| LAKE MICHIGAN - Chicago Harbor/General/Bridges/Rehabilitation | Bridges | *****REVISED***** IL - LAKE MICHIGAN – Chicago Harbor From August 15, 2025, through December 1, 2026, the Lake Street Bridge at Mile 1.64 (CORPS MILE 325.5) over the South Branch of the Chicago River, will be replaced, one leaf at a time. One half of the channel will be open to navigation without any equipment with a fully operational bridge leaf. The leaf of the bridge being replaced will be secured to masted navigation and will have six barges 120-feet by 80-feet or smaller working near or under the secured leaf. The contractor will display temporary steady burning yellow lights on the bottom and four-corners of the bridge leaves until the permanent bridge lighting can be established. Any equipment moving near mid-channel or in the unaffected side of the channel should be passed with standard agreements in accordance with the Navigation Rules. [16/25] [26/25] | Lat: 41° 53' 09" Lon: -087° 38' 16" |
| LAKE MICHIGAN - Chicago Harbor/General/Bridges/Maintenance | Bridges | IL - LAKE MICHIGAN – Chicago Harbor From August 25, 2025, through October 30, 2026, between the hours of 0700 and 1600, Monday through Saturday, three barges, 90-feet by 50-feet or smaller will be working at the Cortland Street Bridge at Mile 4.48 (CORPS MILE 328.2) over the North Branch of the Chicago River. The barges will move with a 2-hour advance notice provided directly to the barges on VHF-FM Marine Channel 16. [31/25] | Lat: 41° 55' 01" Lon: -087° 39' 51" |
| LAKE MICHIGAN - Chicago Harbor/General/Bridges/Inspection | Bridges | IL - LAKE MICHIGAN – Chicago Harbor From November 17 and November 19, 2025, between the hours of 0800 and 1600, daily, a 30-foot Harcon will be inspecting the Clark Street Bridge at Mile 1.21 (CORPS MILE 326.0) and the LaSalle Street Bridge at Mile 1.29 (CORPS MILE 325.9), over the Main Branch of the Chicago River. The Harcon will monitor VHF-FM Marine Channel 16 and will move if provided a 15-minute advance notice of arrival. [39/25] | Lat: 41° 53' 15" Lon: -087° 37' 57" |
| General/Bridges/Removal | Bridges | IL - LAKE MICHIGAN – Chicago Harbor from January 5, through February 7, 2026, between the hours of 0600 and 1900, Monday through Saturday. two 120-feet by 32-feet or smaller barges and 2 man lifts will be removing the Chicago Avenue Bridge at Mile 2.40 (CORPS MILE 326.3) over the North Branch of the Chicago River. The barge will monitor VHF-FM Marine Channel 16 and 708-699-5609 and will move with a 3-hour advance notice. Spotters will warn of approaching vessels and move the man lifts to allow vessels to pass under the bridge safely. [17DEC25] | Lat: 41° 53' 47" Lon: -087° 38' 39" |
| General/Bridges/Maintenance | Bridges | *****REVISED***** IL - LAKE MICHIGAN – Chicago Harbor From August 18, through March 31, 2026, between the hours of 0700 and 1500, Monday through Friday a 40-foot x 40-foot barge will be working under the Roosevelt Road Bridge at Mile 2.94 (CORPS MILE 324.3) over the South Branch of the Chicago River. The barge will monitor VHF-FM Marine Channel 16 and will move with a 2-hour advance notice. The bridge operating schedule will not be affected. | Niagara River - Lake Erie/General/Hazards To Navigation/Obstructions | Hazards To Navigation | General/Hazards To Navigation/Obstructions From: 2025-08-11 To: 2026-02-07 Location: 41.91687° N / 80.78856° W A submerged breakwater was constructed in Ashtabula Harbor. It is connected to the existing East Breakwater. The submerged breakwater is connected to the East Breakwater at the first angle point of the East Breakwater, as entering the harbor, from the lake. All elevations referenced are referred to Low Water Datum (LWD), IGLD 1985. The center line of the submerged breakwater approximately follows the same azimuth as the first segment of the East Breakwater, in a south easterly direction, for approximately 1000', then slightly bends to the east for another two segments, for approximately 500'. The first 1000' (Area "A") has a crest elevation that varies between LWD to - 1 ft LWD with a crest width of 9', and a footprint of approximately 150', with the next 100' transitioning to the dimensions in the next item. The final 400 (Area "B") has a crest height of -5.0', with a crest width of 9', and a footprint of approximately 50'. All mariners are requested to transit the area with caution. | Lat: 41° 55' 01" Lon: -080° 47' 19" |
| Niagara River - Lake Erie/General/Hazards To Navigation/Obstructions | Hazards To Navigation | General/Hazards To Navigation/Obstructions From: 2025-08-11 To: 2026-02-07 Location: 41.91846° N / 80.79018° W 41.91643° N / 80.78793° W 41.91619° N / 80.78753° W 41.91568° N / 80.78628° W 41.91549° N / 80.7864° W 41.91592° N / 80.7875° W 41.91626° N / 80.78809° W 41.91845° N / 80.79058° W 41.91846° N / 80.79018° W A submerged breakwater was constructed in Ashtabula Harbor. It is connected to the existing East Breakwater. The submerged breakwater is connected to the East Breakwater at the first angle point of the East Breakwater, as entering the harbor, from the lake. All elevations referenced are referred to Low Water Datum (LWD), IGLD 1985. The center line of the submerged breakwater approximately follows the same azimuth as the first segment of the East Breakwater, in a south easterly direction, for approximately 1000', then slightly bends to the east for another two segments, for approximately 500'. The first 1000' (Area "A") has a crest elevation that varies between LWD to - 1 ft LWD with a crest width of 9', and a footprint of approximately 150', with the next 100' transitioning to the dimensions in the next item. The final 400 (Area "B") has a crest height of -5.0', with a crest width of 9', and a footprint of approximately 50'. All mariners are requested to transit the area with caution. | |

| Hickory Island Channel - Livingstone Channel/General/LAA/RNA/Temp RNA | LAA/RNA | General/LAA/RNA/Temp RNA In accordance with the provisions of United States 33 CFR part 162.134(D) governing the connecting waters from Lake Erie to Lake Huron and the Canadian Navigation Safety Regulations - 2020 part 3 division 3 - St. Clair and Detroit River paragraph 321 (a) and (b) , effective 16 Dec 2025 both upbound and downbound traffic will be permitted in the Livingstone Channel subject to the following conditions: 1. Vessels shall not meet or pass in the Livingstone Channel between Livingstone Channel upper entrance light and Bar Point pier light D33. 2. Upbound vessels shall report to MCTS Sarnia on VHF channel 12 one hour prior to entering the normal one way portion of the Livingstone Channel and again upon exiting that portion of the channel. 3. Downbound vessels shall include in their normal reports to MCTS Sarnia at the Belle Isle Light calling-in-point an ETA to entering the Livingstone Channel and shall report again upon exit. 4. Downbound vessels reporting at Grassy Island Light calling-in-point in advance of the Livingstone Channel will normally have the right of way over upbound vessels which have not reported at the Detroit River Light. However, ice and weather conditions may dictate that upbound vessels are allowed to clear the Livingstone Channel prior to downbound transits. MCTS Sarnia will prioritize traffic as necessary to resolve conflict between upbound and downbound traffic. The Amherstburg channel remains open to navigation, but mariners are advised that aids to navigation remain in an unmonitored status. | |

This action is necessary to protect recreational waterway users, from the inherent hazards associated with winter conditions and navigation. The safety zone encompasses all U.S. waters bounded by a continuous line connecting the following points: all U.S. waters bounded by a line from Port Austin Reef Light at 44-04-55.332N., 082-58-56.642W to Tawas Light at 44-14-54.043N., 083-27-32.975W to Saginaw Bay Channel Range Front Light at 43-38-54.355N., 083-51-05.701W, then returning to the point of origin at Port Austin Reef Light. This safety zone will be in effect starting at 8:00 am on Saturday, January 3, 2026, and will apply throughout the winter months. Any vessel wishing to transit through or enter the designated safety zone must request permission at least 72 hours in advance. To do so, contact U.S. Coast Guard Sector Detroit at (833) 388-8724 or VHF/FM CH 16. | |

| Saginaw Bay Channel - Saginaw River/General/Bridges/Maintenance | Bridges | *****REVISED***** MI - LAKE HURON – Saginaw River From December 1, 2024, through March 31, 2025, December 1, 2025, through March 31, 2026, and from December 1, 2026, through March 31, 2027, the Lafayette Street Bridge at Mile 6.78, over the Saginaw River will be secured to masted navigation. Vessels able to pass under the bridge without an opening may do so at any time. Additionally, starting on October 1, 2024, six barges 80x190-foot or smaller will be working under the bridge, and they will move if a 3-hour advance notice is provided by calling 608-475-8851, or 608-610-9374, or 989-293-5892. From December 15, 2024, through November 30, 2025, a cofferdam will be installed that measures approximately 60-feet by 95-feet, that reduces the navigation channel by 4-feet on either side leaving approximately 140-foot channel available for vessels. The red pier lights will be moved to the cofferdam sides to show the temporary reduction in horizontal clearance. From November 4, 2024, through November 15, 2028, trestles will be installed extending outward from shore approximately 50-feet. Flashing yellow lights will warn mariners of the trestle’s location. From February 1, 2026, through March 29, 2028, heel girders will be installed on the four corners of the bridge to enable the new drawspan to be opened during construction. These girders will extend an additional 2-feet into the channel reducing the horizontal clearance to approximately 136-feet. During the winter, the ice will degrade due to the movement of barges and the ice under the bridge should be considered unsafe for pedestrians or vehicles. | Lake Superior - ST MARYS RIVER TO AU SABLE POINT/General/MSIB | MSIB | Commander Coast Guard Sector Northern Great Lakes Commenced Operation Taconite. At the start of each voyage or transit, to enhance the coordination of ice breaking resources, COTP Norther Great Lakes directs all shipping companies to provide an estimated time of arrival for their vessels downbound to Whitefish Point, upbound to Detour Reef LT, Eastbound to Lansing Shoal LT, Westbound to Round Island, or arriving or departing from any of the Western Superior ports and terminals. Similarly, for vessels operating in Lake Michigan in the presence of ice, all shipping companies should provide an estimated time of arrival for vessels entering the Sturgeon Bay Ship Canal, Rock Island Passage or when arriving or departing Escanaba, Green Bay, Marinette or any other ports and terminals within Green Bay. Estimated time of arrivals must be received six hours prior to a vessels arrival to any of these points or once a day by 1000 (eastern). position reports may be filed with "Sault Traffic" either by landline (906.635.3299), fax (906.635.3238), or email (sootfc@uscg.mil). A vessels ETA must be updated whenever the arrival time changes by more than six hours. Mariners are asked to establish VHF radio contact with the servicing icebreaker on VHF-FM channel 16 approximately one hour before reaching the appropriate service area. | Lat: 46° 30' 03" Lon: -084° 20' 22" |
