Tansy Point - Astoria/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	The M/V ESSAYONS will be conducting dredging activities near Puget Island, (RM 19+40 to RM 21+05), between 31 Jul – 04 Aug 2026. Disposal sites will be located at RM 8 (WA side). USACE requests mariners transit at their slowest safe speed to minimize wake when in the vicinity of a dredge and proceed with caution after passing arrangements have been made on VHF-FM channel 13. Vessel(s) and/or equipment may encroach into the channel. Mariners are advised that the start and ending dates for dredging activities may vary due to unforeseen on-site conditions, such as gill net fishing, weather and other factors. Bonneville Pool/General/Bridges	Bridges	COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Marine construction/demolition Advanced American Construction will be replacing an existing railroad bridge on the Washington side of the Columbia River (RM 168.2) at the confluence of the White Salmon River & Columbia River from 08 Jul through 21 Aug 2026. The Derrick Barge AAC Millennium will be on station performing Critical operations Monday through Friday 0700 – 1700. Mariners are requested to avoid the White Salmon River work area directly underneath the HWY-14 & Railroad Bridges from 2 – 3 Aug 2026, while the Derrick Barge AAC Millennium conducts critical heavy lifts. Mariners are requested to reduce speed and avoid the work area. Onsite vessels will be monitoring VHF-FM channels 13 & 16 during working hours. During non-working hours, The Derrick Barge will remain on station with 360° white lights on all four corners. For additional information, contact Kristian Hellberg at (703) 409-1614 or kristianh@callaac.com.	Lat: 45° 43' 42" Lon: -121° 31' 18"
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Advanced American Construction will be constructing a new railroad bridge on the Washington side of the Columbia River near RM 168.2 at the confluence of the White Salmon River & Columbia River. Work includes heavy marine assets, critical lifts, and pile driving operations. The Derrick Barge AAC Millennium will be on station from 10 Nov 25 through 31 Dec 26. Working days are planned for Monday through Friday, 0700 to 1700. Onsite equipment will monitor VHF-FM channels 13 & 16 during working hours. Mariners are requested to reduce speed and avoid the work area. During non-working hours, the derrick barge will remain on station with steady white lights on all four corners. Please call Kristian Hellberg at (703) 409-1614 or email at kristianh@callaac.com for more information.	Lat: 45° 43' 42" Lon: -121° 31' 21"

Boundary Pass

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Boundary Pass/General/Threatened And Endangered Species Advisory (TESS Advisory)/Marine Wildlife Migration	Threatened And Endangered Species Advisory (TESS Advisory)	Effective 01 Jun (exact date TBC by ECHO team based on SRKW presence) to 30 Nov 2026, the Enhancing Cetacean Habitat and Observation (ECHO) Program voluntary ship slowdown through Haro Strait and Boundary Pass is in effect for all inbound and outbound commercial and government vessels to reduce underwater noise for at-risk whales. If it is safe and operationally feasible to do so, commercial and government vessels are requested to not exceed the following speeds through the water: 11 knots – Bulklers, tankers, general cargo vessels, and government vessels; and, 14.5 knots – Vehicle carriers, cruise ships, and container vessels. This voluntary slowdown takes place between 48°24'22.78"N, 123°12'15.26"W, and 48°46'39.28"N 123°1'36.84"W. Speed transition zones are in place within the established traffic system at both approaches to the slowdown area. The north transition zone are those waters between north of Boat Pass, Saturna Island and Rosenfeld Rock and the south transition zone are those waters between buoy VH at the Victoria pilot station, and Sea Bird Point at the southeast corner of Discovery Island. There are also two optional slow down areas, one rounding turn point and the other between Turn point, Saturna Island and Alden Point, Patos Island. This initiative will remain in effect 24 hours per day until 23:59 PDT on 30 Nov 2026, depending on southern resident killer whale presence in the fall. The ECHO Program is led by the Vancouver Fraser Port Authority in collaboration with government agencies, Indigenous communities, industry partners and environmental groups. For more detailed information, refer to the following internet web address: https://www.portvancouver.com/echo/

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Hood Canal - Dabob Bay/General/Miscellaneous	Miscellaneous	The University of Washington, in coordination with the US Navy, has deployed an environmental research buoy in approximate location 47-41-32 N / 122-51-54 W, at the south end of Dabob Bay. The buoy will remain in place for one year until 25 Sep 2026. The buoy is yellow in color and lighted with a yellow flashing light, FL Y (5) 20s. For more information on this buoy, contact the Navy Range Control at (360) 396-2313.	Lat: 47° 41' 32" Lon: -122° 51' 54"

Depoe Bay

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Columbia River, Submerged Land Act (SLA) - Depoe Bay/General/Bridges/Rehabilitation	Bridges	Oregon Department of Transportation (ODOT) and Carter Construction will be completing a cathodic protection project on the US-101 Bridge (BRDG UID 29514) (LLNR 9627) across the entrance to Depoe Bay, OR. The planned start time/date is 0600 on 5 Jan 2026 through 1800 on 18 Dec 2026. The start and end dates may change due to weather conditions. The work requires the use of containment via scaffolding, that will reduce the vertical navigation clearance of the subject bridge from 46 feet to 41 feet at high tide for the center horizontal 38ft above the main navigation channel. There will also be scaffolding that will hang about 19' below the bottom of the bridge on the north and south side of the bridge arch of the main navigation channel and will remain in place until maintenance is completed until November / December. The containment will be marked with amber caution lighting and will not obstruct any navigational aids. For more information contact Markus Schaaf at Markus.Schaaf@odot.oregon.gov.	Lat: 44° 48' 35" Lon: -124° 03' 42"

District 13, Oceanic boundary to EEZ

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
NAVAREA XII - District 13, Oceanic boundary to EEZ/General/Miscellaneous	Miscellaneous	NOAA PMEL will conduct continuous autonomous, uncrewed maritime vehicle operations from 20 Jul – 30 Sep 2026 off the Washington and Oregon coasts, up to 80 nm offshore. Operations consist of scientific ocean data collection. The uncrewed system is an 18' yellow surface vessel, with AIS, navigation lights, a flashing yellow (FL Y 4S) light, and travels at <3 kts. For additional information contact pmel.edd.ops@noaa.gov.	

Duwamish Waterway East

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Elliott Bay - Duwamish Waterway East/General/Bridges/Temp Deviation	Bridges	The draws of each bridge across the Duwamish Waterway shall open on signal, except as follows: From Monday through Friday, except all Federal holidays but Columbus Day, the draw of the First Avenue South Bridge, mile 2.5, need not be opened for the passage of vessels from 6 a.m. to 9 a.m. and from 3 p.m. to 6 p.m., except: The draw shall open at any time for a vessel of 5000 gross tons and over, a vessel towing a vessel of 5000 gross tons and over, and a vessel proceeding to pick up for towing a vessel of 5000 gross tons and over. In addition, the Coast Guard has approved a temporary deviation that governs the operating schedule for the 1st Avenue South Bridge (BRDG UID 29458). This deviation accommodates repair maintenance and part replacement from 6 a.m. July 14, 2026, to 11:59 p.m. January 8, 2027. From Monday through Friday, except all Federal holidays, from 6 p.m. to 6 a.m., all vessels requiring a draw opening of the 1st Ave. Bridge shall give a 24-hour advance notice and confirm their arrival time 2 hours before their scheduled arrival at the bridge. On Saturday and Sunday, during all hours of operation, vessels requiring the draw of the 1st Ave Bridge to open shall give a 24-hour advance notice and confirm their arrival time 2 hours before their scheduled arrival at the bridge. Upon the vessel's arrival, a signal shall be given to open. The bridge operator will open half of the draw in single leaf unless a full opening is requested during the 24-hour advance notice. The horizontal clearance with half of the draw open is 60 feet at the ends of the span and 72 feet at the water line. The subject bridge provides 32 feet for 100 feet center span, and 22 feet side spans of vertical clearance in the closed-to-navigation position above high water. No alternate route is available on the Duwamish Waterway. Throughout the duration of this deviation, the 1st Avenue South Bridge must open the full draw for emergency vessel(s) responding to a call "if" safely able to do so. The bridge shall operate in accordance with 33 CFR §117.1041 at all other times. For more information on this event contact Garrett Hutton at (206) 440-4626 or garrett.hutton@wsdot.wa.gov.	Lat: 47° 32' 31" Lon: -122° 20' 03"
Elliott Bay - Duwamish Waterway East/General/Marine Construction (Excluding Bridges)/Boring and Core Samples	Marine Construction (Excluding Bridges)	Anchor QEA will conduct sediment sampling work on the Lower Duwamish Waterway starting on June 1, 2026, and extending through August 2026. The work will primarily occur in on the Georgetown Reach and 1st Ave-8th Ave Reach (from just upstream of Slip 4 to just downstream of Slip 2) and will be both within and outside of the federal navigation channel. This project is EPA-approved and involves small work vessels conducting marine sampling. The planned work schedule is 0700-1900 Monday – Friday. Work vessels may be able to move for river traffic. Mariners planning to transit this stretch of the Duwamish are encouraged to contact the vessels in advance via VHF-FM 16/13 or phone, or call the project coordinator, Suzanne Replinger at (206) 709-6850. Vessels anticipated to be involved in sampling work will be operated by Gravity Marine (425-281-1471): R/V Tieton (sampling vessel) R/V Munson (support vessel)	Lat: 47° 32' 03" Lon: -122° 19' 20"

East Passage

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Puget Sound - East Passage/General/Miscellaneous	Miscellaneous	Redside Construction will be conducting marine demolition construction operations located near East Passage and entrance for Quartermaster Harbor, south Vashon Island, WA from 17 Aug – 03 Sep 2026. There will be a Flexi-Float crane barge (40' x 100) and a spud barge (32' x 115') displaying all-round white lights on all four corners unless underway. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information, contact the project superintendent Jeremy Helser at 360-250-4328 or Sam Berry at 206-940-0564.	Lat: 47° 20' 38" Lon: -122° 28' 06"

Union Bay Reach - Lake Washington/General/Bridges/Maintenance	Bridges	Washington State Department of Transportation will be performing scheduled maintenance on the I-90 Bridge (BRG UID 31112 and 31113) (AKA Lacey V. Murrow Bridge) across Lake Washington. The maintenance dates will be from 15 June 2026 to 30 September 2026. The work hours will be Mon – Sat from 0700 to 1730; work on Sunday may occur if needed but not planned. Containment will be installed under the subject bridge, reducing the vertical clearance by 6 feet. Mariners navigating through the work area shall maintain safe clearance from construction workboats and equipment and follow directions from contractor support vessels when present. Mariners be cautions of fall hazards. The support and safety vessels will monitor VHF channels 13 and 16. The maintenance supervisor may be contacted at (805) 657-1472. For more site maintenance information contact Anthony Thomas at (206) 359-0132 and athomas@anvilbuilders.com.	Lat: 47° 35' 25" Lon: -122° 16' 10"
Union Bay Reach - Lake Washington/General/Bridges/Temp Deviation	Bridges	WASHINGTON – LAKE WASHINGTON SHIP CANAL – Montlake Bridge deviation notice The Coast Guard has approved a temporary deviation from the normal operating schedule that governs the Montlake Street Bridge (BRDG UID 31183) across the Lake Washington Ship Canal, mile 5.2. The Montlake Street Bridge need not open the draw for marine vessels during heavy road traffic for the 2026 University of Washington football games on the following dates and times: - 06 Sep, 1000 to 1330 and 1600 to 1830. - 12 Sep, 0930 to 1300 and 1530 to 1800. - 19 Sep, 1300 to 1700 and 1900 to 2200. - 26 Sep, TBD. - 09 Oct, 1500 to 1830 and 2100 to 2330. - 07 Nov, TBD. - 21 Nov, TBD. The deviation is necessary to accommodate vehicular traffic attending football games at Husky Stadium at the University of Washington, in Seattle, Washington. This deviation allows the Montlake Bridge to remain in the closed-to-navigation position before and after each game. Due to television scheduling, game times will be published at later dates when determined, and the MSI will be updated with the bridge closure times. Vessels which do not require a bridge opening may continue to transit beneath this bridge during the closure. The bridge will be required to open, if needed, for vessels engaged in emergency response operations during this closure times. The Coast Guard will publish any updates or changes to this operating schedule in future MSI announcements. The bridge shall operate in accordance with 33 CFR § 117.897 at all other times. For more information, contact Colleen Kelly at (425) 739-3700.	Lat: 47° 38' 51" Lon: -122° 18' 17"

Sector Columbia River, Exclusive Economic Zone (EEZ) - Sector Columbia River, Territorial Sea/General/Miscellaneous	Miscellaneous	NOAA Fisheries has deployed a subsurface mooring with passive acoustic recorders to monitor marine mammal presence in approximate location: 46-19-37N, 124-11-52W in 41 m of water. Vessels conducting in-water work are requested to avoid this location by at least 1000 yards to avoid entanglement of gear. For more information, contact Brad Hanson at 206-300-0282.	Lat: 46° 19' 37" Lon: -124° 11' 52"

Sector Columbia River, Exclusive Economic Zone (EEZ) - Sector Columbia River, Territorial Sea/General/Miscellaneous	Miscellaneous	PacWave continues to maintain a network of site monitoring equipment, seafloor instrumentation, and subsea cable infrastructure throughout the PacWave South wave energy test site, approximately 7 nautical miles WSW of the Yaquina Bay Entrance. Some of the monitoring buoys are low profile and may be difficult to see in elevated sea states. All buoys have a yellow hull, are lighted with a flashing amber light, and are deployed as single-point moorings. PacWave has also installed four long-term surface marker buoys that visually delineate the corners of the test site: NW (44°34.9988'N, 124°14.4998'W), NE (44°35.0465'N, 124°13.1008'W), SE (44°33.0437'N, 124°12.9700'W), and SW (44°33.0000'N, 124°14.3730'W). These corner markers are approximately 9 feet tall, have a yellow / red hull, a fixed yellow tower structure with integrated radar reflector, green grating on the lower half of the tower, reflective tape on the upper tower, and are lighted. These markers are also single-point moorings and will remain in place as part of PacWave's maintained offshore infrastructure. Mariners should be aware that subsurface equipment and mooring components may also be present. Mariners are requested to avoid the test site if possible and to use caution when navigating in or near the area. For additional information, contact brett.hembrough@oregonstate.edu or 541-737-9023. If there is an emergency or concerns regarding this equipment, please call our 24 / 7 Watch Desk at 541-819-4096.

Sector Puget Sound, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Olympic Coast National Marine Sanctuary will be conducting oceanographic research between Makah Bay and Cape Elizabeth from 05 May – 01 Oct 2026. The R/V Storm Petrel will have deployed 10 moorings with surface expressions and 2 subsurface moorings by 22 May at the locations listed below. For 8 of the 10 moorings with surface expressions, the gear consists of a 12-inch low-drag surface float (Polyform LD-2) with an 18-foot-long aluminum halibut pole with radar reflector and an 8-meter-long Amsteel line attached to sub-surface gear. For 2 of the 10 moorings with surface expression, gear consists of a yellow telebuoy (FL 5 Y 20s, 3NM) and orange flag at the surface, connected to a sub-surface Falmat cable and Nilsipin extending to a bottom structure. Two subsurface moorings will be deployed 08 June 2026, OC-02 is an acoustic mooring deployed at a depth of 94 meters with a height off bottom of 6.2 meters. RoSCI is an environmental DNA collection mooring deployed at a depth of 42 meters with a height off bottom of 15 meters. Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Miscellaneous	Miscellaneous	NOAA Fisheries has deployed a subsurface mooring with passive acoustic recorders to monitor marine mammal presence in approximate location: 48-29-30N, 124-47-00W, in 285 m of water. Vessels conducting in-water work are requested to avoid this location by at least 1000 yards to avoid entanglement of gear. For more information, contact Brad Hanson at 206-300-0282.	Lat: 48° 29' 30" Lon: -124° 46' 60"
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Miscellaneous	Miscellaneous	NOAA Fisheries has deployed a subsurface mooring with passive acoustic recorders to monitor marine mammal presence in approximate location: 48-29-30 N, 124-53-58 W, in 97 m of water. Vessels conducting in-water work are requested to avoid this location by at least 1000 yards to avoid entanglement of gear. For more information, contact Brad Hanson at 206-300-0282.	Lat: 48° 29' 30" Lon: -124° 53' 58"
General/Miscellaneous	Miscellaneous	Olympic Coast National Marine Sanctuary has deployed one sub-surface mooring, titled OC-02, in position 48-29-04.0N, 125-00-00.0W. OC-02 is an acoustic mooring deployed at a depth of 94 meters. The sub-surface gear consists of four scientific instruments connected with a combination of chain and Amsteel line. There is no surface gear on this mooring and the top of the float measures 6.2 meters above the sea floor. This gear supports an effort to achieve continuous acoustic monitoring of the underwater environment at this site over a five-year period. For additional information, please contact the Vessel Operations Coordinator, LTJG Jack Gerrior, at (781) 217-1696.	Lat: 48° 29' 04" Lon: -125° 00' 00"
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/MSIB	MSIB	The Captain of the Port of Puget Sound has published MSIB 003-26 providing Safety Guidance for Small Vessels Navigating the Puget Sound Traffic Lanes. A summary of the guidance is captured below, but for the entire Bulletin, go to this address https://www.pacificarea.uscg.mil/Our-Organization/Northwest-District/District-Staff/dpw/notices/ and look for the Navigation Rule 10 link. Rule 10 of the Navigational Rules of the Road mandates specific conduct while within Traffic Separation Schemes (TSS) to promote safe navigation of vessels and reduce the possibility of collisions, especially in areas of high vessel traffic. If using a TSS, you must: Proceed in the appropriate traffic lane in the general direction of traffic flow for that lane; Keep clear of a separation zone or separation line, unless you must cross it; Normally join or leave a traffic lane at the termination of the lane, but when joining or leaving from the side, do so at as small an angle to the general direction of traffic flow as practicable. Vessels of less than 20 meters in length or sailing vessels shall not impede the safe passage of a power-driven vessel following a traffic lane. Fishing Vessels are permitted to fish within the separation zone, as to not impede the safe passage of any vessel following a traffic lane. A vessel shall not use a traffic separation scheme when it can safely use an adjacent route. A vessel other than a crossing vessel or a vessel joining or leaving a lane shall not normally enter a separation zone or cross a separation line except in cases of emergency to avoid immediate danger. For Additional Information, Contact VTS on VHF channel 5A in the Strait and North of Everett, channel 14 south of Everett, or by phone at (206) 217-6152 for information on vessel movements. Contact USCG Sector Puget Sound Command Center at (206) 217-6002 to report unsafe operations or conditions within the port.	Lat: 48° 11' 06" Lon: -122° 47' 10"
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Threatened And Endangered Species Advisory (TESS Advisory)/Marine Wildlife Migration	Threatened And Endangered Species Advisory (TESS Advisory)	Effective 01 Jun to 31 Oct 2026, the ECHO Program voluntary inshore route alteration is active for all tugs transiting the Canadian inshore area of the Strait of Juan de Fuca to reduce underwater noise for at-risk whales. If it is safe and operationally feasible to do so, tugs are requested to navigate either through the outbound shipping lane or the inshore route alteration zone, while maintaining a buffer distance of 1,000 meters from the traffic separation scheme (TSS). The inshore route alteration zone is 1,500 meters wide and occurs in the area between 123-52-21.192 W, 48-18-37.332 N and 124-31-33.378 W, 48-28-53.316 N, covering a distance of approximately 28 NM. For more detailed information, visit the following web address: https://www.portvancouver.com/echo	
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Threatened And Endangered Species Advisory (TESS Advisory)/Marine Wildlife Migration	Threatened And Endangered Species Advisory (TESS Advisory)	Effective 01 Jun to 31 Oct 2026, the Enhancing Cetacean Habitat and Observation (ECHO) Program voluntary ship slowdown in the vicinity of Swiftsure Bank is in effect for all inbound and outbound commercial and government vessels to reduce underwater noise for at-risk whales. If it is safe and operationally feasible to do so, commercial and government vessels are requested to not exceed the following speeds through the water: 11 knots – Bulklers, tankers, general cargo vessels, and government vessels; and, 14.5 knots – Vehicle carriers, cruise ships, and container vessels. The voluntary ship slowdown takes place at Swiftsure Bank between 125° 17' W or 48° 19' N on the western or southern sides, and 124° 40' W on the eastern side. All vessels transiting inbound or outbound are asked to slowdown when it is safe and operationally feasible to do so. Speed transition zones are in place about 2 nautical miles prior to entering the slowdown area. The ECHO Program is led by the Vancouver Fraser Port Authority in collaboration with government agencies, Indigenous communities, industry partners and environmental groups. For more detailed information, refer to the following internet web address: https://www.portvancouver.com/echo/

Willamette River/General/Bridges	Bridges	OREGON - WILLAMETTE RIVER – PORT OF PORTLAND – Bridge notice The Coast Guard intends to approve a temporary deviation to the operating schedule that governs the Hawthorne Highway Bridge (BRDG UID 38555), mile 13.1, crossing the Willamette River at Portland, Oregon. This deviation will accommodate the Tofurky Trot running event on 26 November 2026. This deviation will allow the subject bridge draw to remain in the closed-to-navigation position from 0900 to 1100 on 26 November 2026. The vertical clearance for the Hawthorne Bridge is 49 feet, referenced to the vertical clearance above Columbia River Datum 0.0. Vessels that do not require a bridge opening may continue to transit beneath the bridge during this closure period. The bridge will be able to open for emergencies, and there is no immediate alternate route for vessels to pass. Please submit comments by 15 August 2026 at smb-cgd-nw-bridges@uscg.mil. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. For additional information contact Matt Studer at matt.d.studer@multco.us.	Lat: 45° 30' 47" Lon: -122° 40' 15"

Sector Columbia River, Submerged Land Act (SLA) - Willapa Bay/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	J.E. McAmis submits the following information for dredging and disposal operations to occur on the above referenced project Willapa Bay Maintenance Dredging located on the Palix River near Bay Center, WA. Dredging and disposal operations will be 24 hours per day, 7 days per week. The Derrick "Ellis Island" will perform all dredging. The tug "James T" will perform all towing operations. Both the Derrick "Ellis Island" and Tug "James T" will monitor VHF channel 16 and use VHF channel 72 for operations. Dredge Ellis Island and tug James T will begin dredging operations at the Palix River Access Channel on July 27, 2026. Disposals for the project will occur at the South Channel Placement Site located in Willapa Bay. Dredging operations are estimated to be completed by August 21, 2026. Upon Palix River completion, Dredging will resume at the Bay Center Entrance Channel. Bay Center Entrance Channel is estimated to be completed September 15, 2026. It is requested that mariners use extreme caution in work areas and are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. If you have any questions or need additional information, please call or email. I can be reached at (360) 984-9178 or email djamieson@orn.net
