OMEGA RADIONAVIGATION SYSTEMS

- 1 At the request of the United States the following information is brought to the attention of Member Governments.
 - 2 The United States Coast Guard announce the operational declaration of OMEGA station Australia on 16 August 1982 in accordance with the Federal Radionavigation Plan (FRP) dated March 1982.
 - 3 As indicated in the Federal Radionavigation Plan, OMEGA station Australia is the eighth and final permanent OMEGA station. This station will be manned and operated by the Department of Transport, Australia and will transmit OMEGA signals from a 1400 feet grounded tower providing coverage to most of the Indian, North Pacific and South Pacific Oceans. It is located near the town of Woodside in S.E. Australia.
 - 4 The operational declaration of OMEGA station Australia on 16 August 1982 will be in accordance with the Bilateral Agreement of 20 September 1977 and Technical Agreement of 7 April 1982 between the Department of Transport of Australia and the United States Coast Guard.
