight hours only. Vessels are requested to maintain a safe distance from the dredge, pipelines and support vessels. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with extreme caution. VHF-FM Channels: 13 and 16	Lat: 30° 22' 34" Lon: -087° 16' 06"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION

Houston Ship Channel - San Jacinto River/General/MSIB	MSIB	MSIB 09-16: San Jacinto River Mud Bank --- The following operating restrictions have been put in place to mitigate unsafe conditions/hazards in the vicinity of the Mud Bank in the San Jacinto River: · Only tugboats with barges in tow are permitted on the Mud Bank. No unattended or shared barges are authorized on the Mud Bank. · The only tugboats, barges and tows permitted on the Mud Bank are those awaiting fleet space or dock space. · Tugboats, barges and tows that make use of the Mud Bank are limited to no more than 48 consecutive hours and shall not exceed this timeframe. · Tugboats, barges and tows using the Mud Bank shall not extend into the San Jacinto River beyond 162 ft from the riverbank. · No barges are permitted beyond the Channel Shipyard Dry-Dock in the direction of the ship channel. -- The Coast Guard is required by the Ports and Waterways Safety Act to maintain the safety of all U.S. waterways at all times. Coast Guard personnel will continue to monitor safety in the vicinity of the San Jacinto River Mud Bank and compliance with the above operating restrictions. Waterway users who fail to comply with the above operating restrictions will be subject to regulatory and administrative action. Persistent disregard of these operating restrictions may result in closure of the San Jacinto River Mud Bank to all tugboats, barges and tows. The Coast Guard strives to facilitate commerce by maximizing the availability of waterways and navigational safety. This can only be achieved through close coordination and cooperation with waterway users. Questions regarding operating restrictions on the San Jacinto River Mud Bank can be sent to houstonwww@uscg.mil. --	Lat: 29° 46' 36" Lon: -095° 04' 37"

General/Hazards To Navigation/Wrecks	Hazards To Navigation	Gulf of America - Sunk Fishing Vessel --- Reported: 2025-10-24 --- A 32 ft F/V has been reported sunk in the Gulf of America near approximate position 29-57-21.90N 088-14-20.16W. The vessel is reportedly not marked. Mariners are urged to avoid the area.	Lat: 29° 57' 22" Lon: -088° 14' 20"

Sector Mobile, Exclusive Economic Zone (EEZ)/General/Miscellaneous	Miscellaneous	Marine Safety Alert 02-24 - Inspections and Compliance Directorate --- DANGEROUS BYCATCH FROM DISCARDED MUNITIONS REMAINS A PRESENT DAY HAZARD --- This Safety Alert is being issued to raise awareness of lurking hazards caused by discarded munitions, which often contain active explosives or chemical agents. Although the practice of dumping munitions into the sea ceased in 1970, a significant amount remains hidden in coastal waters, posing a safety hazard to commercial fisherman, dredge operators, and others who trawl and work the ocean floor. Recently, a deckhand on a clamming vessel was severely burned when a canister was dredged up and brought onboard with clams and other debris. The canister likely contained mustard gas or another blistering agent, but did not display any obvious visual, audible, or odor indicators of discharging content. A member of the crew discovered the canister and threw it back overboard. Several hours later he developed a severe rash that required professional medical treatment. Mustard gas is a chemical weapon developed during World War I. Millions of pounds of this product, other chemical weapons, bombs, torpedoes, artillery shells, and munitions were routinely disposed of and remain in U.S. coastal waters. Although many munition dump areas are well marked on navigation charts, numerous areas where munitions were discarded remain unmarked. There is also evidence suggesting that munitions were frequently “short dumped,” meaning dumped outside of the designated areas by contractors hired to take them to the intended locations. The Coast Guard previously issued Safety Alert 11-16 and Safety Alert 6-10 on this same topic and continues to strongly recommend that persons involved in the fishing and dredging industries: Review their navigational charts to ensure the areas in which they are trawling or dredging are not near labeled “Explosives Dumping Areas.” Such areas must be given wide berth and seafarers should recognize that surface bottoms change and that objects can move significant distances from their original disposal areas. Review and follow recommendations from the Maritime Industry 3Rs Explosive Safety Guide. Carefully record the position of any munitions encountered and returned to the sea. Immediately report discovery to the National Response Center, at (800) 424-8802 to ensure a proper response and potential recovery. Alternatively, the local U.S. Coast Guard unit may be notified via VHF-FM Channel 16. This Safety Alert is provided for informational purposes only and does not relieve any domestic or international safety, operational, or material requirement. Developed by the Office of Commercial Vessel Compliance (CG-CVC) and distributed by the Office of Investigations and Casualty Analysis (CG-INV). Questions may be submitted to HQS-SMB-CGINV@uscg.mil.	
General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2025-10-27 To: 2025-12-12 --- The U.S. Navy will be conducting testing operations in the Gulf of America in an area bound by approximate positions: 29-41-41.58N 086-45-03.54W, 29-41-41.16N 086-38-17.46W, 29-35-50.16N 086-38-19.02W and 29-36-00.30N 086-45-06.84W. On-scene vessels will include the M/V PATRIOT and the PSC-1. Mariners should maintain a wide berth from all U.S. Naval craft and avoid the operating area. VHF-FM Channel: 16

Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Marine Events/Fireworks	Marine Events	East Pass Entrance Channel - Fireworks Display --- Regularly scheduled barge-based fireworks displays will take place southwest of the East Pass Entrance Channel near Eglin Beach Park. A 700 ft fallout radius will exist around the barge located in approximate position 30-23-14.42N 086-30-53.95W. Fireworks are scheduled to take place for the Harborwalk Village Fireworks 2025 Season on the following dates: -- December 14th and 31st -- Mariners are urged to use extreme caution while transiting this area.	Lat: 30° 23' 14" Lon: -086° 30' 54"
General/Miscellaneous	Miscellaneous	Gulf of America - Aquaculture Platform Installation --- From: 2025-11-24 To: 2029-08-30 --- An aquaculture platform with a mooring system will be deployed as a temporary demonstration project in approximate position 30-12-06.73N 087-57-53.89W. The platform will feature yellow lights at night, with yellow mooring buoys deployed nearby marking the subsea moorings. Occasionally, the Vessel SPINNER will be on site for feeding and aquaculture operations. Mariners are urged to transit the area with caution. POC: (256) 415-3534	
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	The Department of the Air Force will enforce the charted Restricted Area found in 33 CFR 334.730. This area includes certain navigable waters of Santa Rosa Sound, the GIWW (Miles 204.6 to 216.4, WHL), and the Gulf of America (Gulf of Mexico) adjacent to Eglin Air Force Base Property. All entry, transit, anchoring or drifting within the restricted area for any reason is not allowed without permission from the U.S. Air Force (96 TW/CC), except to navigate the Gulf Intracoastal Waterway. Such vessels and other watercraft shall confine their movements to the waters within the limits of the GIWW and shall make the passage as promptly as possible under normal vessel speed. Other permitted access to the Restricted Area may be granted, in certain circumstances, by contacting the 96 TW/CC at (850) 882-2000.	Lat: 30° 23' 03" Lon: -086° 48' 24"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Temporary Research Buoy --- From: 2025-04-21 To: 2026-04-20 --- A lighted spotter research buoy displaying a flashing 2.5 second amber light at night has been temporarily established in approximate position 30-19-27.498N 087-08-39.684W.	Lat: 30° 19' 27" Lon: -087° 08' 40"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-10-09.2N 088-01-18.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 10' 09" Lon: -088° 01' 19"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Horn Island Pass - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-11-42.5N 088-32-38.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 11' 42" Lon: -088° 32' 39"
General/Miscellaneous	Miscellaneous	Alabama River - In accordance with Section 7-11 of the ACT Master Water Control Manual dated April 2022, full navigation channel availability on the Alabama River is dependent upon seasonal flow conditions and channel maintenance. Based on a profile survey conducted on 04JUN2024, a 10 ft tailwater elevation at Claiborne Lock is required to provide a 9 ft channel on the Alabama River to Montgomery, AL. A modified depth of 7.5 ft can be provided with a tailwater elevation of 8.5 ft at Claiborne Lock. The tailwater elevations at Claiborne have been consistently below the 8.5 ft elevation, providing a modified navigation depth due to no substantial rainfall events impacting the ACT Basin. Channel availability is typically higher during the months of December through May; however, with the seasonal outlook for the winter expected to be mild, below normal conditions may persist. Water Management provides multiple weekly Claiborne tailwater forecasts to stakeholders for navigation and other purposes. To be added to the distribution list for the Alabama River forecasts, mariners can contact: water-sam@usace.army.mil. Tailwater elevations below Claiborne Lock and Dam can be viewed at the following web address: <a href="https://waterdata.usgs.gov/monitoring-location/USGS-02428401">https://waterdata.usgs.gov/monitoring-location/USGS-02428401</a>	Lat: 31° 36' 54" Lon: -087° 33' 06"

Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2025-09-03 To: 2025-12-20 --- The U.S. Navy will operate an unmanned surface vehicle (USV) towing underwater equipment in the Gulf of America, in the offshore waters of Panama City Beach, FL. The operating area will be bound by approximate positions: 30-07-58.59N 085-55-19.54W, 30-07-58.63N 085-50-42.76W, 30-03-56.30N 085-50-42.75W and 30-03-56.27N 085-55-19.44W. Two U.S. Naval support vessels will be on-scene during the USV operation. Mariners should maintain a wide berth from all U.S. Naval craft and are requested to avoid the area. VHF-FM Channel: 16

General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Bayou Teche - Bulkhead and Boathouse Construction --- From: 2025-10-27 To: 2025-12-01 --- A bulkhead and boathouse will be constructed along Bayou Teche near approximate position 29-55-12.29N 091-40-01.45W. Dredging, pile driving, and back-filling will be conducted in the area. An excavator on a shallow water spud barge will be on-site throughout the operation. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake.	Lat: 29° 55' 12" Lon: -091° 40' 02"
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Grand Bayou - Marsh Restoration --- From: 2025-01-06 To: 2025-11-30 --- Marsh creation and restoration demobilization is taking place near Grand Bayou and the marshes west of the Mississippi River. The project work site includes staging areas for anchored dredge pipe and supply barges, marsh creation areas, dredging limits, and areas for submerged pipelines. Dredge pipes, equipment, boats and barges will transit through Jefferson Canal to the project site. The placement of dredged material into the marsh creation areas will be conducted during daylight hours, 24-hours a day, 7-days a week. Work will include the use of marsh buggies, towing vessels, barge mounted excavators and work barges. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake. VHF-FM Channels: 16, 67 and 72, POC: (985) 276-7505 or (224) 221-9834	
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Jefferson Canal - Subline Crossing --- Installed: 2025-07-07 --- A dredge subline has been installed in Jefferson Canal. Mariners should transit the area with caution.	

Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Grand Lake - Dredging and Marsh Creation --- From: 2025-09-15 To: 2026-07-31 --- Amphibious and barge mounted excavators will be building marsh creation areas on the southern shoreline of Grand Lake. Dredges will pump material from the middle of Grand Lake into five marsh creation sites. Work will take place 24-hours a day, 7-days a week. On-scene vessels include the Dredges GRAND TERRE and GRAND GOSIER, tugs and barges. Three dredge pipeline segments will be floating in the area, with 1,000 ft sections submerged and marked. Access dredging may take place in Grand Lake and in the surrounding bodies of water, including Bayou Gentilly, Petit Lake and Alligator Pass. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 16 and 71

Mobile Channel - Theodore Ship Channel/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Theodore Ship Channel - Shoaling/Draft Restrictions --- Reported: 2025-07-29 --- Recent soundings conducted by the U.S. Army Corps of Engineers, Mobile District, indicate areas of reduced depth in the Theodore Ship Channel, specifically near the intersection with the Mobile Channel. As a result, a draft limitation of 37 ft is now in effect for vessels transiting this section of the Theodore Ship Channel. Vessels exceeding the draft limitations with intentions to transit this area, should contact Terry Gilbreath at (251) 441-7074. Additionally, vessels should coordinate with the bar pilots for any further restrictions prior to departure. For further information, mariners can contact the U.S. Coast Guard Sector Mobile Waterways Management Division at (251) 382-8653.	
Mobile Channel - Theodore Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Theodore Ship Channel - Dredge Operations --- From: 2025-09-10 To: 2025-12-19 --- Intermittent maintenance dredging will be conducted at the Core Industries Theodore Industrial Port and the Core Industries Theodore Marine Terminal along the Theodore Ship Channel. Work will take place 7-days a week, during daylight hours. On-scene vessels will include the Hopper Barges CTTE 1988 and CTTE 1956 and the Crane Barge CORE 4. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. POC: (251) 338-8303
