Lake Erie - Cleveland Harbor/General/Safety Zones/Temporary Regulated Navigation Zones	Safety Zones	General/Safety Zones/Temporary Regulated Navigation Zones From: 2024-11-27 To: 2025-01-31 Location: 41.49337° N / 81.70403° W 41.49319° N / 81.7036° W 41.49207° N / 81.7041° W 41.49054° N / 81.70414° W 41.49006° N / 81.70375° W 41.48882° N / 81.70219° W 41.48858° N / 81.70092° W 41.48794° N / 81.70088° W 41.48811° N / 81.70186° W 41.48913° N / 81.70403° W 41.49014° N / 81.70504° W 41.49133° N / 81.70508° W 41.49337° N / 81.70403° W The Ninth Coast Guard District is issuing this Marine Safety Information Bulletin to bring awareness to the Irishtown Bend stabilization and rehabilitation project on the Cuyahoga River. Construction is intended to shore-up and replace approximately 2,400 linear feet of corrugated steel bulkhead located on the western (left descending) bank of the Cuyahoga River between the Detroit-Superior Bridge and the Columbus Road Bridge. The Captain of the Port Sector Eastern Great Lakes (COTP) has determined that potential hazards associated with the equipment used to complete this project would be a safety concern for any craft intending to navigate near the project area during construction hours. Furthermore, additional safety measures are necessary to keep workers on the construction barges safe while completing the construction project. Construction hours are from 7 a.m. each Tuesday through 7 a.m. each Thursday; during that time no vessel or craft is to be within 10 feet of the construction barges unless permitted by the COTP or a designated representative. This Regulated Navigation Area is in effect until the waterside portion of the work is complete.	
Lake Erie - Cleveland Harbor/General/Safety Zones/Temporary Regulated Navigation Zones	Safety Zones	General/Safety Zones/Temporary Regulated Navigation Zones From: 2025-08-28 To: 2025-09-01 Location: Burke Lakefront Airport There will be a safety zone in effect on certain navigable waters of Lake Erie and Cleveland Harbor in Cleveland, Ohio for the 2025 Cleveland National Air Show The safety zone will be enforced on the following dates and times: (1) August 28, 2025, from 3:00 P.M. to 6:30 P.M. (local) (2) August 29, 2025, from 7:00 A.M. to 5:30 P.M. (local) (3) August 30-September 1, 2025, from 7:30 A.M. to 6:30 P.M. (local). All mariners are advised not to enter the safety zone without the approval of the Coast Guard via VHF channel 16.

WEST END OF LAKE ERIE - Detroit River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2022-11-01 To: 2025-12-01 Location: 42.28885° N / 83.09742° W Bridge Name: Gordie Howe International Bridge From November 1, 2022, through December 1, 2024, contractors will be constructing the Gordie Howe International Bridge at mile 16.7 over the Detroit River. No equipment will be placed in the water. Overhead work will have temporary steady burning yellow lights to mark new construction. A moving platform with quick flashing red lights and orange or red ball fenders on the bottom four corners with a safety net that hangs approximately 15-feet below low steel will be constructing the bridge. Mariners should avoid passing directly under the platform at any time. Snooper type vehicles will be utilized on the bridge throughout construction. Spotters will warn of approaching vessels and move the man lift to allow vessels to pass. When construction is completed and all equipment removed, the final vertical clearances for the bridge will be 152-feet for the center 100-feet of the navigation channel. No less than 137-feet of vertical clearance will be available at the channel limits. Vertical clearances are based on IGLD85. NOTE: Over the water construction is basically complete and extensions to construction have been issued to accommodate demobilization of equipment.	Lat: 42° 17' 20" Lon: -083° 05' 51"

VHF-FM CHANNELS MONITORED: 16/18/73 9. SPECIAL REQUIREMENTS/REMARKS: Dredging Muskegon Harbor Federal channel. Submerged pipe lying on the lake floor marked by orange round buoys every 500 feet. (2) white buoys will be seen North and South of the dredge. The white buoys indicate winch anchor locations. The disposal area starts South of the South breakwater 2,000’ and goes an additional 3,500’ Southward. Placement will be between the 4’ depth contour to the 12’ depth contour. The main contact will be Superintendent Joseph Martin. Cell# listed below. During rough seas our pipe pontoon will be floating outside of the channel. It is bright yellow, 25’x8’x6’ and has (2) flashing amber lights on each end that come on at night. Another pipe pontoon that is bright yellow (25’x8’x6’) and has (2) flashing amber lights on each end will be in the disposal area. The disposal area will be marked with white ball buoys on each corner.	Lat: 43° 13' 34" Lon: -086° 20' 40"
LAKE HURON - LAKE MICHIGAN/General/MSIB	MSIB	General/MSIB From: 2025-08-18 To: 2025-09-05 Autonomous underwater vehicle technology is being deployed to develop an observational capability to support USCG spill response and ecosystem monitoring. A test and evaluation of AUV systems and sensors will be conducted in Lake Michigan ahead of winter 2026 deployments. Operations will take place within an area near Muskegon MI Freeboard and/or mast height: 6-8 inches tail fin, bulk is awash Average operational depth & surfacing frequency Depth 50 meters, surfacing every 3 nm. While on the surface, the AUVs have slight positive buoyancy requiring less than 700 grams (1.5 lbs) to push the vehicles below the surface, so bow waves or even contact tend to push them aside. Typically, flotsam such as drifting logs are likely to cause more damage to recreational boats than the impact potential of the AUV. The vehicles have operated for more than 700 days without impacting recreational or commercial vessels. The short amount of time the vehicles spend on the surface usually keeps them out of harm’s way. The AUVs are very brightly colored so any vessel with a sharp lookout will spot them with plenty of time to avoid. During brief (up to 5 min) surface communications the AUV aligns with the waves with limited mobility.

Maumee Bay - Maumee River/General/Bridges/Maintenance	Bridges	OH - LAKE ERIE – Toledo Harbor From March 1, 2026, through July 1, 2028, scaffolding will be installed under the Ohio Turnpike Bridges at Mile 11.42, over the Maumee River that hangs approximately 7-feet below low steel. [27/25]	Lat: 41° 34' 50" Lon: -083° 36' 25"
Maumee Bay - Maumee River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	From 10 Feb 2025 to 31 Dec 2025 Mark Haynes Construction will be conducting Island Restoration at the Audubon Islands State Nature Preserve on the Maumee River near River Mile 13.5 from 0700 to 1700 Monday through Thursday (work may also periodically occur on Fridays and Saturdays). Work will be limited to the vicinity of the Audubon Islands State Nature Preserve. One temporary causeway will be constructed between the City of Maumee shore (White Street Park) and Ewing Island that will block the side channel on the Maumee side of Audubon Islands. Two temporary causeways will also be constructed between Hunt and Ewing Islands that will block the channel between these islands. Boaters should stay on the Perrysburg side of Audubon Islands. This work will restore lost wetland habitat and enhance open water river habitat. For more information, please visit: <a href="https://metroparkstoledo.com/conservation/highlights/audubon-islands-restoration/">https://metroparkstoledo.com/conservation/highlights/audubon-islands-restoration/</a>
